Economic Diplomacy and the Origins of the Second World War David E Kaiser,2015-12-08 Although the political and military aspects of great-power diplomacy in Eastern Europe during the interwar period have been studied extensively, the economic aspects have been relatively neglected. Drawing on documentary material that has only recently been made available, David Kaiser redresses the balance in his discussion of the expansion of German trade with Eastern Europe during the 1930s and the British and French failure to respond to it. Originally published in 1981. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Climate Change Management Thi Thu Huong Ha,2018-02-13 This book focuses on special issues of climate change management in Asia. It discusses the challenges of climate change governance, and examines the impact of climate change on agriculture and food security. The author includes a rare work relating to a new dimension of climate change management—environmental knowledge management. The book also touches another special topic relating to climate change, legal issues in the maritime sector. Is the current maritime legal framework effective in preventing harms to the environment still a big question? How the legal industry in Malaysia responds to climate change is also examined in this volume. Finally, the agriculture sector in Japan investigates whether the adaptive method of introducing high-temperature tolerant varieties and the mitigation strategy affect the product price of rice. Overall, robust strategies, plans, and policies are required to provide directions to stakeholders so that they can effectively and efficiently respond to climate change challenges.
