**Gregory Crane**

Why We Play Roberte Hamayon, 2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called Games, echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. Playing is no 'doing' in the ordinary sense once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?

*Culture and Public Action* Vijayendra Rao, Michael Walton, 2004 Led by Amartya Sen, Mary Douglas, and Arjun Appadurai, the distinguished anthropologists and economists in this book forcefully argue that culture is central to development, and present a framework for incorporating culture into development discourse. **Rodent Model as Tools in Ethical Biomedical Research** Monica Levy Andersen, Sergio Tufik, 2015-11-26  
The objective of this book is to concisely present

information with respect to appropriate use of experimental rodents in research. The principles elaborated seek to provide knowledge of the techniques involved in both management and scientific research to all who use laboratory animals, with a focus on the well-being and ethics regarding rodents and also to fortify the awareness of the importance of the animal as a study object and to offer orientation and assistance in conducting laboratory research, education or tests.

*Thucydides and the Ancient Simplicity* Gregory Crane, 2023-12-22 Thucydides' History of the Peloponnesian War is the earliest surviving realist text in the European tradition. As an account of the Peloponnesian War, it is famous both as an analysis of power politics and as a classic of political realism. From the opening speeches, Thucydides' Athenians emerge as a new and frightening source of power, motivated by self-interest and oblivious to the rules and shared values under which the Greeks had operated for centuries. Gregory Crane demonstrates how Thucydides' history brilliantly analyzes both the power and the dramatic weaknesses of realist thought. The tragedy of Thucydides' history emerges from the ultimate failure of the Athenian project. The new morality of the imperialists proved as conflicted as the old; history shows that their values were unstable and self-destructive. Thucydides' history ends with the recounting of an intellectual stalemate that, a century later, motivated Plato's greatest work. *Thucydides and the Ancient Simplicity* includes a thought-provoking discussion questioning currently held ideas of political realism and its limits. Crane's sophisticated claim for the continuing usefulness of the political examples of the classical past will appeal to anyone interested in the conflict between the exercise of political power and the preservation of human

freedom and dignity.

**Emerging zoonoses: eco-epidemiology, involved mechanisms and public health implications**

Rubén Bueno-Marí,A. Paulo Gouveia Almeida,Juan Carlos Navarro,2015-07-06 Zoonoses are currently considered as one of the most important threats for public health worldwide. Zoonoses can be defined as any disease or infection that is naturally transmissible from vertebrate or invertebrate animals to humans and vice-versa.

Approximately 75% of recently emerging infectious diseases affecting humans are diseases of animal origin; approximately 60% of all human pathogens are zoonotic. All types of potential pathogenic agents, including viruses, parasites, bacteria and fungi, can cause these zoonotic infections. From the wide range of potential vectors of zoonoses, insects are probably those of major significance due to their abundance, high plasticity and adaptability to different kinds of pathogens, high degrees of synanthropism in several groups and difficulties to apply effective programs of population control. Although ticks, flies, cockroaches, bugs and fleas are excellent insects capable to transmit viruses, parasites and bacteria, undoubtedly mosquitoes are the most important disease vectors. Mosquito borne diseases like malaria, dengue, equine encephalitis, West Nile, Mayaro or Chikungunya are zoonoses with increasing incidence in last years in tropical and temperate countries. Vertebrates can also transmit serious zoonoses, highlighting the role of some carnivorous animals in rabies dissemination or the spread of rodent borne diseases in several rural and urban areas. Moreover, the significance of other food borne zoonoses such as taeniasis, trichinellosis or toxoplasmosis may not been underestimated. According to WHO, FAO and OIE guidelines an emerging zoonotic disease can be defined as

a zoonosis that is newly recognized or newly evolved, or that has occurred previously but shows an increase of incidence or expansion in geographical, host or vector range. There are many factors that can provoke or accelerate the emergence of zoonoses, such as environmental changes, habitat modifications, variations of human and animal demography, pathogens and vectors anomalous mobilization related with human practices and globalization, deterioration of the strategies of vector control or changes in pathogen genetics. To reduce public health risks from zoonoses is absolutely necessary to acquire an integrative perspective that includes the study of the complexity of interactions among humans, animals and environment in order to be able to fight against these issues of primary interest for human health. In any case, although zoonoses represent significant public health threats, many of them still remain as neglected diseases and consequently are not prioritized by some health international organisms.

