Local Provision of Public Services George R. Zodrow,2013-09-03 Local Provision of Public Services: The Tiebout Model after Twenty-Five Years describes several theoretical and empirical branches of economic research related to Charles Tiebout's provocative hypothesis that consumer mobility and interjurisdictional competition result in an efficient allocation of resources to the local public sector. The book provides insights on the issues being considered in policy debates regarding the appropriate means of providing essential public services. Chapters in the book include an overview of the Tiebout model; income redistribution in a federal system; empirical relationships in the political economy of local public finance; and two conflicting views of the incidence of the property tax. Economists, local government leaders, and experts in public finance will find the book very insightful.
