3D Printing in Space National Research Council (U.S.). Committee on Space-Based Additive Manufacturing, 2014 Additive manufacturing has the potential to positively affect human spaceflight operations by enabling the in-orbit manufacture of replacement parts and tools, which could reduce existing logistics requirements for the International Space Station and future long-duration human space missions. The benefits of in-space additive manufacturing for robotic spacecraft are far less clear, although this rapidly advancing technology can also potentially enable space-based construction of large structures and, perhaps someday, substantially in the future, entire spacecraft. Additive manufacturing can also help to reimagine a new space architecture that is not constrained by the design and manufacturing confines of gravity, current manufacturing processes, and launch-related structural stresses. The specific benefits and potential scope of additive manufacturing remain undetermined. The realities of what can be accomplished today, using this technology on the ground, demonstrate the substantial gaps between the vision for additive manufacturing in space and the limitations of the technology and the progress that has to be made to develop it for space use. 3D Printing in Space evaluates the prospects of in-space additive manufacturing. This report examines the various technologies available and currently in development, and considers the possible impacts for crewed space operations and robotic spacecraft operations. Ground-based additive manufacturing is being rapidly developed by industry, and 3D Printing in Space discusses government-industry investments in technology development. According to this report, the International Space Station provides an excellent opportunity for both civilian and military research on additive manufacturing technology. Additive manufacturing presents potential opportunities, both as a tool in a broad toolkit of options for space-based activities and as a potential paradigm-changing approach to designing hardware for in-space activities. This report makes recommendations for future research, suggests objectives for an additive manufacturing roadmap, and envisions opportunities for cooperation and joint development.

Project Censored's State of the Free Press 2022 Andy Lee Roth, Mickey Huff, 2022-01-25 As the United States grapples with the ongoing COVID-19 pandemic, the nation's living legacy of systemic racism, and partisan threats to the foundations of democracy, the integrity of news and Project Censored's survey of underreported news stories has never been more important. This 2022 edition of Project Censored's State of the Free Press offers a comprehensive survey of the most important but underreported news stories of 2021 and a comparative analysis of the current state of corporate and independent news media, and its effect on democracy. The establishment media sustains a decrepit post-truth era, as examined the lowlight features: Junk Food News-frivolous stories that distract the public from actual news-and-News Abuse-important stories covered in ways that undermine public understanding. The alternative media provokes a burgeoning critical media literacy age, as evaluated in the highlight feature: Media Democracy in Action-relevant stories responsibly reported on by independent organizations. Finally, in an homage to the history of the annual report, the editors reinstate the Déjà vu News feature-revisited stories from previous editions. State of the Free Press 2022 endows readers with the critical thinking and media literacy skills required to hold the corporate media to account for distorting or censoring news coverage, and thus, to revitalize our democracy. State of the Free Press 2022 is a joint production of The Censored Press and Seven Stories Press.

Hurricane Hazel Hazel McCallion, Robert Brehl, 2014-10-28 Throughout her ground-breaking career in business and politics, Hurricane Hazel McCallion has seen it all. In 1978, she defeated a popular incumbent to win election as mayor of Mississauga, a rising city near Toronto that was, until then, a collection of towns, villages and farms. No one would have foreseen that the indomitable Hurricane Hazel would become so wildly popular she would remain mayor until 2014, retiring at age 93. Within months of taking office, Mayor McCallion orchestrated the largest Canadian peacetime evacuation at the time after a train derailed and put almost 250,000 Mississauga residents in harm's way of deadly chlorine gas. The incident made her an international media star and cemented her reputation as a plain-speaking, decisive political leader. She's been courted by federal and provincial parties over the years but turned them all down, declaring, I could never toe the party line. I'd wear out the carpet crossing the floor. In her memoir, McCallion writes about her early years as the feisty mayor of a growing city; battles with politicians and business leaders; her love of hockey and abhorrence of on-ice violence; where the feminist movement misses its mark; and how she watched and dealt with her beloved husband's fall into the grip of Alzheimer's. Hazel's run as the leader of one of the fastest-growing cities in Canada has been nothing short of remarkable. The book is the story of Hazel's political, personal and business life, with all of its bumps and bruises along the way, as honest, bold and straightforward as the woman herself.

