Air Pollution Anca Moldoveanu,2011-09-06 Today, an  
 important issue is environmental pollution, especially air  
 pollution. Due to pollutants present in air, human health as well  
 as animal health and vegetation may suffer. The book can be  
 divided in two parts. The first half presents how the  
 environmental modifications induced by air pollution can have an  
 impact on human health by inducing modifications in different  
 organs and systems and leading to human pathology. This part  
 also presents how environmental modifications induced by air  
 pollution can influence human health during pregnancy. The  
 second half of the book presents the influence of environmental  
 pollution on animal health and vegetation and how this impact  
 can be assessed (the use of the micronucleus tests on  
 TRADESCANTIA to evaluate the genotoxic effects of air pollution,  
 the use of transplanted lichen PSEUDEVERNIA FURFURACEA for  
 biomonitoring the presence of heavy metals, the monitoring of  
 epiphytic lichen biodiversity to detect environmental quality and  
 air pollution, etc). The book is recommended to professionals  
 interested in health and environmental issues.
