**Design in Frankfurt 1920-1990** Klaus Klemp, Dieter Rams, 2014 Less, but better The motto of the Frankfurt designer Dieter Rams is still topical today - and very much so. In the face of rapid globalization and an increasing number of premium product consumers, the question on the resources and the longevity of products inevitably arises. The book outlines the prevalent design trends in Frankfurt and in the Rhine-Main-area from the 1920s to the 1980s. For furniture, interior and graphic design made in and around Frankfurt over seven decades, functionality, visual strength, austerity, aesthetics in clear shapes and the visionary element always played a major role. This first compact illustration of regional design also raises the question, to what extent German design in the 20th century defined itself through decentralized but intensively interlinked places and institutions.

**Indians into Mexicans** David Frye, 2010-07-05 The people of Mexquitic, a town in the state of San Luis Potosí in rural northeastern Mexico, have redefined their sense of identity from Indian to Mexican over the last two centuries. In this ethnographic and historical study of Mexquitic, David Frye explores why and how this transformation occurred, thereby increasing our

understanding of the cultural creation of Indianness throughout the Americas. Frye focuses on the local embodiments of national and regional processes that have transformed rural Indians into modern Mexicans: parish priests, who always arrive with personal agendas in addition to their common ideological baggage; local haciendas; and local and regional representatives of royal and later of national power and control. He looks especially at the people of Mexquitic themselves, letting their own words describe the struggles they have endured while constructing their particular corner of Mexican national identity. This ethnography, the first for any town in northeastern Mexico, adds substantially to our knowledge of the forces that have rendered Indians almost invisible to European-origin peoples from the fifteenth century up to today. It will be important reading for a wide audience not only in anthropology and Latin American studies but also among the growing body of general readers interested in the multicultural heritage of the Americas.

Good to Be God Tibor Fischer, 2008-09-14 Using the credit card and identity of a handA-cuffs salesman, professional failure Tyndale Corbett arrives in Miami for a law-enforcement conference to discover the joys of luxury hotels and above all the delight of being someone else, someone successful. Feeling his previous lack of success might be due to insufficient ambition, Tyndale decides on a new money-making scheme. He will up the ante substantially,

exponentially, and pretend to be someone really important and successful: God. His mission to convince the citizenry of Miami that he is, despite appearances, the Supreme Being results in him taking over the Church of the Heavily Armed Christ. His duties there involve him in forming a private army, hiring call girls, trafficking coke, issuing death threats, beating off church-jackers and sorting out (as almightily as possible) various problems his parishioners are having with pets. All the while he is working on his grand project, the clincher miracle, dying and coming back to life...

*Participatory Politics* Elisabeth Soep, 2014-01-31 An examination of the mix of face-to-face and digital methods that young people use in their experiments with civic engagement. Although they may disavow politics as such, civic-minded young people use every means and media at their disposal to carry out the basic tasks of citizenship. Through a mix of face-to-face and digital methods, they deliberate on important issues and debate with

peers and powerbrokers, redefining some key dynamics that govern civic life in the process. In *Participatory Politics*, Elisabeth Soep examines the specific tactics used by young people as they experiment with civic engagement. Drawing on her scholarly research and on her work as a media producer and educator, Soep identifies five tactics that are part of effective, equitable participatory politics among young people: Pivot Your Public (mobilizing civic capacity within popular culture engagements); Create Content Worlds (using inventive and interactive storytelling that sparks sharing); Forage for Information in public data archives; Code Up (using computational thinking to design tools, platforms, and spaces for public good); and Hide and Seek (protecting privacy and information sources). After describing these tactics as they manifest themselves in a range of youth-driven activities—from the runaway spread of the video Kony 2012 to community hackathons—Soep discusses concrete ideas for cultivating the new literacies that will enable young people to participate in public life. She goes on to consider some risks associated with these participatory tactics, including simplification and sensationalism, and ways to avoid them, and concludes with implications for future research and practice.

Genes And Genomes Maxine Singer, Paul Berg, 1991 The celebrated authors present an in-depth overview of the molecular structures and mechanisms that underlie the utilization of genetic information by complex organisms. **Globalising Education: Trends and Applications** Robin Mason, 2005-06-23 This highly topical book charts how the tools of technology are altering the ways in which education is being delivered and received. It looks at the huge impact of the World Wide Web on current educational practice and what this means for the students and teachers involved. It also covers the other new technologies that support the delivery of what is now truly global education. Divided into three clear sections, Globalising Education adopts a systematic and thoroughly researched approach to this exciting topic. The three sections examine: \* how global education is actually delivered in practice \* case studies which investigate current developments and applications in the USA, Europe, the UK and Australia \* conclusions drawn from the general issues covered, as well as an overview of what is happening now and what we might expect to happen in the future. This book looks at current developments in detail. It is essential reading for all those involved in education - whether as a teacher, student or interested onlooker.

**Virtual Inequality** Karen Mossberger, Caroline J. Tolbert, Mary

Stansbury,2003-08-18 That there is a digital divide—which falls between those who have and can afford the latest in technological tools and those who have neither in our society—is indisputable. Virtual Inequality redefines the issue as it explores the cascades of that divide, which involve access, skill, political participation, as well as the obvious economics. Computer and Internet access are insufficient without the skill to use the technology, and economic opportunity and political participation provide primary justification for realizing that this inequality is a public problem and not simply a matter of private misfortune. Defying those who say the divide is growing smaller, this volume, based on a unique national survey that includes data from over 1800 respondents in low-income communities, shows otherwise. In addition to demonstrating why disparities persist in such areas as technological abilities, the survey also shows that the digitally disadvantaged often share many of the same beliefs as their more privileged counterparts. African-Americans, for instance, are even more positive in their attitudes toward technology than whites are in many respects, contrary to conventional wisdom. The rigorous research on which the conclusions are based is presented accessibly and in an easy-to-follow manner. Not content with analysis alone, nor the untangling of the complexities of policymaking, Virtual Inequality views the digital divide compassionately in its human dimensions and recommends a set of practical and common-sense policy strategies. Inequality, even in a virtual form this book reminds us, is

unacceptable and a situation that society is compelled to address.

Ruling the Root Milton L. Mueller, 2009-01-23 In Ruling the Root, Milton Mueller uses the theoretical framework of institutional economics to analyze the global policy and governance problems created by the assignment of Internet domain names and addresses. The root is the top of the domain name hierarchy and the Internet address space. It is the only point of centralized control in what is otherwise a distributed and voluntaristic network of networks. Both domain names and IP numbers are valuable resources, and their assignment on a coordinated basis is essential to the technical operation of the Internet. Mueller explains how control of the root is being leveraged to control the Internet itself in such key areas as trademark and copyright protection, surveillance of users, content regulation, and regulation of the domain name supply industry. Control of the root originally resided in an informally organized technical elite comprised mostly of American computer scientists. As the Internet became commercialized and domain name registration became a profitable business, a six-year struggle over property rights and the control of the root broke out among Internet technologists, business and intellectual property interests, international organizations, national governments, and advocates of individual rights. By the late 1990s, it was apparent that only a new international institution could resolve conflicts among the factions in the domain name wars. Mueller recounts the fascinating process that led to the formation of a new international regime

around ICANN, the Internet Corporation for Assigned Names and Numbers. In the process, he shows how the vaunted freedom and openness of the Internet is being diminished by the institutionalization of the root.