Project Censored's State of the Free Press 2021 Mickey Huff, Andy Lee Roth, 2020-12-01 The new and improved Censored, detailing the top censored stories and media analysis of 2020. Our nation's oldest news-monitoring group, Project Censored, refreshes its longstanding yearbook series, Censored, with State of the Free Press 2021. This edition offers a more succinct and comprehensive survey of the most important but underreported news stories of 2020; in addition to a comparative analysis of the current state of corporate and independent news media, and its effect on democracy. The establishment media sustains a decrepit post-truth era, as examined the lowlight features: Junk Food News-frivolous stories that distract the public from actual news-and-News Abuse-important stories covered in ways that undermine public understanding. The alternative media provokes a burgeoning critical media literacy age, as evaluated in the highlight feature: Media Democracy in Action-relevant stories responsibly reported on by independent organizations. Finally, in an homage to the history of the annual report, the editors reinstate the Déjà vu News feature-revisited stories from previous editions. State of the Free Press 2021 endows readers with the critical thinking and media literacy skills required to hold the corporate media to account for distorting or censoring news coverage, and thus, to revitalize our democracy.

Beautiful Blackbird Ashley Bryan, 2011-04-19 A tale from the Ila-speaking people of Zambia gets new life in this picture book adaptation from Coretta Scott King Award winner Ashley Bryan about appreciating one's heritage and discovering the beauty within. Black is beautiful, uh-huh! Long ago, Blackbird was voted the most beautiful bird in the forest. The other birds, who were colored red, yellow, blue, and green, were so envious that they begged Blackbird to paint their feathers with a touch of black so they could be beautiful too. Although Black-bird warns them that true beauty comes from within, the other birds persist and soon each is given a ring of black around their neck or a dot of black on their wings—markings that detail birds to this very day.

The Better Angels of Our Nature Steven Pinker, 2012-09-25 Faced with the ceaseless stream of news about war, crime, and terrorism, one could easily think this is the most violent age ever seen. Yet as bestselling author

Pinker shows in this startling and engaging new work, just the opposite is true.

Ancient Buddhist Scrolls from Gandhāra Richard Salomon, 1999 As the Dead Sea scrolls have changed our understanding of Judaism and early Christianity, so a set of twenty-nine scrolls recently acquired by the British Library promise to provide a window into a crucial phase of the history of Buddhism in India. The fragmentary birch bark scrolls, which were found inside one of a set of inscribed clay pots, are written in the Gandhari Prakrit language and in Kharosthi script. Dating from around the beginning of the Christian era, the scrolls are probably the oldest Buddhist manuscripts ever discovered. The manuscripts and pots come from a region known in ancient times as Gandhara, corresponding to modern northern Pakistan and eastern Afghanistan. At the peak of its influence, Gandhara was the capital of a series of wealthy and powerful dynasties and became one of the world's most important centers of Buddhism and the gateway through which Buddhism was transmitted from India to China and other parts of Asia. Gandhara was also a principal point of contact between India and the Western world. Despite abundant archeological evidence of Gandhara's thriving culture, until now there has been virtually no documentary evidence of its literary and religious canon. This volume introduces a groundbreaking project to decipher and interpret the Gandhāran texts. It provides a detailed description of the manuscripts and a survey of their contents, along with a preliminary evaluation of their significance. Also included are representative samples of texts and translations. This discovery sheds new light on the regional character of early Indian Buddhist traditions, the process of the formation of standardized written canons, and the transmission of Buddhism into central and east Asia. *Ancient Buddhist Scrolls from Gandhara* will appeal to a broad audience with interests in Buddhism, comparative religion, and Asian languages. Age of Information Yin Sun, Igor Kadota, Rajat Talak, Eytan Modiano, 2022-06-01 Information usually has the highest value when it is fresh. For example, real-time knowledge about the location, orientation, and speed of motor vehicles is imperative in autonomous driving, and the access to timely information about stock prices and interest rate movements is essential for developing trading strategies on the stock market. The Age of Information (AoI) concept, together with its recent extensions, provides a means of quantifying the freshness of information and an opportunity to improve the performance of real-time systems and networks. Recent research advances on AoI suggest that many well-known design principles of traditional data networks (for, e.g., providing high throughput and low delay) need to be re-examined for enhancing information freshness in rapidly emerging real-time applications. This book provides a suite of analytical tools and insightful results on the generation of information-update packets at the source nodes and the design of network protocols forwarding the packets to their destinations. The book also points out interesting connections between AoI concept and information theory, signal processing, and control theory, which are worthy of future investigation.

