Coercive Concern Reva Jaffe-Walter, 2016-03-16 Many liberal-minded Western democracies

pride themselves on their commitments to egalitarianism, the fair treatment of immigrants, and the right to education. These environments would seem to provide a best-case scenario for the reception of immigrant youth. But that is not always the case. *Coercive Concern* explores how stereotypes of Muslim immigrants in Western liberal societies flow through public schools into everyday interactions, informing how Muslim youth are perceived by teachers and peers. Beyond simply identifying the presence of racialized speech in schools, this book uncovers how coercive assimilation is cloaked in benevolent narratives of care and concern. *Coercive Concern* provides an ethnographic critique of the concern that animates integration policy in Danish schools. Reva Jaffe-Walter focuses on the experiences of Muslim youth at a public school where over 40% of the student body is of immigrant descent, showing how schools operate as sites of governance. These efforts are led by political leaders who promote national fears of immigrant take-over, by teachers in schools, and by everyday citizens who are concerned about problems of immigration. Jaffe-Walter exposes the psychic and material costs immigrant youth endure when living in the shadow of social scrutiny, but she also charts a path forward by uncovering the resources these youth need to attain social mobility and success.

Viceroy Güemes's Mexico Christoph Rosenmüller,2024-03-15 Viceroy Güemes's Mexico: Rituals, Religion, and Revenue examines the career of Juan Francisco Güemes y Horcasitas, viceroy of New Spain from 1746 to 1755. It provides the best account yet of how the colonial reform process

most commonly known as the Bourbon Reforms did not commence with the arrival of José de Gálvez, the visitador general to New Spain appointed in 1765. Rather, Güemes, ennobled as the conde de Revillagigedo in 1749, pushed through substantial reforms in the late 1740s and early 1750s, most notably the secularization of the doctrinas (turning parishes administering to Natives over to diocesan priests) and the state takeover of the administration of the alcabala tax in Mexico City. Both measures served to strengthen royal authority and increase fiscal revenues, the twin goals historians have long identified as central to the Bourbon reform project. Güemes also managed to implement these reforms without stirring up the storm of protest that attended the Gálvez visita. The book thus recasts how historians view eighteenth-century colonial reform in New Spain and the Spanish empire generally. Christoph Rosenmüller's study of Güemes is the first in English-language scholarship that draws on significant research in a family archive. Using these rarely consulted sources allows for a deeper understanding of daily life and politics. Whereas most scholars have relied on the official communications in the great archives to emphasize tightly choreographed rituals, for instance, Rosenmüller's work shows that much interaction in the viceregal palace was rather informal—a fact that scholars have overlooked. The sources throw light on meeting and greeting people, ongoing squabbles over hierarchy and ceremony, walks on the Alameda square, the role of the vicereine and their children, and working hours in the offices. Such insights are drawn from a rare family archive harboring a trove of personal communications. The resulting book paints a vivid portrait of a society undergoing change earlier than many historians have believed.

Infrastructure Regulation Darryl S. L. Jarvis, Xun Wu, 2011 Regulation of public infrastructure has been a topic of interest for more than a century. Yet, little is known about what works and why, when it comes to infrastructure regulation. This book intends to contribute to the understanding of infrastructure regulations by analyzing empirical cases in telecommunications, electricity and water, with examples drawn from a number of countries in Asia and beyond. The book addresses the following questions: Does regulation work? What kind of regulation works? What kinds don't work? Why do some forms of regulation work and not others? How do we know whether they work or not? How do we isolate the effects of different political, economic and legal contexts? Are there systematic differences across infrastructure sectors that necessitate particular regulatory design? It brings together distinguished scholars and practitioners who are experts in the area to address essential issues in regulation through conceptual and empirical studies.

Sounds Like Life Janis B. Nuckolls,1996-04-18 Sound-symbolism occurs when words resemble the sounds associated with the phenomena they attempt to describe, rather than an arbitrary representation. For example the word raven is arbitrary in that it does not resemble a raven; cuckoo, however, is sound -symbolic in that it resembles the bird's call. In *Sounds Like Life*, Janis Nuckolls studies the occurrence of sound-symbolic words in Pastaza Quechua (a dialect of Quechua), which is spoken in eastern Ecuador. The use of sound-symbolic words is much more prevalent in Pastaza Quechua than in any other language, and they symbolize a wider range of sensory perceptions including sounds, rhythms, and visual patterns. Nuckolls uses discourse data from everyday contexts to demonstrate the Quechua speakers' elaborate schematic perceptual structure to describe experience through sound-symbolic language. With words for contact with a surface, opening and closing, falling, sudden realizations, and moving through water and space, Nuckolls finds that sound-symbolism is integral to the Quechua speakers' way of thinking about and expressing their experience of the world.
