**Foundations of Data Science** Avrim Blum, John Hopcroft, Ravindran Kannan, 2020-01-23 This book provides an introduction to the mathematical and algorithmic foundations of data science, including machine learning, high-dimensional geometry, and analysis of large networks. Topics include the counterintuitive nature of data in high dimensions, important linear algebraic techniques such as singular value decomposition, the theory of random walks and Markov chains, the fundamentals of and important algorithms for machine learning, algorithms and analysis for clustering, probabilistic models for large networks, representation learning including topic modelling and non-negative matrix factorization, wavelets and compressed sensing. Important probabilistic techniques are developed including the law of large numbers, tail inequalities, analysis of random projections, generalization guarantees in machine learning, and moment methods for analysis of phase transitions in large random graphs. Additionally, important structural and complexity measures are discussed such as matrix norms and VC-dimension. This book is suitable for both undergraduate and graduate courses in the design and analysis of algorithms for data.

**Eat Rich, Live Long** Ivor Cummins, 2018-02-27 You can take control of your health, lose weight, prevent disease, and enjoy a long and healthy life. The unique nutritional program outlined in Eat Rich, Live Long is designed by experts to help you feel great while you eat delicious and satisfying foods. Millions of people have gotten healthy through low-carb plans over the years—and a growing number have discovered the wonderful benefits of ketogenic (keto) nutrition. Many are confused, though, about how low-carb they should go. Now, Eat Rich, Live Long reveals how mastering the low-carb/keto spectrum can maximize your weight loss and optimize your health for the long term. In this book, Ivor Cummins, a world-class engineer and technical master for a huge global tech corporation, and Dr. Jeff Gerber, a family doctor who is widely regarded as a global leader in low-carb nutrition, team up to present their unique perspectives from their extensive clinical, medical, and scientific/research experience. Together, Cummins and Gerber crack the code that shows you how to eat the foods you enjoy, lose weight, and regain robust health. They reveal how the nutritional “experts” have gotten it so wrong for so long by demonizing healthy natural fats in our diets and focusing on cholesterol and LDL as the villains. In fact, as the authors reveal by drawing on the latest peer-reviewed global research, eating a high percentage of natural fats, a moderate amount of protein, and a low percentage of carbs can help you lose weight, prevent disease, satisfy your appetite, turn off your food cravings, and live longer. The heart of Eat Rich, Live Long is the book’s prescriptive program, which includes a seven-day eating plan, a fourteen-day eating plan, and more than fifty gourmet-quality low-carb, high-fat recipes—illustrated with gorgeous full-color photographs—for breakfasts, lunches, appetizers, snacks, dinners, drinks, and desserts. Low-carb never tasted so good! Nutritional sacred cows are constantly being challenged in the media. How much fat should we eat—and which kinds of fats are best? Which fats can contribute to diabetes, heart disease, and early mortality? Does a high-protein diet increase muscle mass and lead to vigorous health—or can it promote aging, cancer, and early mortality? Which vitamins and minerals should we be taking, if any? How do we change our metabolism so that our bodies burn fat instead of all the sugars we consume? Does intermittent fasting really work? Eat Rich, Live Long lays out the truth based on the latest scientific research, and it will change the way you look at eating. Meanwhile you will lose weight—and look and feel great.

**Gravitational Force of the Sun** Pari Spolter, 2014-12-01 The correct interpretation of Kepler's third law is Gravitational force is equal to acceleration times the area:  $F = a \cdot A$ . It is shown that the sequential mean distances of the planets from the center of the sun follow an exponential law, concluding that gravitation is quantized. New explanation and equation for eccentricity are presented. English translation of Foucault's papers on the pendulum and on the gyroscope

**The American Yawp** Joseph L. Locke,Ben Wright,2019-01-22 I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world.—Walt Whitman, Song of Myself, Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates

diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of *The American Yawp* will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. *The American Yawp* traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, *The American Yawp* gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

