Multiscale Stochastic Volatility for Equity, Interest Rate, and Credit Derivatives Jean-Pierre Fouque,George Papanicolaou,Ronnie Sircar,Knut Sølna,2011-09-29 Building upon the ideas introduced in their previous book, Derivatives in Financial Markets with Stochastic Volatility, the authors study the pricing and hedging of financial derivatives under stochastic volatility in equity, interest-rate, and credit markets. They present and analyze multiscale stochastic volatility models and asymptotic approximations. These can be used in equity markets, for instance, to link the prices of path-dependent exotic instruments to market implied volatilities. The methods are also used for interest rate and credit derivatives. Other applications considered include variance-reduction techniques, portfolio optimization, forward-looking estimation of CAPM 'beta', and the Heston model and generalizations of it. 'Off-the-shelf' formulas and calibration tools are provided to ease the transition for practitioners who adopt this new method. The attention to detail and explicit presentation make this also an excellent text for a graduate course in financial and applied mathematics.

Corporate Social Responsibility in Rising Economies Nayan Mitra,René Schmidpeter,2021-02-08 Emerging economies arguably have different socio-fiscal dynamics compared to developed economies. On one side they have the need for corporate interventions in national development, on the other hand, they do not have enough research to support the agenda. In recent times there has been a conscious effort to legislate Corporate Social Responsibility (CSR) in some of these countries in order to bring about sustainable development. Yet, it is this legislation, which is debated among many others. This book provides its readers with a comprehensive interpretation of the various CSR perspectives in emerging economies through academic research and case studies from practice. It not only points out the challenges, the debates, but also the dynamics of implementation and the impact of such CSR spent. This book therefore is targeted both towards academics as well as practitioners in an attempt to bring about an active academic-industry interface as CSR as a management function is part of dynamic social science.
