Spells, Images, and Mandalas Koichi Shinohara,2014-08-05 Koichi Shinohara traces the evolution of Esoteric Buddhist rituals from the simple recitation of spells in the fifth century to complex systems involving image worship, mandala initiation, and visualization practices in the ninth century. He presents an important new reading of a seventh-century Chinese text called the Collected Dharani Sutras, which shows how earlier rituals for specific deities were synthesized into a general Esoteric initiation ceremony and how, for the first time, the notion of an Esoteric Buddhist pantheon emerged. In the Collected Dharani Sutras, rituals for specific deities were typically performed around images of the deities, yet Esoteric Buddhist rituals in earlier sources involved the recitation of spells rather than the use of images. The first part of this study explores how such simpler rituals came to be associated with the images of specific deities and ultimately gave rise to the general Esoteric initiation ceremony described in the crucial example of the All-Gathering mandala ritual in the Collected Dharani Sutras. The visualization practices so important to later Esoteric Buddhist rituals were absent from this ceremony, and their introduction would fundamentally change Esoteric Buddhist practice. This study examines the translations of dharani sutras made by Bodhiruci in the early eighth century and later Esoteric texts, such as Yixing's commentary on the Mahavairocana sutra and Amoghavajra's ritual manuals, to show how incorporation of visualization greatly enriched Esoteric rituals and helped develop elaborate iconographies for the deities. Over time, the ritual function of images became less certain, and the emphasis shifted toward visualization. This study

clarifies the complex relationship between images and ritual, changing how we perceive Esoteric Buddhist art as well as ritual.

Esoteric Pure Land Buddhism Aaron P. Proffitt, 2023 What, if anything, is Esoteric Pure Land Buddhism? In 1224, the medieval Japanese scholar-monk Dohan (1179-1252) composed *The Compendium on Esoteric Mindfulness of Buddha* (Himitsu nenbutsu sho), which begins with another seemingly simple question: Why is it that practitioners of mantra and meditation rely on the recitation of the name of the Buddha Amitabha? To answer this question, Dohan explored diverse areas of study spanning the whole of the East Asian Mahayana Buddhist tradition. Although contemporary scholars often study Esoteric Buddhism and Pure Land Buddhism as if they were mutually exclusive, diametrically opposed, schools of Buddhism, in the present volume Aaron Proffitt examines Dohan's *Compendium* in the context of the eastward flow of Mahayana Buddhism from India to Japan and uncovers Mahayana Buddhists employing multiple, overlapping, so-called esoteric approaches along the path to awakening. Proffitt divides his study into two parts. In Part I he considers how early Buddhologists, working under colonialism, first constructed Mahayana Buddhism, Pure Land Buddhism, and Esoteric Buddhism as discrete fields of inquiry. He then surveys the flow of Indian Buddhist spells, dharaṇi, and mantra texts into China and Japan and the diverse range of Buddhist masters who employed these esoteric techniques to achieve rebirth in Sukhavati, the Pure Land of Bliss. In Part II, he considers the life of Dohan and analyzes the monk's comprehensive view of buddhanusmṛti as a form of ritual technology that unified body and mind, Sukhavati as a this-worldly or other-worldly soteriological goal synonymous with nirvana itself, and the Buddha Amitabha as an object of devotion beyond this world of suffering. The work concludes with the first full translation of Dohan's *Himitsu nenbutsu sho* into a modern language--

Selection Methods in Plant Breeding Izak Bos,Peter Caligari,2013-11-21 Our requirement for plant breeders to be successful has never been greater. However one views the forecasted numbers for future population growth we will need, in the immediate future, to be feeding, clothing and housing many more people than we do, inadequately, at present. Plant breeding represents the most valuable strategy in increasing our productivity in a way that is sustainable and environmentally sensitive. Plant breeding can rightly be considered as one of the oldest multidisciplinary subjects that is known to humans. It was practised by people who first started to carry out a settled form of agriculture. The art, as it must have been at that stage, was applied without any formal underlying framework, but achieved dramatic results, as witnessed by the forms of cultivated plants we have today. We are now learning how to apply successfully the results of yet imperfect scientific knowledge. This knowledge is, however, rapidly developing, particularly in areas of tissue culture, biotechnology and molecular biology. Plant breeding's inherent multifaceted nature means that alongside obvious subject areas like genetics we also need to consider areas such as: statistics, physiology, plant pathology,

entomology, biochemistry, weed science, quality, seed characteristics, reproductive biology, trial design, se lection and computing.

Number Theory W.A. Coppel, 2009-10-03 Number Theory is more than a comprehensive treatment of the subject. It is an introduction to topics in higher level mathematics, and unique in its scope; topics from analysis, modern algebra, and discrete mathematics are all included. The book is divided into two parts. Part A covers key concepts of number theory and could serve as a first course on the subject. Part B delves into more advanced topics and an exploration of related mathematics. The prerequisites for this self-contained text are elements from linear algebra. Valuable references for the reader are collected at the end of each chapter. It is suitable as an introduction to higher level mathematics for undergraduates, or for self-study.