**The New Americans** National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Population, Panel on the Demographic and Economic Impacts of Immigration, 1997-11-14 This book sheds light on one of the most controversial issues of the decade. It identifies the economic gains and losses from immigration—for the nation, states, and local areas—and provides a foundation for public discussion and policymaking. Three key questions are explored: What is the influence of immigration on the overall economy, especially national and regional labor markets? What are the overall effects of immigration on federal, state, and local government budgets? What effects will immigration have on the future size and makeup of the nation's population over the next 50 years? *The New Americans* examines what immigrants gain by coming to the United States and what they contribute to the country, the skills of immigrants and those of native-born Americans, the experiences of immigrant women and other groups, and much more. It offers examples of how to measure the impact of immigration on government revenues and expenditures—estimating one year's fiscal impact in California, New Jersey, and the United States and projecting the long-run fiscal effects on government revenues and expenditures. Also included is background information on immigration policies and practices and data on where immigrants come from, what they do in America, and how they will change the nation's social fabric in the decades to come.

**Breaking Free** Herschel Walker, 2009-01-13 Presents the life of the Heisman trophy winner, discussing his impoverished childhood, his development as a teenage athlete, his college and NFL professional career, his success as a businessman, and his diagnosis and treatment for dissociative identity disorder.

**French Rococo Ébénisterie in the J. Paul Getty Museum** Gillian Wilson, Arlen Heginbotham, 2021-03-30 The first comprehensive catalogue of the Getty Museum's significant collection of French Rococo ébénisterie furniture. This catalogue focuses on French ébénisterie furniture in the Rococo style dating from 1735 to 1760. These splendid objects directly reflect the tastes of the Museum's founder, J. Paul Getty, who started collecting in this area in 1938 and continued until his death in 1976. The Museum's collection is particularly rich in examples created by the most talented cabinet masters then active in Paris, including Bernard van Risenburgh II (after 1696–ca. 1766), Jacques Dubois (1694–1763), and Jean-François Oeben (1721–1763). Working for members of the French royal family and aristocracy, these craftsmen excelled at producing veneered and marquetry pieces of furniture (tables, cabinets, and chests of drawers) fashionable for their lavish surfaces, refined gilt-bronze mounts, and elaborate design. These objects were renowned throughout Europe at a time when Paris was considered the capital of good taste. The entry on each work comprises both a curatorial section, with description and commentary, and a conservation report, with construction diagrams. An introduction by Anne-Lise Desmas traces the collection's acquisition history, and two technical essays by Arlen Heginbotham present methodologies and findings on the analysis of gilt-bronze mounts and lacquer. The free online edition of this open-access publication is available at [www.getty.edu/publications/rococo/](http://www.getty.edu/publications/rococo/) and includes zoomable, high-resolution photography. Also available are free PDF, EPUB, and Kindle/MOBI downloads of the book, and JPG downloads of the main catalogue images.

*Gerontological Nursing: Competencies for Care* Kristen L. Mauk,2010-10-25 Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. *Gerontological Nursing: Competencies for Care*, Second Edition is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

**My Thoughts** Charles de Secondat baron de Montesquieu,2012 *My Thoughts* provides a unique window into the mind of one of the undisputed pioneers of modern thought, the author of the 1748 classic, *The Spirit of the Laws*. From the publication in 1721 of his first masterpiece, *Persian Letters*, until his death in 1755, Montesquieu maintained notebooks in which he wrote and dictated ideas on a wide variety of topics. Some of the contents are early drafts of passages that Montesquieu eventually placed in his published works; others are outlines or early versions of projected works that were ultimately lost, unfinished, or abandoned. These notebooks provide important insights into his views on a broad range of topics, including morality, religion, history, law, economics, finance, science, art, and constitutional liberty. Montesquieu called these notebooks *Mes Pensées* (My Thoughts), and they appear in their entirety in English for the first time in this Liberty Fund edition. Editor and translator Henry C. Clark provides readers with translations of most of the footnotes contained in the 1991 French edition by Louis Desgraves, while adding new notes, a bibliography, and other aids to understanding the text and translation. These features provide the frame for a revealing portrait of one of the most influential figures of the eighteenth century. Henry C. Clark is a Visiting Professor in the Political Economy Project at Dartmouth College. He has written two books and numerous articles, mainly on the French and Scottish Enlightenments.
