Public Value and Social Development Bing Wang,2022-03-26 This book aims to seek for the truth which connects public value and social development as basis to build a harmony community for individuals as well as society. The book tries to bridge science, technology, economics, politics, history, ethics, and environment under the concept of public values, and reveals the essentials of public policy for individual and social development. The potential audience of the book are officials and policy makers in the public sectors, as well as managers in the private sectors.

Computational Intelligence in Protein-Ligand Interaction Analysis Bing Wang,Peng Chen,Jun Zhang,2024-03-25 Computational Intelligence in Protein-Ligand Interaction Analysis presents computational techniques for predicting protein-ligand interactions, recognizing protein interaction sites, and identifying protein drug targets. The book emphasizes novel approaches to protein-ligand interactions, including machine learning and deep learning, presenting a state-of-the-art suite of skills for researchers. The volume represents a resource for scientists, detailing the fundamentals of computational methods, showing how to use computational algorithms to study protein interaction data, and giving scientific explanations for biological data through computational intelligence. Fourteen chapters offer a comprehensive guide to protein interaction data and computational intelligence methods for protein-ligand interactions. Presents a guide to computational techniques for protein-ligand interaction analysis Guides researchers in developing advanced computational intelligence methods for the protein-ligand problem Identifies appropriate computational tools for various problems Demonstrates the use of advanced techniques such as vector machine, neural networks, and machine learning Offers the computational, mathematical and statistical skills researchers need

ASCII Shrug Bing Wang,2022-11-20 Why call the book name ASCII Shrug? The born of ASCII makes almost every computing feature possible. The born of ASCII transforms computing and our lives in such an easier way, sometimes we may finish a job with just a shrug. But all these came not easy, countless computing scientists and engineers have devoted to create a series of milestones. Chapter I brings you to hundred years ago, even ancient time when civilization just sprouted. How number is generated? How mathematics and algebra developed? How mathematic related with computing? Chapter II touches many basic concepts. Chapter III goes into a deep further to explain some basic and popular topics in language computing. Have you ever thought about the many basics? What exactly is iteration and recursion? Have you thought about how important floating point is? If philosophy can help us understand the world, we can trace back to Before Christ. Chapter IV tries to illustrate the important programming paradigm from fundamental, from philosophy. What is object in the world? What is object-oriented way of thinking from philosophy point of view? Chapter V accumulates all the contents in my developer notes, it covers data, database, data

modeling, SQL server, and the evolvement of windows interface implementation and web services implementation over the years. Have you thought about SQL server architecture? Why the query can run in SQL server? Have you seen those SQL errors before? Chapter VI pictorial tomorrow's technologies in some computing areas, which directions are for programming languages, big data, and user interface, it also lays out some challenges in the research. If tomorrow comes, we will have something new along with the difficulties, we will have lots of work and challenges, but we are full of hope, we will be looking forward to the coming of each tomorrow.

Understanding China's Real Estate Markets Bing Wang,Tobias Just,2021-06-07 China's economy has been transforming rapidly over the last 25 years. As a result, Chinese conurbations have changed remarkably, with cities expanding both vertically and horizontally, and the physical environment acting as a medium for unprecedented urbanization. This has provided vast opportunities for investors, real estate developers, and service companies, but also presents huge challenges—as traditional city spaces have been reconfigured, environmental risks and the volatility of real estate markets increased. However, as engagement with China is becoming strategically important for many, forming a synthesized lens through which to read China across the vicissitudes of its real estate sector bears historic significance. By offering an insightful framework and structure for understanding China's variegated real estate dynamics, players, and markets, Understanding China's Real Estate Markets codifies the principles and practices of real estate development, finance, and investment in China and builds foundations for future academic research and practical knowledge in shaping and engaging the urban environment within China and beyond.

The Literature and Cultural Ecology of Imperial Examinations in the Ming Dynasty Wenxin Chen,2023-10-03 The book examines the relationship between imperial examinations and literature from the perspective of restoring the cultural ecology of imperial examinations in Ming China, breaking through the paradigm of pure literature research. This book presents an important practice in adjusting the pattern of literary research. The contents of this book include five mutually independent but supportive parts: 1) the living conditions and careers of the literary attendants; 2) the educational background and school's consciousness of the Ming literati; 3) top candidates and Ming literature; 4) genres of imperial examination and the Ming society; 5) exam cheating cases from the perspective of politics and literature. This book will appeal to readers interested in Chinese literature and culture and the imperial examination system in ancient China.

