*Sexual Reproduction in Animals and Plants* Hitoshi

Sawada,Naokazu Inoue,Megumi Iwano,2014-02-07 This book contains the proceedings of the International Symposium on the Mechanisms of Sexual Reproduction in Animals and Plants, where many plant and animal reproductive biologists gathered to discuss their recent progress in investigating the shared mechanisms and factors involved in sexual reproduction. This now is the first book that reviews recent progress in almost all fields of plant and animal fertilization. It was recently reported that the self-sterile mechanism

of a hermaphroditic marine invertebrate (ascidian) is very similar to the self-incompatibility system in flowering plants. It was also found that a male factor expressed in the sperm cells of flowering plants is involved in gamete fusion not only of plants but also of animals and parasites. These discoveries have led to the consideration that the core mechanisms or factors involved in sexual reproduction may be shared by animals, plants and unicellular organisms. This valuable book is highly useful for reproductive biologists as well as for biological scientists outside this field in understanding the current progress of reproductive biology.

**Pressure Vessel And Piping Technology – Proceedings Of The Seminar** John Shing Tai Cheung,Lin Seng Ong,1993-05-11 This last decade has seen remarkable growth in the Asian Pacific region in the off-shore oil, petrochemical, power and process industries and the rapid change in these fields requires constant updating and reappraisal of the available and new technologies. The proceedings of the seminar will contain papers from representatives from many countries to address current technological issues and discuss engineering development and operating experiences. The proceedings will therefore greatly benefit those who wish to learn about the new developments in the areas of application of pressure vessels and piping technology.
