Report on the Statistics of Labor Massachusetts. Department of Labor and Industries. Division of Statistics,1915

Production and Capital Kenneth Joseph Arrow,1985 Unlike the papers of some other great economists, those of Kenneth Arrow are being read and studied today with even greater care and attention than when they first appeared in the journals. The publication of his collected papers will therefore be welcomed by economists and other social scientists and in particular by graduate students, who can draw from them the deep knowledge and the discernment in selection of scientific problems that only a master can offer. The author has added headnotes to certain well-known papers, describing how he came to write them. The study of production is central to economic theory, and capital and its accumulation are two of the most interesting aspects of the modern production process. Capital may take the form of inventories of inputs, inventories of outputs, or machines and other fixed goods. The essential and unique aspect of all types of capital is that it must be accumulated as the result of prior stages of the production process. This gives the dynamic theory of production a recursive structure that can be exploited by economic analysis. The optimization of production under recursive conditions lends itself to general mathematical methods of dynamic programming and optimal control theory. This is the main theme of the essays included in this fifth volume of Kenneth Arrow's Collected Papers.

Converged Communications Erkki Koivusalo,2022-10-19 CONVERGED COMMUNICATIONS A one-of-a-kind exploration of the past, present, and future of telecommunications In Converged Communications: Evolution from Telephony to 5G Mobile Internet, telecommunications industry veteran Erkki Koivusalo delivers an essential reference describing how different communications systems work, how they have evolved from fixed telephone networks to the latest 5G mobile systems, and how the voice and data services converged. The central theme of the book is to build deeper understanding about incremental technological progress by introducing both state of the art and their predecessor technologies. The book explores four main areas, including fixed telephone systems, data communication systems, mobile cellular systems, and IP multimedia systems. It clearly explains architectures, protocols, and functional procedures, and discusses a variety of topics ranging from physical layer processes to system level interactions. Converged Communications offers: In-depth treatments of fixed telephone and transmission systems, including operation of telephone exchanges and signaling systems Comprehensive explorations of data communication systems, including transmission of data over telephone lines and data network technologies, such as Ethernet and TCP/IP Incisive discussions of mobile cellular systems, including GSM, 3G, LTE, VoLTE and 5G Insightful analysis of incremental system evolution to justify various design choices made The book is supported with extensive online appendices, which covers communication system concepts, an overview of standardization, various technologies used in the past, state-of-the art technologies such as WLAN, cable modems, and FTTx, complementing the other systems described in the book which have evolved from the fixed telephone network. Perfect for network operators, system integrators, and communication system vendors, Converged Communications: Evolution from Telephony to 5G Mobile Internet will also earn a place in the libraries of undergraduate and graduate students studying telecommunications and mobile systems. Constructive comments and improvement proposals about Converged Communications or its online appendices can be sent by email to address converged.communications.book@gmail.com. The feedback will be considered for possible new editions of the book or the revisions of the appendices.

Essays on Lexicon, Lexicography, Terminography in Russian, American and Other Cultures Olga Karpova,Faina Kartashkova,2009-03-26 The book contains a collection of works devoted to the most topical issues of modern linguistics, including cross-cultural communication, various aspects of theoretical and practical lexicography, terminology and terminography. Papers contributed are divided into four major sections. Cultural Aspects in Different Linguistic and Lexicographic Traditions deals with analysis of cultural aspects of language and lexicography with special reference to English, Russian, German, French, Arabic and other languages. User's Perspective and Dictionary Use is devoted to discussion of research results in the field of user's needs and demands received during social surveys in different countries. Terminology and Terminography reveals the latest tendencies in modern terminology formation, scientific knowledge engineering in languages for special purposes and professional communication, while New Dictionaries Projects presents models of new reference works. All those and many other topics were discussed at the VI-th International School-Seminar Lexicon, Lexicography, Terminography in Russian, American and Other Cultures held at Ivanovo State University, Russia, September
