*Optimal Investment and Marketing Strategies* Ilona Murynets,2012 Over the past decade, innovative technologies have resulted in an extensive growth of new services. Each new service requires a number of management and marketing decisions to be made well in advance of its launch and throughout its entire life cycle. This book develops mathematical models to facilitate decision-making dealing with technologically innovative services. Specifically, it develops (i) models for optimal pricing strategies of subscription services on monopolistic and duopolistic markets; (ii) an analytical model for optimal investment and optimal pricing strategies for innovative maintenance service contracts; and (iii) a model for targeting customers in marketing campaigns. In addition, the models (i) (iii) can also be used to forecast an aggregate demand for a new service as well as the service demand for each individual customer.
