Death or Deliverance Teresa Iacobelli,2013-08-27 Soldiers found guilty of desertion or cowardice during the Great War faced death by firing squad. Novels, histories, movies, and television series often depict courts martial as brutal and inflexible, and social memories of this system of frontline justice have inspired modern movements to seek pardons for soldiers executed on the battlefield. In this powerful and moving book, Teresa Iacobelli looks beyond stories of callous generals and quick executions to consider the

trials of nearly two hundred soldiers who were sentenced to death but spared by a disciplinary system capable of thoughtful review and compassion. By bringing to light these men's experiences, *Death or Deliverance* reconsiders an important chapter in the history of both a war and a nation.

*Effective Surveillance for Homeland Security*

Francesco Flammini,Roberto Setola,Giorgio Franceschetti,2013-06-10 *Effective Surveillance for Homeland Security: Balancing Technology and Social Issues* provides a comprehensive survey of state-of-the-art methods and tools for the surveillance and protection of citizens and critical infrastructures against natural and deliberate threats. Focusing on current technological challenges involving multi-disciplinary problem analysis and systems engineering approaches, it provides an overview of the most relevant aspects of surveillance systems in the framework of homeland security. Addressing both advanced surveillance technologies and the related socio-ethical issues, the book consists of 21 chapters written by international experts from the various sectors of homeland security. Part I, *Surveillance and Society*, focuses on the societal dimension of surveillance—stressing the importance of societal acceptability as a precondition to any surveillance system. Part II, *Physical and Cyber*

Surveillance, presents advanced technologies for surveillance. It considers developing technologies that are part of a framework whose aim is to move from a simple collection and storage of information toward proactive systems that are able to fuse several information sources to detect relevant events in their early incipient phase. Part III, Technologies for Homeland Security, considers relevant applications of surveillance systems in the framework of homeland security. It presents real-world case studies of how innovative technologies can be used to effectively improve the security of sensitive areas without violating the rights of the people involved. Examining cutting-edge research topics, the book provides you with a comprehensive understanding of the technological, legislative, organizational, and management issues related to surveillance. With a specific focus on privacy, it presents innovative solutions to many of the issues that remain in the quest to balance security with the preservation of privacy that society demands.

Specular Gloss Raimo Silvennoinen, Kai-Erik Peiponen, Kari Myller, 2010-07-07 The aesthetic appearance of various objects is important to human beings. One measure of the quality of an object is its surface quality, which can be characterized with the concept of gloss. Nowadays measurement of the gloss is a routine off-line method in assessment of quality of product at various sectors of industry. The book gives a fresh treatment on the concept of gloss.

Theoretical description will be on more general basis of optical physics than in other sources. The text will give a modern treatise of machine vision based glossmeters and furnish the ideas how to measure and analyse gloss from complex-structured objects. Innovations of machine vision and gloss data analysis by embedded micro-controllers and microprocessors are trademarks that fill the gaps of older textbooks. Key Features: - modern treatment of gloss - presents novel glossmeter based high technology - completes principle of machine vision - application in industrial environment - emphasis on pedagogical presentation - modern treatment of gloss - describes novel glossmeter-based high technology - presents principles of machine vision - gives applications in industrial environment - emphasis on pedagogical presentation
