 universities in the United States have greatly expanded their patenting and
 licensing activities. The Congressional Joint Economic Committee, among other
 authorities, have argued that this surge contributed to the economic boom of
 the 1990s. And, many observers have attributed this trend to the Bayh-Dole
 Act of 1980. Using quantitative analysis and detailed case studies, this book
 tests that conventional wisdom and assesses the effects of the Act, examining
 the diverse channels through which commercialization has occurred over the
 20th century and since the passage of the Act.
