Condensed Systems of Low Dimensionality J.L.
Beeby, P.K. Bhattacharya, P.Ch. Gravelle, F.
Koch, D.J. Lockwood, 2012-12-06 The NATO Special
Programme Panel on Condensed Systems of Low
Dimensionality began its work in 1985 at a time of
considerable activity in the field. The Panel has
since funded many Advanced Research Workshops,
Advanced Study Institutes, Cooperative Research
Grants and Research Visits across the breadth of
its remit, which stretches from self-organizing
organic molecules to semiconductor structures
having two, one and zero dimensions. The funded
activities, especially the workshops, have allowed
researchers from within NATO countries to exchange
ideas and work together at a period of development
of the field when such interactions are most
valuable. Such timely support has undoubtedly
assisted the development of national programs,
particularly in the countries of the alliance
wishing to strengthen their science base. A
closing Workshop to mark the end of the Panel's
activities was organized in Marmaris, Turkey from
April 23-27, 1990, with the same title as the
Panel: Condensed systems of Low Dimensionality.
This volume contains papers presented at that
meeting, which sought to bring together chemists,

physicists and engineers from across the spectrum of the Panel's activities to discuss topics of current interest in their special fields and to exchange ideas about the effects of low dimensionality. As the following pages show, this is a topic of extraordinary interest and challenge which produces entirely new scientific phenomena, and at the same time offers the possibility of novel technological applications.
