**Attending** Ronald Epstein,2017-01-24 With his "deeply informed and compassionate book...Dr. Epstein tells us that it is a 'moral imperative' [for doctors] to do right by their patients" (New York Journal of Books). The first book for the general public about the importance of mindfulness in medical practice, *Attending* is a groundbreaking, intimate exploration of how doctors approach their work with patients. From his early days as a Harvard Medical School student, Epstein saw what made good doctors great—more accurate diagnoses, fewer errors, and stronger connections with their patients. This made a lasting impression on him and set the stage for his life's work—identifying the qualities and habits that distinguish master clinicians from those who are merely competent. The secret, he learned, was mindfulness. Dr. Epstein "shows how taking time to pay attention to patients can lead to better outcomes on both sides of the stethoscope" (Publishers Weekly). Drawing on his clinical experiences and current research, Dr. Epstein explores four foundations of mindfulness—Attention, Curiosity, Beginner's Mind, and Presence—and shows how clinicians can grow their capacity to provide high-quality care. The commodification of health care has shifted doctors' focus away from the healing of patients to the bottom line. Clinician burnout is at an all-time high. *Attending* is the antidote. With compassion and intelligence, Epstein offers "a concise guide to his view of what mindfulness is, its value, and how it is a skill that anyone can work to acquire" (Library Journal).

**The Steiner Tree Problem** F.K. Hwang,D.S. Richards,P. Winter,1992-10-20 The Steiner problem asks for a shortest network which spans a given set of points. Minimum spanning networks have been well-studied when all connections are required to be between the given points. The novelty of the Steiner tree problem is that new auxiliary points can be introduced between the original points so that a spanning network of all the points will be shorter than otherwise possible. These new points are called Steiner points - locating them has proved problematic and research has diverged along many different avenues. This volume is devoted to the assimilation of the rich field of intriguing analyses and the consolidation of the fragments. A section has been given to each of the three major areas of interest which have emerged. The first concerns the Euclidean Steiner Problem, historically the original Steiner tree problem proposed by Jarník and Kőssler in 1934. The second deals with the Steiner Problem in Networks, which was propounded independently by Hakimi and Levin and has enjoyed the most prolific research amongst the three areas. The Rectilinear Steiner Problem, introduced by Hanan in 1965, is discussed in the third part. Additionally, a forth section has been included, with chapters discussing areas where the body of results is still emerging. The collaboration of three authors with different styles and outlooks affords individual insights within a cohesive whole.

*Postmodern Winemaking* Clark Smith,2013-11-02 In *Postmodern Winemaking*, Clark Smith shares the extensive knowledge he has accumulated in engaging, humorous, and erudite essays that convey a new vision of the winemaker's craft--one that credits the crucial roles played by both science and art in the winemaking process. Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray--enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Great wines, he claims, demand a personal and creative engagement with many elements of the process. His lively exploration of the facets of postmodern winemaking, together with profiles of some of its practitioners, is both entertaining and enlightening.

*The Social and Political Philosophy of Mary Wollstonecraft* Sandrine Bergès,Alan Coffee,2016-11-10 Interest in the contribution made by women to the history of philosophy is burgeoning. Intense research is underway to recover their works which have been lost or overlooked. At the forefront of this revival is Mary Wollstonecraft. While she has long been studied by feminists, and later discovered by political scientists, philosophers themselves have only recently begun to recognise the value of her work for their discipline. This volume brings together new essays from leading scholars, which explore Wollstonecraft's range as a moral and political philosopher of note, both taking a historical perspective and applying her thinking to current academic debates. Subjects include Wollstonecraft's ideas on love and respect, friendship and marriage, motherhood, property in the person, and virtue and the emotions, as well as the application her thought has for current thinking on relational autonomy, and animal and children's rights. A major theme within the book places her within the republican tradition of political theory and analyses the contribution she makes to its conceptual resources.

*The Destruction of the Medieval Chinese Aristocracy* Nicolas Tackett,2020-10-26 Historians have long been perplexed by the complete disappearance of the medieval Chinese aristocracy by the tenth century—the “great clans” that had dominated China for centuries. In this book, Nicolas Tackett resolves the enigma of their disappearance, using new, digital methodologies to analyze a dazzling array of sources. Tackett systematically mines thousands of funerary biographies excavated in recent decades—most of them never before examined by scholars—while taking full advantage of the explanatory power of Geographic Information System (GIS) methods and social network analysis. Tackett supplements these analyses with extensive anecdotes culled from epitaphs, prose literature, and poetry, bringing to life women and men who lived a millennium in the past. The Destruction of the Medieval Chinese Aristocracy demonstrates that the great Tang aristocratic families adapted to the social, economic, and institutional transformations of the seventh and eighth centuries far more successfully than previously believed. Their political influence collapsed only after a large number were killed during three decades of extreme violence following Huang Chao’s sack of the capital cities in 880 CE. 2015 James Breasted Prize, American Historical Association

Environmental Health Literacy Symma Finn,Liam R. O'Fallon,2018-09-12 This book explores various and distinct aspects of environmental health literacy (EHL) from the perspective of investigators working in this emerging field and their community partners in research. Chapters aim to distinguish EHL from health literacy and environmental health education in order to classify it as a unique field with its own purposes and outcomes. Contributions in this book represent the key aspects of communication, dissemination and implementation, and social scientific research related to environmental health sciences and the range of expertise and interest in EHL. Readers will learn about the conceptual framework and underlying philosophical tenets of EHL, and its

relation to health literacy and communications research. Special attention is given to topics like dissemination and implementation of culturally relevant environmental risk messaging, and promotion of EHL through visual technologies. Authoritative entries by experts also focus on important approaches to advancing EHL through community-engaged research and by engaging teachers and students at an early age through developing innovative STEM curriculum. The significance of theater is highlighted by describing the use of an interactive theater experience as an approach that enables community residents to express themselves in non-verbal ways.
