We've Got Blog Editors Of Perseus Publishing,2009-04-29 Instantaneous and raw, unedited and uncensored, Weblogs are self-publishing at its best and its worst--occasionally brilliant but often pretentious, sometimes shocking but always fascinating. We've Got Blog is the first book to explore this phenomenon, which has been quickly rising from obscure Webpages to national attention in the Wall Street Journal and USA Today. Weblogs are free, searchable journals of opinions and links updated daily by an individual or a group and they have become some of the hottest Websites. We've Got Blog has pulled together some of the best writing explaining their history, the mavericks who created them, and how they are changing the way we use the Internet.

The Very Best Weblog Writing Ever by Anyone Anywhere in the Whole Wide World Wendy Atterberry,Sarah Hatter,2006-06-01 Twenty-two writers from around the world share their stories of love, loss and self-deprecating humor in this first volume of The Very Best Weblog Writing Ever.This ain't your momma's weblog book.The pieces that made this first volume of The Very Best Weblog Writing Ever By Anyone Anywhere In The Whole Wide World weren't selected because they were written by bloggers with the highest stats or the most comments or with millions of pictures and stories of their kids and wedding plans. These stories were chosen because the writing has style, which makes each one part of the very best weblog writing ever. With self-deprecating humor, poignancy, flair and wit, this collection provides a snapshot view of life through the lens of writers who dare to share their lives, thoughts, and observances with the whole world wide web.

**The World Becomes What We Teach** Zoe Weil, 2016-04-01 New Revised Edition. How can we create a just, healthy, and humane world? What is the path to developing sustainable energy, food, transportation, production, construction, and other systems? What's the best strategy to end poverty and ensure that everyone has equal rights? How can we slow the rate of extinction and restore ecosystems? How can we learn to resolve conflicts without violence and treat other people and nonhuman animals with respect and compassion? The answer to all these questions lies with one underlying system—schooling. To create a more sustainable, equitable, and peaceful world, we must reimagine education and prepare a generation to be solutionaries—young people with the knowledge, tools, and motivation to create a better future. This book describes how we can (and must) transform education and teaching; create such a generation; and build such a future.

**Great Hitting Pitchers** L. Robert Davids, David Vincent, Mike Cook, First published in 1979, GREAT HITTING PITCHERS was one of SABR's early publications. Including the contributions of several members of the Society and edited by SABR's founder, Bob Davids, the book compiled together records and anecdotes about pitchers excelling in the batters box. Now updated for 2012, GREAT HITTING PITCHERS has been updated so that all tables include 1979-2012 data, and previous stats have been corrected to reflect the most recent updates in the record books. Joining the original chapters on pitchers hitting grand slams, pitchers' hitting performances in World Series play, and how the pitchers of no-hitters performed at bat in those games, an all-new chapter by Mike Cook explores the top hitting pitchers since 1979, including Mike Hampton, Micah Owings, and CC Sabathia. **Hits and Misses in the Baseball Draft** Alan Maimon, Chuck Myron, 2014-02-07 If unpredictability is so much of what makes sports compelling, the baseball draft might be the best place to look. This book explores the intricate uncertainties of the draft and the people who face it. Since the modern draft began in 1965, major league teams have attempted, with varying degrees of success, to identify and develop stars of the future. Whether because of injury, poor performance or mental and physical struggles, a large percentage of the most ballyhooed prospects never reach the game's highest level. Though teams have improved in recent years at turning top picks into major leaguers, the baseball draft is still centered on educated guesswork. This book explains why.

**Tales from Baggy Bottom** Diane Wordsworth, 2016-08-24 2005 was a fundamental year for writer and editor Diane Parkin (now Diane Wordsworth). She gave up freelancing full time when she was offered a job editing an in-house magazine, her Market Index column with Writers' News was axed, she lost her lovely dog of 17 years, and it was the year she realised she had to leave her husband. And she started blogging. Following a shift from Blogger to WordPress, today the blog has over 1,000 followers and, despite the rise of Facebook, Twitter and other social networking sites and the demise of hundreds of other blogs along the way, Diane's blog is still going strong. Follow Diane during this significant year when blogging was in its heyday and friendships were forged forever

**Beyond Habermas** Christian Emden, David R. Midgley, 2012-01-15 During the 1960s the German philosopher Jürgen Habermas introduced the notion of a “bourgeois public sphere” in order to describe the symbolic arena of political life and conversation that originated with the cultural institutions of the early eighteenth-century; since then the “public sphere” itself has become perhaps one of the most debated concepts at the very heart of modernity. For Habermas, the tension between the administrative power of the state, with its understanding of sovereignty, and the emerging institutions of the bourgeoisie—coffee houses, periodicals, encyclopedias, literary culture, etc.—was seen as being mediated by the public sphere, making it a symbolic site of public reasoning. This volume examines whether the “public sphere” remains a central explanatory model in the social sciences, political theory, and the humanities.

**The Great Creation Debate** Brad Freckleton, 2012-07 Why isn't the evolution of flight shown in the fossil record?

Bugs, birds, bats and dinosaurs flew and are shown fully formed in the fossil record, but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals. What is desperately wrong with the Grand Canyon if evolution is true? Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time? Why does massive erosion only show up at the top? Animals with well-developed eyes show up suddenly in the fossil record as do flying animals. It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today. The second law of thermodynamics is a law of science that says everything left to its own will wear out, run down. It is a fundamental law of science. So how did evolution accidentally go up? How could a DNA molecule fumble together? The cell needs DNA; DNA needs the cell ñ which came first? 'Beneficial' mutations also weaken in other areas, and don't write evolutionary advancing DNA code. Spiral galaxies (which have the shape of a star fish that is spinning quickly) throughout our universe, like our Milky Way galaxy, are supposed to be over 10 billion years old. If they were over a billion years old they would lose their spiral arm shape. The arms of our galaxy, the Milky Way, only show a maximum age of 0.3 billion years. People want to know why they're here now and where they're going to go. They want surety of truth also. Read this book and see how well evolution holds up in all the sciences. Read this book and see if life can have meaning, direction and hope ñ with surety. For those who claim to be open minded, put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems!
