Computational and Quantitative Studies M.A.K. Halliday, 2004-12-23 This is a deeply impressive book by a prominent linguist. As always, Professor Halliday's contributions are pervasively readable and stimulating - Jan Svartvik, Emeritus Professor, Lund University, Sweden. Throughout his career, Professor Halliday has continued to address the issue of the application of linguistic scholarship to Computational and Quantitative Studies. The sixth volume in the collected works of Professor M. A. K. Halliday includes works that span the last five decades, covering developments in machine translation and corpus linguistics. The principles and methods outlined in these papers remain as relevant today as when they were first published, continuing to point the way forward in an endeavour where success depends more on advancing our knowledge of language than machines.

Techniques of Description Gwyneth Fox, Michael Hoey, John M. Sinclair, 2004-01-14 This book is a tribute to Malcolm Coulthard, who has been remarkably active and influential across a wide range of

English Language Studies. He is particularly well-known for his pioneering work in spoken and written discourse analysis and most recently, for his work in forensic linguistics. This collection of specially commissioned, state-of-the-art pieces by leading international linguists is dedicated to the man and his achievements and provides a showcase for the most exciting developments in applied discourse studies. All the papers share common assumptions about language study: that descriptions should be data-based, data-tested and replicable. The collection as a whole contains original and important new research on descriptions, with intriguing applications to forensic, gender and literary studies.