*Mathematics Across Cultures* Helaine Selin, 2012-12-06  
Mathematics Across Cultures: A History of Non-Western Mathematics consists of essays dealing with the mathematical knowledge and beliefs of cultures outside the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Inca, Egyptian, and African mathematics, among others, the book includes essays on Rationality, Logic and Mathematics, and the transfer of knowledge from East to West. The essays address the connections between science and culture and relate the mathematical practices to the cultures which produced them. Each essay is well illustrated and contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both the history of science and in cultural studies. It should find

a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

Complexity, Difference and Identity Paul Cilliers, Rika Preiser, 2012-09-05 Complexity has been part of the academic discourse for a decade or two. Texts on Complexity fall mainly in two categories: fairly technical and mathematical on the one hand, and fairly broad, vague and general on the other. Paul Cilliers' book *Complexity and Postmodernism. Understanding Complex Systems* (Routledge 1998) constituted an attempt to bridge this divide by reflecting more rigorously on the philosophical implications of complexity, and by making it accessible to the social sciences. This edited volume is a continuation of this project, with specific reference to the ethical implications of acknowledging complexity. These issues are pertinent to our understanding of organisations and institutions and could contribute significantly to the development of a richer understanding of ethics in business and would be a useful tool for teachers, researchers and post-graduate students with ethical concerns in disciplines ranging from Philosophy, Applied Ethics, Sociology, Organisational Studies, Political Science, Anthropology and Cultural Studies. The central theme which binds all the contributions together is: the inevitability of normative and ethical issues when dealing with complex phenomena. The book should thus be useful in the development of Business Ethics on two levels: in the first place on the level of developing a strong theoretical foundation, in the second place in providing specific examples of this theory in action in the real world.

*A Hedonist Manifesto* Michel Onfray, 2015-11-10 Michael Onfray passionately defends the potential of hedonism to resolve the dislocations and disconnections of

our melancholy age. In a sweeping survey of history's engagement with and rejection of the body, he exposes the sterile conventions that prevent us from realizing a more immediate, ethical, and embodied life. He then lays the groundwork for both a radical and constructive politics of the body that adds to debates over morality, equality, sexual relations, and social engagement, demonstrating how philosophy, and not just modern scientism, can contribute to a humanistic ethics. Onfray attacks Platonic idealism and its manifestation in Judaic, Christian, and Islamic belief. He warns of the lure of attachment to the purportedly eternal, immutable truths of idealism, which detracts from the immediacy of the world and our bodily existence. Insisting that philosophy is a practice that operates in a real, material space, Onfray enlists Epicurus and Democritus to undermine idealist and theological metaphysics; Nietzsche, Bentham, and Mill to dismantle idealist ethics; and Palante and Bourdieu to collapse crypto-fascist neoliberalism. In their place, he constructs a positive, hedonistic ethics that enlarges on the work of the New Atheists to promote a joyful approach to our lives in this, our only, world.

### **Resounding International Relations M.I.**

Franklin, 2016-09-23 This book explores a provocative area of inquiry for critical theory and research into world politics and popular culture: music. Not just because political science barely engages with anything musical, but also because it is clear that many opportunities for critical scholarship and reflection on global politics and economics are present in the spaces and relationships created by organized sound. It is easy to focus on the textual elements of music, but there is more at stake than just the words. Critical reflection on the intersections between music and politics also need to take into account the visceral and non-

verbal elements such as counterpoint and harmony, polyphony and dissonance, noise, rhymes, rhythms, performance and the visual/aural dimensions to music-making.