The Right Matthew Continetti, 2023-05-23 A superb and ambitious (New York Times) intellectual and political history of the last century of American conservatism When most people think of modern conservatism, they think of Ronald Reagan. Yet this narrow view leaves many to question: How did Donald Trump win the presidency? And what is the future of the Republican Party? In *The Right*, Matthew Continetti gives a sweeping account of movement conservatism's evolution, from the Progressive Era through the present. He tells the story of how conservatism began as networks of intellectuals, developing and institutionalizing a vision that grew over time, only to see their creation buckle under new pressures from national populist movements. Drawing out the tensions between the desire for mainstream acceptance and the pull of extremism, Continetti argues that the more one studies conservatism's past, the more one becomes convinced of its future. Updated with a new epilogue, *The Right* is essential reading for anyone looking to understand American conservatism.

Peter 2.0 Peter Scott-Morgan, 2021-04-01 The incredible book behind the primetime Channel 4 documentary, *Peter: The Human Cyborg* 'A remarkable account of what it means to be human and what technology can really achieve' Sunday Telegraph 'Peter's story is one of the most extraordinary you will ever hear. I urge people to read it' Stephen Fry 'A remarkable story . . . you're left desperate to take nothing for granted' Radio Times _____ Peter, a brilliant scientist, is told that he will lose everything he loves. His husband. His family. His friends. His ability to travel the world. All will be gone. But Peter will not give up. He vows that this will not be the end and instead seeks a completely new beginning . . . Peter has Motor Neurone Disease, a condition universally considered by doctors to be terminal. He is told it will destroy his nerve cells and that within about two years, it will take his life too. But, face-to-face with death, he decides there is another way. Using his background in science and technology, he navigates a new path, one that will enable him not just to survive, but to thrive. This is the astonishing true story about Peter Scott-Morgan: the first person to combine his very humanity with artificial intelligence and robotics to become a full Cyborg. His discovery means that his terminal diagnosis is negotiable, something that will rewrite the future. And change the world. By embracing love, life and hope rather than fear, tragedy and despair, he will become Peter 2.0. _____ 'Compelling . . . Scott-Morgan is a true one-off. It is in the telling of the love story, rather than the technical details of becoming a cyborg, that this book succeeds' The Times 'What's striking is Peter's constant optimism, bravery and his ability to find radical answers to problems that have confounded Britain's brightest minds' Daily Telegraph 'A soaring love story' Financial Times 'Fascinating and extremely moving' Sun

She and Brandon Lancaster are taking their relationship to the next level, and she has a new dream job as legal counsel for Praecursoria—a research lab that is making waves with its cutting-edge genetic therapies. The company's leukemia treatments even promise to save desperately sick kids—kids like eleven-year-old Bethany, a critically ill foster child at Brandon's foster home. When Caroline's enthusiastic boss wants to enroll Bethany in experimental trials prematurely, Caroline objects, putting her at odds with her colleagues. They claim the only goal at Praecursoria is to save lives. But does someone have another agenda? Brandon faces his own crisis. As laws governing foster homes shift, he's on the brink of losing the group home he's worked so hard to build. When Caroline learns he's a Praecursoria investor, it becomes legally impossible to confide in him. Will the secrets she keeps become a wedge that separates them forever? And can she save Bethany from the very treatments designed to heal her?
