Master PowerShell Tricks Dave Kawula,Thomas Rayner,Will Anderson,Allan Rafuse,Mick Pletcher,2017-11-30 The purpose of this book is to showcase the amazing expertise of our guest speakers at the North American MVPDays Community Roadshow. They have so much passion, expertise, and expert knowledge that it only seemed fitting to write it down in a book. MVPDays was founded by Cristal and Dave Kawula back in 2013. It started as a simple idea; "There's got to be a good way for Microsoft MVPs to reach the IT community and share their vast knowledge and experience in a fun and engaging way" I mean, what is the point in recognizing these bright and inspiring individuals, and not leveraging them to inspire the community that they are a part of. We often get asked the question "Who should attend MVPDays"? Anyone that has an interest in technology, is eager to learn, and wants to meet other like-minded individuals. This Roadshow is not just for Microsoft MVP's it is for anyone in the IT Community. Make sure you check out the MVPDays website at: [www.mvpdays.com](http://www.mvpdays.com). You never know maybe the roadshow will be coming to a city near you. The goal of this particular book is to give you some amazing Master PowerShell tips from the experts you come to see in person at the MVPDays Roadshow. Each chapter is broken down into a unique tip and we really hope you find some immense value in what we have written.

**Smart Medical Data Sensing and IoT Systems Design in Healthcare** Chakraborty, Chinmay,2019-09-20 Smart healthcare technology improves the diagnosis and treatment of patients, provides easy access to medical facilities and emergency care services, and minimizes the gaps between patients and healthcare providers. While clinical data protection remains a major challenge, innovations such as the internet of medical things and smart healthcare systems increase the efficiency and quality of patient care. Healthcare technology can only become faster, more profitable, and more flexible as additional research on its advancements is conducted and collected. Smart Medical Data Sensing and IoT Systems Design in Healthcare is an essential reference source that focuses on robust and easy solutions for the delivery of medical information from patients to doctors and explores low-cost, high-performance, highly efficient, deployable IoT system options in healthcare systems. Featuring research on topics such as hospital management systems, electronic health records, and bio-signals, this book is ideally designed for technologists, engineers, scientists, clinicians, biomedical engineers, hospital directors, doctors, nurses, healthcare practitioners, telemedical agents, students, and

academicians seeking coverage on the latest technological developments in medical data analysis and connectivity.

**Practical Data Science** Andreas François Vermeulen, 2018-02-21 Learn how to build a data science technology stack and perform good data science with repeatable methods. You will learn how to turn data lakes into business assets. The data science technology stack demonstrated in Practical Data Science is built from components in general use in the industry. Data scientist Andreas Vermeulen demonstrates in detail how to build and provision a technology stack to yield repeatable results. He shows you how to apply practical methods to extract actionable business knowledge from data lakes consisting of data from a polyglot of data types and dimensions. What You'll Learn Become fluent in the essential concepts and terminology of data science and data engineering Build and use a technology stack that meets industry criteria Master the methods for retrieving actionable business knowledge Coordinate the handling of polyglot data types in a data lake for repeatable results Who This Book Is For Data scientists and data engineers who are required to convert data from a data lake into actionable knowledge for their business, and students who aspire to be data scientists and data engineers

**Learning Apache Apex** Thomas Weise, Munagala V. Ramanath, David Yan, Kenneth Knowles, 2017-11-30 Designing and writing a real-time streaming publication with Apache Apex About This Book Get a clear, practical approach to real-time data processing Program Apache Apex streaming applications This book shows you Apex integration with the open source Big Data ecosystem Who This Book Is For This book assumes knowledge of application development with Java and familiarity with distributed systems. Familiarity with other real-time streaming frameworks is not required, but some practical experience with other big data processing utilities might be helpful. What You Will Learn Put together a functioning Apex application from scratch Scale an Apex application and configure it for optimal performance Understand how to deal with failures via the fault tolerance features of the platform Use Apex via other frameworks such as Beam Understand the DevOps implications of deploying Apex In Detail Apache Apex is a next-generation stream processing framework designed to operate on data at large scale, with minimum latency, maximum reliability, and strict correctness guarantees. Half of the book consists of Apex applications, showing you key aspects of data processing pipelines such as connectors for sources and sinks, and common data transformations. The other half of the book is evenly split into explaining the Apex framework, and tuning, testing, and scaling Apex applications. Much of our economic world depends on growing streams of data, such as social media feeds, financial records, data from mobile devices, sensors and machines (the Internet of Things - IoT). The projects in the book show how to process such streams to gain valuable, timely, and actionable insights. Traditional use cases, such as ETL, that currently consume a significant chunk of data engineering resources are also covered. The final chapter shows you future possibilities emerging in the streaming space, and how Apache Apex can contribute to it. Style and approach This book is divided into two major parts: first it explains what Apex is, what its relevant parts are, and how to write well-built Apex applications. The second part is entirely application-driven, walking you through Apex applications of increasing complexity.

