EU Cartel Enforcement Andreas Scordamaglia-Tousis,2013-08-01 There has a been a long-standing debate on the compatibility of EU competition law with fundamental rights protection, particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights (ECHR). This book, a signal contribution to that debate, assesses two questions of paramount concern: first, whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards; and second, how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved. Following a detailed survey of relevant EU institutional, substantive, and procedural law rules, the author offers a set of persuasive normative responses to both questions. Proceeding from an in-depth analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law, the author goes on to examine such elements of the perceived incompatibility as the following: investigatory powers vested in competition authorities; the privilege against self-incrimination; right to privacy; “fair trial” probatory requirements; degree of use of presumptions in EU practice; Article 6 ECHR guarantees pertaining to the presumption of innocence; proving coordination of competitive behaviour; proving restriction of competition; admissibility of evidence before EU Courts and the Commission; assessment of the attribution of liability rules; EU fining rules; judicial review of cartel decisions by EU Courts; and national sanctioning rules. The author’s extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists (in addition to books and articles) newspaper articles, EU regulations and directives, soft-law guidelines and “best practices”, EU and ECtHR case law, EU Advocate General opinions, European Commission decisions, and European Ombudsman decisions. General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings. Few books have taken such a thorough and far-reaching approach to the reconciliation of “effective public enforcement” and “fundamental rights”, or of “effective deterrence” with the principles of legality, non-retroactivity, presumption of innocence, and ne bis in idem. In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective, the book is without peers. It will be warmly welcomed by any parties interested in the intersection of competition law and human rights.

Global Atmospheric and Oceanic Modelling Andrew N. Staniforth,2022-04-28 Combining rigorous theory with practical application, this book provides a unified and detailed account of the fundamental equations governing atmospheric and oceanic fluid flow on which global, quantitative models of weather and climate prediction are founded. It lays the foundation for more accurate models by making fewer approximations and imposing dynamical and thermodynamical consistency, moving beyond the assumption that the Earth is perfectly spherical. A general set of equations is developed in a standard notation with clearly stated assumptions, limitations, and important properties. Some exact, non-linear solutions are developed to promote further understanding and for testing purposes. This book contains a thorough consideration of the fundamental equations for atmospheric and oceanic models, and is therefore invaluable to both theoreticians and numerical modellers. It also stands as an accessible source for reference purposes.
