Handbook of Research on Strategic Fit and Design in Business Ecosystems Hacıoglu, Umit, 2019-08-30 With advancing information technology, businesses must adapt to more efficient structures that utilize the latest in robotics and machine learning capabilities in order to create optimal human-robot cooperation. However, there are vital rising concerns regarding the possible consequences of deploying artificial intelligence, sophisticated robotic technologies, automated vehicles, self-managing supply modes, and blockchain economies on business performance and culture, including how to sustain a supportive business culture and to what extent a strategic fit between human-robot collaboration in a business ecosystem can be created. The Handbook of Research on Strategic Fit and Design in Business Ecosystems is a collection of innovative research that builds a futuristic view of evolving business ecosystems and a deeper understanding of business transformation processes in the new digital business era. Featuring research on topics such as cultural hybridization, Industry 4.0, and cybersecurity, this book is ideally designed for entrepreneurs, executives, managers, corporate strategists, economists, IT specialists, IT consultants, engineers, students, researchers, and academicians seeking to improve their understanding of future competitive business practices with the adoption of robotic and information technologies.

Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration (1200-900 BCE) Maria Grazia Masetti-Rouault,Ilaria Calini,Robert Hawley,Lorenzo d'Alfonso,2024-05-07 New

results and interpretations challenging the notion of a uniform, macroregional collapse throughout the Late Bronze Age Eastern Mediterranean Ancient Western Asia Beyond the Paradigm of Collapse and Regeneration (1200–900 BCE) presents select essays originating in a two-year research collaboration between New York University and Paris Sciences et Lettres. The contributions here offer new results and interpretations of the processes and outcomes of the transition from the Late Bronze Age to the Iron Age in three broad regions: Anatolia, northern Mesopotamia, and the Levant. Together, these challenge the notion of a uniform, macroregional collapse throughout the Eastern Mediterranean, followed by the regeneration of political powers. Current research on newly discovered or reinterpreted textual and material evidence from Western Asia instead suggests that this transition was characterized by a diversity of local responses emerging from diverse environmental settings and culture complexes, as evident in the case studies collected here in history, archaeology, and art history. The editors avoid particularism by adopting a regional organization, with the aim of identifying and tracing similar processes and outcomes emerging locally across the three regions. Ultimately, this volume reimagines the Late Bronze–Iron Age transition as the emergence of a set of recursive processes and outcomes nested firmly in the local cultural interactions of western Asia before the beginning of the new, unifying era of Assyrian imperialism.
