Children's Books for Grown-Up Teachers Peter Appelbaum, 2017-09-25 Teachers and prospective teachers read children's books, but that reading is often done as a teacher – that is, as planning for instruction – rather than as a reader engaged with the text. *Children's Books for Grown-Up Teachers* models the kind of thinking about teaching and learning – the sort of curriculum theorizing – accomplished through teachers' interactions with the everyday materials of teaching. It starts with children's books, branches out into other youth culture texts, and subsequently to thinking about everyday life itself. Texts of curriculum theory describe infrastructures that support the crafts of inquiry and learning, and introduce a new vocabulary of poaching, weirding, dark matter, and jazz. At the heart of this book is a method of reading; Each reader pulls idiosyncratic concepts from children's books and from everyday life. Weaving these concepts into a discourse of curriculum theory is what makes the difference between going through the motions of teaching and designing educational experiences. This book was awarded the 2009 AERA Division B (Curriculum Studies) Outstanding Book Award.

Childhood and Consumer Culture D. Buckingham, V. Tingstad, 2010-08-11 In recent years children have become an increasingly important consumer market, and there is growing concern about the 'commercialisation' of childhood. This book sheds light on these debates, offering new empirical data and challenging critical perspectives on children's engagement with consumer culture from a wide range of international settings.

Toys, Games, and Media Jeffrey Goldstein, David Buckingham, Gilles Brougere, 2004-09-10 This book is a state-of-the-art look at where toys have come from and where they are likely to go in the years

ahead. The focus is on the interplay between traditional toys and play, and toys and play that are mediated by or combined with digital technology. As well as covering the technical aspects of computer mediated play activities, the authors consider how technologically enhanced toys are currently used in traditional play and how they are woven into childrens' lives. The authors contrast their findings about technologically enhanced toys with knowledge of traditional toys and play. They link their studies of toys to goals in education and to entertainment and information transfer. This book will appeal to students, researchers, teachers, child care workers and more broadly the entertainment industry. It is appropriate for courses that deal with the specialized subject of toys and games, media studies, education and teacher training, and child development.

The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8-12 year olds, media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it. The Internet Playground argues that, contrary to the promises of technology boosters, teaching with computers is very difficult. Seiter points out that the Internet today resembles a mall more than it does a library. While children love to play online games, join fan communities, and use online chat and instant messaging, the Internet is also an appallingly aggressive marketer to children and, as this book passionately argues, an educational boondoggle.

Didactics of Microlearning Theo Hug,
Hanging Out, Messing Around, and Geeking Out, Tenth Anniversary Edition Mizuko Ito, Sonja Baumer, Matteo Bittanti, Danah Boyd, Rachel Cody, 2019-10-01

The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. *Hanging Out, Messing Around, and Geeking Out*, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents a flexible and useful framework for understanding the ways that young people engage

with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, *Hanging Out, Messing Around, and Geeking Out* combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.

Don't Eat This Book Morgan Spurlock, 2006-05-02
For thirty days, Morgan Spurlock ate nothing but McDonald's as part of an investigation into the effects of fast food on American health. The resulting documentary earned him an Academy Award nomination and broke box-office records worldwide. But there's more to the story, and in *Don't Eat This Book*, Spurlock examines everything from school lunch programs and the marketing of fast food to the decline of physical education. He looks at why fast food is so tasty, cheap, and ultimately seductive—and interviews experts from surgeons general and kids to marketing gurus and lawmakers, who share their research and opinions on what we can do to offset a health crisis of supersized proportions. Don't eat this

groundbreaking, hilarious book—but if you care about your country's health, your children's, and your own, you better read it.

Primary Schools and ICT Neil Selwyn, John Potter, Sue Cranmer, 2010-05-06 >

Computer and Video Game Law Ashley S. Lipson, Robert D. Brain, 2009 Fun and games have become serious business as evidenced by the rapidly expanding, multi-billion dollar, global computer and video game industry. The relatively new entertainment medium has been growing exponentially and so, too, have its legal difficulties. This new casebook, with its problems and exercises, deals with all aspects of this fascinating phenomenon, including: Product History and Development, Intellectual Property, Commercial Exploitation, and Regulation. The cases guide the reader down a colorful path of disputes involving such familiar hardware names and game titles as: Magnavox, Gameboy, Nintendo, Playstation, Pong, Pacman, Space Invaders, Tetris, Tomb Raider, Frogger, Galaxian, Asteroids, Donkey Kong, Pete Rose Baseball, and Doom. The casebook is suitable as a primary text for both classes and seminars. What this book is and what this book isn't both matter. *Computer and Video Game Law* is not a collection of regurgitation in which authors explain the minutia of a few big cases to people with a cursory interest. It is a compendium of cases, and an excellent compendium at that. It has big cases with big names like Nintendo and Sony battling over trademarks and copyrights. It has small cases such as the one in which a martial artist sued over the use of his image in a bestselling game. I wish this book had existed when I wrote my book on the history of video games. I spent hundreds of dollars doing the research for my chapter on video game trials and acquired not even a third of the case material contained in this book. -- Steven L. Kent, Game

