The Road to Charleston John Buchanan,2019-03-26 In *The Road to Guilford Courthouse*, one of the most acclaimed military histories of the Revolutionary War ever written, John Buchanan explored the first half of the critical Southern Campaign and introduced readers to its brilliant architect, Major General Nathanael Greene. In this long-awaited sequel, Buchanan brings this story to its dramatic conclusion. Greene's Southern Campaign was the most difficult of the war. With a supply line stretching hundreds of miles northward, it revealed much about the crucial military art of provision and transport. Insufficient manpower a constant problem, Greene attempted to incorporate black regiments into his army, a plan angrily rejected by the South Carolina legislature. A bloody civil war between Rebels and Tories was wreaking havoc on the South at the time, forcing Greene to address vigilante terror and restore civilian government. As his correspondence with Thomas Jefferson during the campaign shows, Greene was also bedeviled by the conflict between war and the rights of the people, and the question of how to set constraints under which a free society wages war. Joining Greene is an unforgettable cast of characters—men of strong and, at times, antagonistic personalities—all of whom are vividly portrayed. We also follow the fate of Greene's tenacious foe, Lieutenant Colonel Francis, Lord Rawdon. By the time the British evacuate Charleston—and Greene and his ragged, malaria-stricken, faithful Continental Army enter the city in triumph—the reader has witnessed in telling detail one of the most punishing campaigns of the Revolution, culminating in one of its greatest victories.

**Submarine Mass Movements and Their Consequences** Jacques Locat, Jürgen Mienert, 2003

Did you know that the Grand Bank earthquake of 1929 triggered a huge submarine mass movement which broke submarine cables over a distance of up to 1000 km from its source and generated a tsunami which devastated a small village in Newfoundland killing 27 people? The same happened in Papua New Guinea in 1998 with more than 2000 casualties. Submarine mass movements of various sizes and styles are reshaping the sea floor and are of concern for many facets of human activities both onshore and offshore. These include the development of natural resources, energy and communication transport, coastal infrastructures and communities. This book provides a world-wide perspective of submarine mass movements and their consequences. This has been made possible by assembling excellent contributions from active researchers, groups, or institutions, thus providing full coverage of the many scientific and engineering aspects of this type of marine and coastal geohazard. It covers fundamental as well as site specific studies from many areas including the Atlantic and Pacific oceans, inner seas like the Mediterranean Sea, and fjords using the most recent

technologies from multibeam sonar imaging techniques, 3D seismic analysis, slope stability analysis, to debris flow and tsunami modeling. Audience: This book is of interest to any researcher in the field of marine and coastal geo-hazards. It will be useful for planners, scientists and engineers involved in the development of offshore and near-shore resources and also to those in charge of the management and mitigation of coastal hazards. For graduate students, this book provides an up-to-date vision of the process of submarine mass movements and their consequences from both a scientific and an engineering standpoint, and it includes a unique collection of the existing literature on marine geo-hazards. CD-Rom included This volume contains a CD-Rom which in addition to an electronically searchable vers

The Future of Tradition Leon Shaskolsky Sheleff, 2013-09-05 Recent years have seen an increased interest in the variety of cultures co-existing within one state, and a growing acknowledgement of the values enshrined in pluralistic social structures. This book examines the manner in which indigenous people can function in modern states, preserving their traditional customs, while simultaneously adapting aspects of their culture to the challenges posed by modern life. Whereas it was formerly assumed that these tribal frameworks were doomed to extinction, and some states even encouraged such a process, there has been a revival in their vitality, linked to a recognition of their rights. The book offers a comprehensive survey of various aspects of tribal life, focusing on political issues such as the meaning of sovereignty, legal issues dealing with the role of custom and social issues concerned with sustaining communal life. A focused study is made of a whole series of legal factors, relating to possession and ownership of land, religious rites, the nature of polygamous marriages, the assertion of group rites, the manner of peacefully resolving disputes and allied questions. Recent judicial decisions are analysed as a reflection of the far-reaching

changes that have taken place, in a process that has seen the former disregard of basic rights of indigenous people being replaced by an awareness of the injustices perpetrated in the past and a willingness to seek to redress them. The comparison between approaches of different English-speaking countries provides an account of interwoven developments.

**Administrative Law and Judicial Review in Papua New Guinea** Christopher

Karaiye,2019-06-18 This is a compendium of administrative law and judicial review in Papua New Guinea. In this book the author precisely recounts the history of the development of administrative law and judicial review in England and some other common law jurisdictions. The main theme of the book is, however, devoted to judicial review in Papua New Guinea. The practice and procedure for appealing from the decision of the National Court in judicial review are unique and onerous. This book evaluates them in detail to give the readers a complete sense of reference. The interlocutory procedures encapsulated in this book are also relevant for any proceeding before the courts. At the end of various chapters, the author makes some insightful and thought-provoking commentaries on gaps found in judicial review. The book is an authoritative text for lawyers, law students, academia, judicial officers and other interested persons alike. It is a must read for lawyers and law students who seek to be familiar with the often cumbersome judicial review procedures and practices. For students and scholars in other disciplines who aim to learn and abreast themselves of how administrative law affects administrative action and public policy, this book is a perfect choice. The book dissects complex administrative law concepts and enables lay persons, including those in the public service, to fully understand and apply them. The book is a valuable resource material for the Pacific Island countries like Fiji, Vanuatu and Solomon Islands, who have adopted the common law

