The International Transmission of Inflation Michael R. Darby, James R. Lothian, Arthur E. Gandolfi, Anna J. Schwartz, 2008-04-15 Inflation became the dominant economic, social, and political problem of the industrialized West during the 1970s. This book is about how the inflation came to pass and what can be done about it. Certain to provoke controversy, it is a major source of new empirical information and theoretical conclusions concerning the causes of international inflation. The authors construct a consistent data base of information for eight countries and design a theoretically sound model to test and evaluate competing hypotheses incorporating the most recent theoretical developments. Additional chapters address an impressive variety of issues that complement and corroborate the core of the study. They answer such questions as these: Can countries conduct an independent monetary policy under fixed exchange rates? How closely tied are product prices across countries? How are disturbances transmitted across countries? The International Transmission of Inflation is an important contribution to international monetary economics in furnishing an invaluable empirical foundation for future investigation and discussion.

Finance and Development Alberto Giovannini,1993-03-25 Progress towards economic and monetary union in Western Europe has highlighted the importance of regional policies, while events in Eastern Europe have focused attention on the role of finance in development and may lead to a substantial diversion of capital flows. This volume from the Centre for Economic Policy Research addresses the relationships between growth, convergence, and capital market imperfections. Theoretical papers shed light on the debates over the role of

financial structure in economic development and the scope for government intervention to promote regional development. Highly topical empirical papers examine the relationship between international lending and economic development in a historical perspective; the experience of regional policies in the European Community, and of financial liberalization in high-growth East Asian economies; and the development of financial markets in Eastern Europe.
