Carte Du Monde Poétique ,2015 With Carte du monde poétique, Herbert Foundation pays tribute to the artist and poet Marcel Broodthaers (1924 Sint-Gillis - 1976 Cologne). After they were introduced to him in the early 1970s, Annick and Anton Herbert started closely following Broodthaers' artistic practice, and his oeuvre would develop to become a cornerstone of their Collection. Situated in the 12-year span during which Broodthaers was active as an artists, the exhibition brings together a substantive selection of his installations, films, artists' books, printed material and other document that are part of the Herbert Collection. The title of the exhibition was borrowed from the work Carte du poétique (1968) and introduces the particular framework of references against which Broodthaers' body of work is explored. The illustrated essays in this accompanying publication focus more deeply on the works and documents of view and situate them within the broader context of Broodthaers' oeuvre.

A Catalogue of the Cotsen Children's Library Cotsen Children's Library (Princeton University),2000 In fall 1996, the Cotsen staff began compiling a multi-volume book catalogue of the research collection, with support from the Department of Rare Books and Special Collections and the Technical Services Department of the Princeton University Library.00With the publication in 2019 of 'The Nineteenth Century' volumes I (A-K) and II (L-Z), the project now covers publications of the 19th and 20th centuries. These two volumes of the descriptive catalogue include more than 6,370 entries of 19th century illustrated children's books, continuing the series of printed catalogues first published in 2000 and 2003 covering 20th century imprints.00Still planned are a volume covering pre-1801 imprints and an index. When competed, the material will comprise about 20,000 items chiefly in European languages out of a total over 100,000 items published during the fifteenth through twentieth centuries. The entries include detailed notes on illustrations, contents, bindings, and previous owners. As so many children's books appear without dates of publication on their title pages, every attempt has been made to assign an accurate date of issue based on internal evidence and authoritative reference sources in print and on-line. The text is enlivened with more than 270 color-printed illustrations, many full size.0.

Halo: Point of Light Kelly Gay,2021-03-02 An original full-length novel set in the Halo universe and based on the New York Times bestselling video game series! August 2558. Rion Forge was once defined by her relentless quest for hope amidst the refuse and wreckage of a post-Covenant War galaxy—years spent searching for family as much as fortune. But that was before Rion and the crew of her salvager ship Ace of Spades encountered a powerful yet tragic being who forever altered their lives. This remnant from eons past, when the Forerunners once thrived, brought with it a revelation of ancient machinations and a shocking, brutal history. Unfortunately, the Ace crew also made dire enemies of the Office of Naval Intelligence in the process, with the constant threat of capture and incarceration a very real possibility. Now with tensions mounting and ONI forces closing in, Rion and her companions commit to this being’s very personal mission, unlocking untold secrets and even deadlier threats that have been hidden away for centuries from an unsuspecting universe....

Engaging Design Emy Nelson Decker,Seth M. Porter,2018-10-12 This book demonstrates how aesthetics, design elements, and visual literacy can be implemented in the library to enhance spaces, programs, services, instruction, and outreach so that your library will appeal to all users. Libraries have come to accept that they must rethink how they appeal to users, and harnessing the power of design can be a powerful means for addressing the changing needs of the community. Decker and Porter introduce engaging design—an umbrella term that incorporates multiple design frameworks with a focus on a three-prong approach: aesthetics, design thinking, and service design. These frameworks can be used to guide design choices that will aid in teaching and engaging current and potential library users. In the course of a lively and interesting narrative, Engaging Design introduces basic concepts of aesthetics and good design and explores examples of its successful uses in the academic, public, and special library. It provides simple steps for implementing subtle, but powerful, techniques to improve instruction, human-computer interaction, e-learning, public services spaces, wayfinding signage, and all manner of library programs, events, and services. In addition, the authors recommend easy-to-implement best practices that will help librarians to enhance library-goers' experience. Library administrators will also look to this book for assistance in best addressing the needs of the modern library user.

Life in the Soil James B. Nardi,2009-09-15 Leonardo da Vinci once mused that “we know more about the movement of celestial bodies than about the soil underfoot,” an observation that is as apt today as it was five hundred years ago. The biological world under our toes is often unexplored and unappreciated, yet it teems with life. In one square meter of earth, there lives trillions of bacteria, millions of nematodes, hundreds of thousands of mites, thousands of insects and worms, and hundreds of snails and slugs. But because of their location and size, many of these creatures are as unfamiliar and bizarre to us as anything found at the bottom of the ocean. Lavishly illustrated with nearly three hundred color illustrations and masterfully-rendered black and white drawings throughout, Life in the Soil invites naturalists and gardeners alike to dig in and discover the diverse community of creatures living in the dirt below us. Biologist and acclaimed natural history artist James B. Nardi begins with an introduction to soil ecosystems, revealing the unseen labors of underground organisms maintaining the rich fertility of the earth as they recycle nutrients between the living and mineral worlds. He then introduces readers to a dazzling array of creatures: wolf spiders with glowing red eyes, snails with 120 rows of teeth, and 10,000-year-old fungi, among others. Organized by taxon, Life in the Soil covers everything from slime molds and roundworms to woodlice and dung beetles, as well as vertebrates from salamanders to shrews. The book ultimately explores the crucial role of soil ecosystems in conserving the worlds above and below ground. A unique and illustrative introduction to the many unheralded creatures that inhabit our soils and shape our environment aboveground, Life in the Soil will inform and enrich the naturalist in all of us.

Baby Birds Julie Zickefoose,2016-04-12 If you’ve ever wondered what goes on in bird nests, or what happens after a fledgling leaves the nest, come along on Julie’s sensitive exploration of often-uncharted ornithological ground. This beautiful book is as much an art book as it is a natural history, something readers have come to expect from Julie Zickefoose. More than 400 watercolor paintings show the breathtakingly swift development of seventeen different species of wild birds. Sixteen of those species nest on Julie's wildlife sanctuary, so she knows the birds intimately, and writes about them with authority. To create the bulk of this extraordinary work, Julie would borrow a wild nestling, draw it, then return it to its nest every day until it fledged. Some were orphans she raised by hand, giving the ultimate insider’s glimpse into their lives. In sparkling prose, Julie shares a lifetime of insight about bird breeding biology, growth, and cognition. As an artist and wildlife rehabilitator, Julie possesses a unique skill set that includes sketching and painting rapidly from life as well as handling delicate hatchlings. She is uniquely positioned to create such an opus, and in fact, nothing like it has ever been attempted. Julie has many fans, and she will gain many more with this unparalleled work.
