Computational Materials Discovery Artem Oganov, Gabriele Saleh, Alexander Kvashnin, 2018-10-30 New technologies are made possible by new materials, and until recently new materials could only be discovered experimentally. Recent advances in solving the crystal structure prediction problem means that the computational design of materials is now a reality. Computational Materials Discovery provides a comprehensive review of this field covering different computational methodologies as well as specific applications of materials design. The book starts by illustrating how and why first-principle calculations have gained importance in the process of materials discovery. The book is then split into three sections, the first exploring different approaches and ideas including crystal structure prediction from evolutionary approaches, data mining methods and applications of machine learning. Section two then looks at examples of designing specific functional materials with special technological relevance for example photovoltaic materials, superconducting materials, topological insulators and thermoelectric materials. The final section considers recent developments in creating low-dimensional materials. With contributions from pioneers and leaders in the field, this unique and timely book provides a convenient entry point for graduate students, researchers and industrial scientists on both the methodologies and applications of the computational design of materials.

Hidden Agendas Jane Kelsey,2013-05-01 'Forget the label "free trade agreement". The TPPA, under negotiation between New Zealand, the USA and ten other countries, is a direct assault on our right to decide our own future.' In this hard-hitting BWB Text, Professor Jane Kelsey picks apart the current negotiations surrounding the proposed Trans-Pacific Partnership Agreement (TPPA) and comes to some disturbing conclusions. Such a treaty, she says in this new work, has little credible economic rationale but could have potentially dangerous effects on our ability to decide for ourselves how we address the economic, environmental, social and Treaty challenges of the twenty-first century. At a time of constitutional review, the secrecy surrounding the TPPA negotiations raises hard questions about the future shape of New Zealand.

Companion to British Road Haulage History John Aldridge,Grahame Boyes,2003 This encyclopaedic reference work is the first to address in depth the subject of road haulage in Britain. Whereas there is extensive literature on the development of passenger road transport during the twentieth century, little of substance has been published about the contribution of road haulage to Britain's economic progress. The book presents some 600 cross-referenced articles on the history of road freight transport in Britain in the twentieth century. The book covers business, economic, legal, administrative, technical and social aspects, from the very beginning of the motor vehicle era, through the slow transition from horse-drawn transport, to modern heavy lorries.
