Climate Change and Tourism Susanne Becken, John E. Hay, 2012 The contribution of tourism to climate change and the likely effects of climate change on tourist destinations have been well reported and discussed, however there is a lack of evidence-based systematic advice as to how the industry should respond. This book addresses the gap between our increasing understanding of the drivers and consequences of climate change, and practical advice for mitigation and adaptation. This text acknowledges the importance of a sound conceptual understanding of climate change and considers how the industry might best respond. This approach relies upon the roles of supportive policies and institutions and is presented through critically assessed case studies from across the world. These examples support an overall framework which provides a methodology for translating adaptation and mitigation policies into practice.

Spirituality and Corporate Social Responsibility David Bubna-Litic, 2012-08-28 Religion and spirituality have often been treated with a secular disdain by management theorists. Recently, the tide has begun to turn and there is a growing openness to cite spirituality in academic analysis and debate, and when considering issues of practical concern to those engaged in the actual business of management. This provocative book brings together a range of leading thinkers to consider the relationship between spirituality and corporate social responsibility. The book's contributors examine spirituality as an inherent dimension of corporate life even if it is only known through its absence - and through the negative consequences of this absence on people and the planet. With contributors from four continents, David Bubna-Litic has assembled a range of fascinating perspectives having their origins in traditions that include Christianity, Process Theology, Hinduism, Contemporary Buddhism, Deep Ecology, Humanism, Post-Modern and Post-Romantic Spirituality. Spirituality and Corporate Social Responsibility is a fascinating read for anyone with an interest in ways in which spirituality relates to what is or what should be driving businesses and organizations to more responsible behaviour.

Applied Statistics for Business and Economics Allen Webster, 1998 Essentials of Business Statistics presents basic statistic concepts, including descriptive statistics, probability, and elementary inferential statistics in a student oriented style. All concepts are developed with support of unique three part examples: problem, solution, and interpretation, which give students the full picture. Applications are drawn from all areas of business and economics. This book is a refocused and shortened version of APPLIED STATISTICS FOR BUSINESS AND ECONOMICS 2/e by Webster.