Material Feminisms Stacy Alaimo, Susan

Hekman, 2008-01-02 Harnessing the energy of provocative theories generated by recent understandings of the human body, the natural world, and the material world, *Material Feminisms* presents an entirely new way for feminists to conceive of the question of materiality. In lively and timely essays, an international group of feminist thinkers challenges the assumptions and norms that have previously defined studies about the body. These wide-ranging essays grapple with topics such as the material reality of race, the significance of sexual difference, the impact of disability experience, and the complex interaction between nature and culture in traumatic events such as Hurricane Katrina. By insisting on the importance of materiality, this volume breaks new ground in philosophy, feminist theory, cultural studies, science studies, and other fields where the body and nature collide.

**Dance, Space and Subjectivity V.**

Briginshaw, 2016-01-08 This book contains readings of American, British and European postmodern dances informed by feminist, postcolonialist, queer and poststructuralist theories. It explores the roles dance and space play in constructing subjectivity. By focusing on site-specific dance, the mutual construction of bodies and spaces, body-space interfaces and 'in-between spaces', the dances and dance films are read 'against the grain' to reveal their potential for troubling conventional notions of subjectivity associated with a white, Western, heterosexual able-bodied, male norm.

**Industrial Relations in the Caribbean** Samuel J. Goolsarran, 2006 Reader intended to stimulate thinking about the future direction of national and regional labour policies, with a view to good governance in terms of participation, transparency, credibility and accountability. Includes case studies from a number of Caribbean countries as well as ILO contributions by S.J. Goolsarran on labour administration and social dialogue, and an extract from Labour inspection: a guide to the profession, by W. von Richthofen.

**Modern Peoplehood** John Lie, 2011-04 [A] most impressive achievement by an extraordinarily intelligent, courageous, and—that goes without saying—'well-read' mind. The scope of this work is enormous: it provides no less than a comprehensive, historically grounded theory of 'modern peoplehood,' which is Lie's felicitous umbrella term for everything that goes under the names 'race,' 'ethnicity,' and nationality.' Christian Joppke, *American Journal of Sociology* Lie's objective is to treat a series of large topics that he sees as related but that are usually

treated separately: the social construction of identities, the origins and nature of modern nationalism, the explanation of genocide, and racism. These multiple themes are for him aspects of something he calls 'modern peoplehood.' His mode of demonstration is to review all the alternative explanations for each phenomenon, and to show why each successively is inadequate. His own theses are controversial but he makes a strong case for them. This book should renew debate. Immanuel Wallerstein, Yale University and author of *The Decline of American Power: The U.S. in a Chaotic World*

*International Handbook of Research on Indigenous Entrepreneurship* L. -P. Dana, 2007-06-26 This book offers an original collection of international studies on indigenous entrepreneurship. Through these specific lenses, entrepreneurship greatly appears as a set of cultural values-based behaviours. Once more culture and human values are placed at the heart of entrepreneurship as an economic and social phenomenon.'. - Alain Fayolle, EM Lyon and CERAG Laboratory, France and Solvay Business School, Belgium. 'A must-have for researchers of developmental economics, as well as for entrepreneurship scholars, this collection assembles studies of indigenous entrepreneurship from five continent.

**The Virginia Housewife** Mary Randolph, 2012 This book (hardcover) is part of the TREDITION CLASSICS. It contains classical literature works from over two thousand years. Most of these titles have been out of print and off the bookstore shelves for decades. The book series is intended to preserve the cultural legacy and to promote the timeless works of classical literature. Readers of a TREDITION CLASSICS book support the mission to save many of the amazing works of world literature from oblivion. With this series, tredition intends to make

thousands of international literature classics available in printed format again - worldwide.

**Status Update** Alice E. Marwick, 2013-11-26 Presents an analysis of social media, discussing how a technology which was once heralded as democratic, has evolved into one which promotes elitism and inequality and provides companies with the means of invading privacy in search of profits.

*Understanding the Leitmotif* Matthew Bribitzer-Stull, 2015-05-14 Through analysis, Matthew Bribitzer-Stull explores the legacy of the leitmotif, from Wagner's Ring cycle to present-day Hollywood film music.