**Discourse Studies in Public Communication** Eliecer Crespo-Fernández, 2021-04-15 The collection of articles in Discourse Studies in Public Communication illustrates that public communication is a fascinating, evidence-based storehouse for research in discourse analysis. The contributions to this volume — in the spheres of political rhetoric, gender and sexuality, and corporate and academic communication — provide good evidence of contemporary social structure, social phenomena, and social issues. In this way, following the parameters of different analytical frameworks (critical discourse analysis, cognitive metaphor theory, appraisal theory, multimodality, etc.), the contributors address not only the linguistic aspects of texts but also, and more importantly, the cultural and cognitive dimensions of public communication in a range of real life communicative contexts and kinds of discourse. Although the volume is addressed, first and foremost, to readers with diverse interests in English

linguistics, it may also prove valuable to scholars in other non-linguistic research fields like communication studies, social theory, political science, or psychology.

Results of the Astronomical Observations Made at the Royal Observatory, Greenwich ,1896

**The Trumping of America** Pamela Hines,2018-08-02 Trump alone is not to blame... How does it reflect on North American societal values when wealth trumps humanity, selfish individualism trumps compassion, the need to be entertained and to win trumps the truth, and racism and misogyny are rewarded with the most powerful position in the world? The political rise of Donald Trump, from the cutthroat Republican primary process to his move to the White House, has ushered in a new age of politics in the United States. This is a comprehensive analysis of the events surrounding the 2016 presidential election and the unprecedented first year of Donald Trump's presidency. Pamela Hines highlights the growing distortion of American democracy, which threatens political systems around the world. As a Canadian living just across the border, Hines provides a unique perspective on the international impact of the election; explores the roles of religion, racism, nationalism, and gender bias; and critiques the media and its reckless coverage of Trump's ascension. The Trump presidency is a wake-up call to citizens of the free world. Democracy is at risk, yet power remains in the hands of the people. This assault on democracy can be curtailed only if voters make informed decisions and understand the consequences of their choices—while they still have the right to choose.

*Django RESTful Web Services* Gaston C. Hillar,2018-01-25 Django is a Python web framework that makes the web development process very easy. It reduces the amount of trivial code that simplifies the creation of web applications and results in faster development. It is a very powerful and a great choice for creating RESTful web services. **Living with Monsters** Yasmine Musharbash,Ilana Gershon,2023-05-09 For every generic type of monster-ghost, demon, vampire, dragon-there are countless locally specific manifestations, with their own names, traits, and appearances. Such monsters populate all corners of the globe haunting their humans wherever they live. *Living with Monsters* is a collection of fourteen short pieces of ethnographic fiction (and a more academically inclined introduction and afterword) presenting a playful, spirited, and engaging look at how people live with their respective monsters around the world. They focus on the nitty-gritty dos and don'ts of how to placate spirits in India; how to domesticate Georgian goblins, how to live with aliens, how to avoid being taken by Anito in Taiwan, while simultaneously illuminating the politics of monster-human relations. In this collection, anthropologists working in fieldsites as diverse as the urban Ghana, the rural US, remote Aboriginal Australia, and the internet present imaginative accounts that demonstrate how thinking with monsters encourages people to contemplate difference, to understand inequality, and to see the world from new angles. Combine monsters with experimental ethnography, and the result is a volume that crackles with creative energy, flouts traditions of ethnographic writing, and pushes anthropology into new terrains. Yasmine Musharbash is Senior Lecturer and Head of Discipline (Anthropology) at the School of Archaeology & Anthropology at the Australian National University. She conducts participant observation-based research with Warlpiri people in Central Australia with a particular focus on relations: among Warlpiri people on the one hand and between them and non-Indigenous people, fauna, flora, the elements, and monsters, on the other. She is the author of *Yuendumu Everyday* (Aboriginal Studies Press, 2008) and of a number of co-edited volumes, including two about monsters that she co-edited with GH Presterudstuen: *Monster Anthropology in Australasia and Beyond* (Palgrave MacMillan, 2014) and *Monster Anthropology: Ethnographic Explorations of Transforming Social Worlds through Monsters* (Routledge, 2020). Ilana Gershon is the Ruth N. Halls professor of anthropology at Indiana University and studies how people use new media to

accomplish complicated social tasks such as breaking up with lovers and hiring new employees. She has published books such as *The Breakup 2.0* (Cornell University Press, 2012) and *Down and Out in the New Economy* (University of Chicago Press, 2017), and has edited two other volumes of ethnographic fiction on work and animals. She has been a fellow at Stanford's Center for Advanced Study in the Behavioral Sciences, at Notre Dame's Institute for Advanced Study and is currently a visiting professor at the University of Helsinki. She is presently writing a book how working in person during a pandemic sheds light on the ways workplaces function as private governments.

Sports Law in Trinidad and Tobago J. Tyrone Marcus, 2019-12-13 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Trinidad and Tobago deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Trinidad and Tobago will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.