Semiconducting Black Phosphorus Han Zhang,Nasir Mahmood Abbasi,Bing Wang,2021-10-25 Black phosphorus (BP)-based two-dimensional (2D) nanomaterials are used as components in practical industrial applications in biomedicine, electronics, and photonics. There is a need to controllably shape engineered scalable structures of 2D BP building blocks, and their assembly/organization is desired for the formation of three-dimensional (3D) forms such as macro and hybrid architectures, as it is expected that these architectures will deliver even better materials performance in applications. *Semiconducting Black Phosphorus: From 2D Nanomaterial to Emerging 3D Architecture* provides an overview of the various synthetic strategies for 2D BP single-layer nanomaterials, their scalable synthesis, properties, and assemblies into 3D architecture. The book □ covers defect engineering and physical properties of black phosphorous; □ describes different strategies for the development of 2D nanostructures of BP with other species such as polymers, organic molecules, and other inorganic materials; □ offers a comparative study of 3D BP structures with other 3D architectures such as dichalcogenides (TMDs, graphene, and boron nitride); and □ discusses in detail applications of 3D macrostructures of BP in various fields such as energy, biomedical, and catalysis. This is an essential reference for researchers and advanced students in materials science and chemical, optoelectronic, and electrical engineering.

Xu Bing Sarah E. Fraser,Yu-Chieh Li,2020-07-20 This volume offers a path-breaking reassessment of Xu Bing's

oeuvre by analyzing the diverse cultural environments in which his work has developed since the Book from the Sky. It contains three lecture transcripts and eight art historical essays; these explore themes such as Xu's animal works, audience participation, new ink, prints, realism, socialist spectacle, and word play. A critical question addressed in this volume is what carries art to a global level beyond regional histories and cultural symbols. Absorbing critical essays on contemporary Chinese aesthetics addressing the social context and philosophical concerns that underlie Xu Bing's key works. The authors analyze Xu's art, shedding light on the tangled history of socialism and neoliberalism in the Post-Mao period. --Prof. Dr. Lothar Ledderose, Senior Professor, Institute of East Asian Art, Universität Heidelberg

Neutrosophic Number Optimization Models and Their Application in the Practical Production Process Angyan Tu, Jun Ye, Bing Wang, In order to simplify the complex calculation and solve the difficult solution problems of neutrosophic number optimization models (NNOMs) in the practical production process, this paper presents two methods to solve NNOMs, where Matlab built-in function "fmincon()" and neutrosophic number operations (NNOs) are used in indeterminate environments. Next, the two methods are applied to linear and nonlinear programming problems with neutrosophic number information to obtain the optimal solution of the maximum/minimum objective function under the constrained conditions of practical productions by neutrosophic number optimization programming (NNOP) examples. Finally, under indeterminate environments, the fit optimal solutions of the examples can also be achieved by using some specified indeterminate scales to fulfill some specified actual requirements. The NNOP methods can obtain the feasible and flexible optimal solutions and indicate the advantage of simple calculations in practical applications.

Multiple Attribute Decision-Making Method Using Similarity Measures of Neutrosophic Cubic Sets Angyan Tu, Jun Ye, Bing Wang, In inconsistent and indeterminate settings, as a usual tool, the neutrosophic cubic set (NCS) containing single-valued neutrosophic numbers and interval neutrosophic numbers can be applied in decision-making to present its partial indeterminate and partial determinate information.

Advanced Intelligent Computing Technology and Applications De-Shuang Huang, Prashan Premaratne, Baohua Jin, Boyang Qu, Kang-Hyun Jo, Abir Hussain, 2023-07-30 This three-volume set of LNCS 14086, LNCS 14087 and LNCS 14088 constitutes - in conjunction with the double-volume set LNAI 14089-14090- the refereed proceedings of the 19th International Conference on Intelligent Computing, ICIC 2023, held in Zhengzhou, China, in August 2023. The 337 full papers of the three proceedings volumes were carefully reviewed and selected from 828 submissions. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was Advanced Intelligent Computing Technology and

Applications. Papers that focused on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

This book delves into Bingwang. Bingwang is an essential topic that needs to be grasped by everyone, ranging from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Bingwang, encompassing both the fundamentals and more intricate discussions.

1. The book is structured into several chapters, namely:

- Chapter 1: Introduction to Bingwang
