The Southern Version of Cursor Mundi Vol I: Lines 1-9228
Sarah M. Horrall,1978 The medieval poem Cursor Mundi is a biblical verse account of the history of the world, offering a

chronological overview of salvation history from Creation to Doomsday. Originating in northern England around the year 1300, the poem was frequently copied in the north before appearing in a southern version in substantially altered form. Although it is a storehouse of popular medieval biblical lore and a fascinating study in the eclectic use of more than a dozen sources, the poem has until now attracted little scholarly attention. This five-part collaborative edition presents the Arundel version of the poem with variants from three others. In addition, it provides a discussion of sources and analogues, detailed explanatory notes, and a bibliography. Published in English.

Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. Additionally, many universities and educational institutions have their own digital libraries

that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
