*Control Theory Applications for Dynamic Production Systems* Neil A. Duffie,2022-06-08 Control Theory Applications for Dynamic Production Systems Apply the fundamental tools of linear control theory to model, analyze, design, and understand the behavior of dynamic production systems In Control Theory Applications for Dynamic Production Systems: Time and Frequency Methods for Analysis and Design, distinguished manufacturing engineer Dr. Neil A. Duffie delivers a comprehensive explanation of how core concepts of control theoretical analysis and design can be applied to production systems. Time-based perspectives on response to turbulence are augmented by frequency-based perspectives, fostering new understanding and guiding design of decision-making. The time delays intrinsic to decision making and decision implementation in production systems are addressed throughout. Readers will discover methods for calculating time response and frequency response, modeling using transfer functions, assessing stability, and design of decision making for closed-loop production systems. The author has included real-world examples emphasizing the different components of production systems and illustrating how practical results can be quickly obtained using straightforward Matlab programs (which can easily be translated to other platforms). Avoiding unnecessary theoretical jargon, this book fosters an in-depth understanding of key tools of control system engineering. It offers: A thorough introduction to core control theoretical concepts of analysis and design of dynamic production systems Comprehensive and integrated explorations of continuous-time and discrete-time models of production systems, employing transfer functions and block diagrams Practical discussions of time response, frequency response, fundamental dynamic behavior, closed-loop production systems, and the design of decision-making In-depth examples of the analysis and design of complex dynamic behavior requiring approaches such as matrices of transfer functions and modeling of multiple sampling rates Perfect for production, manufacturing, industrial, and control system engineers, Control Theory Applications for Dynamic Production Systems will also earn a place in the libraries of students taking advanced courses on industrial system digitalization, dynamics, and design.

The Role of Corpus Linguistics in the Ethnography of a Closed Community Kieran Harrington,2018-03-13 The Role of Corpus Linguistics in the Ethnography of a Closed Community analyses the interactions of immigrants within an Irish reception centre for asylum seekers to highlight the instinctive resourcefulness of people who are faced with the challenge of communicating when there is no common language or culture. Based on three years of ethnographical observation and using an illuminating and innovative blending of applied

methodologies, chiefly corpus linguistics, ethnography and conversation analysis, this book: Draws upon a corpus of 98,000 words; Examines the use of English in the interactions of residents with one another and those with English speaking staff of the centre; Challenges constructs such as speech community, communicative competence and interlanguage. This book is essential reading for academics and upper-level undergraduates or graduates working in the areas of Corpus Linguistics and Applied Linguistics, and those interested in research methodologies. It will also prove to be of significant interest to people interested in migration studies and to providers of English language education to immigrants.
