Adventures in Lea Valley David Campany,2016-11-03 The River Lea runs from Hertfordshire down to the Thames in East London. Once a busy commercial waterway, it is now a nature reserve and

leisure area. From the grand site of the 2012 Olympic Games it passes industrial estates, sports centres, new build homes and council estates. Escape from the city; the reinvention of social spaces; the attraction of water; the meeting of different cultures; the persistence of nature. Adventures in Lea Valley collects a decade's worth of photographs from Davaid Campany and Polly Braden, telling the story of this changing land.

China Between Polly Braden, 2010 1980s: Communist China entered into global trade and international capital. The goal was financial but new money also brought new values and new ways of life. Polly Braden's photography is an intimate response to the material and psychological effects of the changes experienced by the country's new urban class. Shot over three years in Shanghai, Xiamen, Shenzhen and Kunming, this is a revelatory portrait. Braden shows how a casual glance, a moment of doubt or a quick trip to the shopping mall say as much about modern China as any image of a dam, a protest or a teeming workforce.

It hosted the first-ever World Series game played at night as the Pirates would win their last two titles there. The Pitt-Penn State rivalry in college football was never more heated than under the bright lights of Three Rivers. The Steel Curtain era of the Steelers brought Super Bowl wins and elevated the stadium to become one of the most feared venues in all of professional sports. Locally referred to as the House that Clemente Built, the stadium was the site of the beloved right fielder's 3,000th hit. Join local sportswriters as they recall the roaring crowds, rocking stands and greatest moments of Three Rivers Stadium.

Hail Mary Frankie de la Cretaz,Lyndsey D'Arcangelo,2021-11-02 The groundbreaking story of the

National Women's Football League, and the players whose spirit, rivalries, and tenacity changed the legacy of women's sports forever. In 1967, a Cleveland promoter recruited a group of women to compete as a traveling football troupe. It was conceived as a gimmick—in the vein of the Harlem Globetrotters—but the women who signed up really wanted to play. And they were determined to win. Hail Mary chronicles the highs and lows of the National Women's Football League, which took root in nineteen cities across the US over the course of two decades. Drawing on new interviews with former players from the Detroit Demons, the Toledo Troopers, the LA Dandelions, and more, Hail Mary brings us into the stadiums where they broke records, the small-town lesbian bars where they were recruited, and the backrooms where the league was formed, championed, and eventually shuttered. In an era of vibrant second wave feminism and Title IX activism, the athletes of the National Women's Football League were boisterous pioneers on and off the field: you'll be rooting for them from start to finish.

The DNA of God Leoncio A. Garza-Valdes, 2012-05-09 In 1988, radiocarbon dating showed that the Shroud of Turin--long regarded as the burial cloth of Jesus of Nazareth--could not be from the time of Jesus but was of a more recent origin. What scientists did not know at that time, but what author Dr. Leoncio Garza-Valdes came to discover, is that bacteria produce an organic coating (what he calls a bioplastic coating) over time on ancient textiles, textiles including the Shroud itself. This coating, which the author first discovered on Mayan artifacts, so distorts the carbon dating process that objects on which it is found (such as the Shroud) are actually significantly older than the data show. The scientific community has hailed Dr. Garza-Valdes's findings since this new knowledge is of significance for archaeologists around the world. For those interested in the mysterious history of the Shroud, it is again possible to regard this artifact as originating in the first century--and consequently

as being the burial cloth of Jesus. But Dr. Garza-Valdes's amazing discoveries did not end with this breakthrough. His examination of pieces of the Shroud under a microscope has revealed incredible clues consistent with the Scriptural accounts of the death of Jesus. Bacteria that produce acetic acid (vinegar) were isolated from the Shroud. Do they belong to the vinegar offered to Jesus before his death on the cross? Could human blood remnants that contain a man's DNA be traces of the blood of Jesus? Does it contain the DNA of God? The DNA of God? is the fascinating story of this microbiologist's journey of discovery and of the earthshaking secrets he has revealed about the Shroud of Turin.

*The Home Team* Scott Adamson, 2020-08-17 Birmingham, Alabama - the Football Capital of the South - has likely had more pro football teams than any other city. None have been in the NFL, and all have failed. Quickly. As veteran sportswriter Scott Adamson can attest, loving an off-brand team is the triumph of hope over experience. Having decided at an early age that tackle football was the greatest sport man has yet to invent, Adamson takes on a fan's-eye view of life with Brand X football. *The Home Team: My Bromance with Off-Brand Football* is the funny, somewhat tortured, journey of a fanatic's life long quest for a hometown team of his own. *The Home Team: My Bromance with Off-Brand Football* is filled with trivia, history, heartache, and more trivia. And how game day hotdogs can be fatal to young romance. Adamson's account of Birmingham's unsinkable quest for pro football is for any fan whose hometown's reach has exceeded its grasp.

**Introduction to Geostatistics** P. K. Kitanidis, 1997-05-13 Engineers and applied geophysicists routinely encounter interpolation and estimation problems when analysing data from field observations. *Introduction to Geostatistics* presents practical techniques for the estimation of spatial functions from sparse data. The author's unique approach is a synthesis of classic and geostatistical

methods with a focus on the most practical linear minimum-variance estimation methods, and includes suggestions on how to test and extend the applicability of such methods. The author includes many useful methods (often not covered in other geostatistics books) such as estimating variogram parameters, evaluating the need for a variable mean, parameter estimation and model testing in complex cases (e.g. anisotropy, variable mean, and multiple variables), and using information from deterministic mathematical models. Well illustrated with exercises and worked examples taken from hydrogeology, Introduction to Geostatistics assumes no background in statistics and is suitable for graduate-level courses in earth sciences, hydrology, and environmental engineering, and also for self-study.

**Respect, Plurality, and Prejudice** Lene Auestad, 2018-05-15 This book helps us understand the current resurgence of social prejudice against ethnic minority groups, the logics of scapegoating and the resulting violence. Our time is characterised by a growth in expressed hostility and violence towards people who are perceived as 'others'. Hatred towards and discrimination against minorities is on the rise. This book presents a new understanding of prejudice, racism, antisemitism, xenophobia, islamophobia, sexism and homophobia. It combines philosophy with psychoanalytic thinking, sociology and psycho-social studies, analysing the unconscious elements of social processes. The author makes a case for framing a questioning of prejudice, not in terms of normality versus pathology or deviance, but in what is socially unconscious. Hypocrisy and double standards are inherent in our social practices, reflecting the contradictions present in our thinking about these issues: that we both believe and do not believe in equality.
