Technical Tables for Schools and Colleges C. W. Schofield, 2014-05-09 Technical Tables for Schools and Colleges contains tables of various mathematical functions for high school and college students. This book presents data concerning logarithms, antilogarithms, exponential and hyperbolic functions, arithmetical, financial, and trigonometrical tables, as well as mensuration and metric values. Other data provided include solution of triangles, moment of inertia, areas of circles, British, metric and M.K.S. units, and table of atomic weights.
Completeness of Root Functions of Regular Differential Operators Sasun Yakubov, 1993-12-20 The precise mathematical investigation of various natural phenomena is an old and difficult problem. This book is the first to deal systematically with the general non-selfadjoint problems in mechanics and physics. It deals mainly with bounded domains with smooth boundaries, but also considers elliptic boundary value problems in tube domains, i.e. in non-smooth domains. This volume will be of particular value to those working in differential equations, functional analysis, and equations of mathematical physics.