legal systems similar to Papua New Guinea. BOOK REVIEWS “The author collates, culls and compiles one important material for use by judicial officers and practitioners in the area of judicial review.” – Leslie Mamu, LL.B, Acting Public Solicitor, Papua New Guinea, 18 February 2018, Port Moresby, PNG “This welcome new book by Christopher Karaiye is essential reading for all lawyers practising in the busy area of Judicial Review in PNG and also students of the topic. It is a well-researched and presented work and will be a worthy addition to my administrative law library.” – Terry Lambert, LL.B, LL.M, Barrister (Queensland, Australia), Lawyer (PNG), Solicitor (England & Wales), 7 June 2018, Brisbane, Australia “The book “Administrative Law and Judicial Review in Papua New Guinea” is a must read for lawyers and public alike involved in the judicial review of administrative decisions. The book contains a comprehensive guide to an increasingly important yet quite complex area of law. The author draws from his own experience and research to make this important contribution to the development of Papua New Guinea’s expanding judicial review jurisprudence. This work is essential reading to understand the nuances involved in this area of law.” – Dr Vergil Narokobi, LL.B, LL.M, Ph.D, Counsel for the Papua New Guinea Ombudsman Commission & President of Papua New Guinea Law Society, 25 June 2018, Port Moresby, PNG “This work is of very high quality and would be a very valuable tool for judges, magistrates, lawyers, the academia, and people in decision-making positions in the public and the private sectors. I recommend the book to them. I am impressed with your comprehensive use of local case precedents and in-depth knowledge of the topics.” – Honourable Sir Gibbs Salika, KBE CSM OBE, Deputy Chief Justice of Papua New Guinea (as he then was), 4 July 2018, Port Moresby, PNG “An extensive, thought-provoking and easy to read compendium that makes accessible the law of Papua New Guinea on the topic of judicial review in its many guises.” – Emeritus Professor Tony Angelo (Victoria

University of Wellington), QC, 7 October 2018, Wellington, New Zealand

**White Fragility** Dr. Robin DiAngelo, 2018-06-26 The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this “vital, necessary, and beautiful book” (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and “allows us to understand racism as a practice not restricted to ‘bad people’ (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

**Uncontrolled** Jim Manzi, 2012-05-01 How do we know which social and economic policies work, which should be continued, and which should be changed? Jim Manzi argues that throughout history, various methods have been attempted -- except for controlled experimentation. Experiments

provide the feedback loop that allows us, in certain limited ways, to identify error in our beliefs as a first step to correcting them. Over the course of the first half of the twentieth century, scientists invented a methodology for executing controlled experiments to evaluate certain kinds of proposed social interventions. This technique goes by many names in different contexts (randomized control trials, randomized field experiments, clinical trials, etc.). Over the past ten to twenty years this has been increasingly deployed in a wide variety of contexts, but it remains the red-haired step child of modern social science. This is starting to change, and this change should be encouraged and accelerated, even though the staggering complexity of human society creates severe limits to what social science could be realistically expected to achieve. Randomized trials have shown, for example, that work requirements for welfare recipients have succeeded like nothing else in encouraging employment, that charter school vouchers have been successful in increasing educational attainment for underprivileged children, and that community policing has worked to reduce crime, but also that programs like Head Start and Job Corps, which might be politically attractive, fail to attain their intended objectives. Business leaders can also use experiments to test decisions in a controlled, low-risk environment before investing precious resources in large-scale changes -- the philosophy behind Manzi's own successful software company. In a powerful and masterfully-argued book, Manzi shows us how the methods of science can be applied to social and economic policy in order to ensure progress and prosperity.

**Concepts of Biology** Samantha Fowler, Rebecca Roush, James Wise, 2018-01-07 Concepts of

Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Indigenous Textual Cultures Tony Ballantyne, Lachy Paterson, Angela Wanhalla, 2020-08-10 As modern European empires expanded, written language was critical to articulations of imperial authority and justifications of conquest. For imperial administrators and thinkers, the non-literacy of "native" societies demonstrated their primitiveness and inability to change. Yet as the contributors to Indigenous Textual Cultures make clear through cases from the Pacific Islands, Australasia, North America, and Africa, indigenous communities were highly adaptive and created novel, dynamic literary practices that preserved indigenous knowledge traditions. The contributors illustrate how

modern literacy operated alongside orality rather than replacing it. Reconstructing multiple traditions of indigenous literacy and textual production, the contributors focus attention on the often hidden, forgotten, neglected, and marginalized cultural innovators who read, wrote, and used texts in endlessly creative ways. This volume demonstrates how the work of these innovators played pivotal roles in reimaging indigenous epistemologies, challenging colonial domination, and envisioning radical new futures. Contributors. Noelani Arista, Tony Ballantyne, Alban Bensa, Keith Thor Carlson, Evelyn Ellerman, Isabel Hofmeyr, Emma Hunter, Arini Loader, Adrian Muckle, Lachy Paterson, Laura Rademaker, Michael P.