Historian, Author of The Ultimate History of Video Games

Packaging Girlhood Sharon Lamb, Ed.D., Lyn Mikel Brown, Ed.D., 2007-04-01 The stereotype-laden message, delivered through clothes, music, books, and TV, is essentially a continuous plea for girls to put their energies into beauty products, shopping, fashion, and boys. This constant marketing, cheapening of relationships, absence of good women role models, and stereotyping and sexualization of girls is something that parents need to first understand before they can take action. Lamb and Brown teach parents how to understand these influences, give them guidance on how to talk to their daughters about these negative images, and provide the tools to help girls make positive choices about the way they are in the world. In the tradition of books like *Reviving Ophelia*, *Odd Girl Out*, *Queen Bees and Wannabees* that examine the world of girls, this book promises to not only spark debate but help parents to help their daughters.

Chasing bin Laden Barbara K. Janik, 2021-05-28 A secret truth: On the early morning of August 16, 2006, Osama bin Laden was arrested in Brooklyn by the New York FBI Terrorism Task Force. They were acting on a tip called in by Barbara Janik. Janik tells her story: *Chasing bin Laden* takes readers along with Janik on an emotional journey through the hidden world of lay investigations, which is charged with high-stakes puzzle solving, Arabic message boards, and anxiety-provoking collaborations with the FBI. A Pulitzer prize-winning journalist backs her up! In *The Killing of Osama bin Laden*, Seymour Hersh states that "bin Laden was a prisoner of the ISI [Pakistani intelligence] at the Abbottabad compound since 2006..." What does this mean? Janik's memoir tells the story of how, when, and where Osama bin Laden was arrested. He was likely transferred in 2006

from the United States to the compound in Pakistan, where he remained in custody until the 2011 raid. But how does Janik know this stuff? Janik, who is a historian, computer expert, and former adjunct professor, is a master at research and “Google-fu”. She worked with the FBI. The truth of the arrest was revealed to her by the FBI through a series of cloak-and-dagger phone conversations. Yet, can she prove she isn’t making this up? On her website, Janik has uploaded phone records and emails showing the times and content of her conversations with the FBI. There is also a PDF of message board conversations from early 2007. She’s been telling the same story since 2006. Want to know more? Click “Add to Cart”. You won’t regret it.

International Handbook of Children, Media and Culture Kirsten Drotner, Sonia Livingstone, 2008-02-19 This essential volume brings together the work of internationally-renowned researchers, each experts in their field, in order to capture the diversity of children and young people’s media cultures around the world. Why are the media such a crucial part of children’s daily lives? Are they becoming more important, more influential, and in what ways? Or does a historical perspective reveal how past media have long framed children’s cultural horizons or, perhaps, how families – however constituted – have long shaped the ways children relate to media? In addressing such questions, the contributors present detailed empirical cases to uncover how children weave together diverse forms and technologies to create a rich symbolic tapestry which, in turn, shapes their social relationships. At the same time, many concerns – even public panics – arise regarding children’s engagement with media, leading the contributors also to inquire into the risky or problematic aspects of today’s highly mediated world.

Deliberately selected to represent as many parts of the globe as possible, and with a commitment to recognizing both the similarities and differences in children and young people's lives – from China to Denmark, from Canada to India, from Japan to Iceland, from – the authors offer a rich contextualization of children's engagement with their particular media and communication environment, while also pursuing cross-cutting themes in terms of comparative and global trends. Each chapter provides a clear orientation for new readers to the main debates and core issues addressed, combined with a depth of analysis and argumentation to stimulate the thinking of advanced students and established scholars. Since children and young people are a focus of study across different disciplines, the volume is thoroughly multi-disciplinary. Yet since children and young people are all too easily neglected by these same disciplines, this volume hopes to accord their interests and concerns they surely merit.

Gameworlds Seth Giddings, 2016-05-19 Game studies is a rapidly developing field across the world, with a growing number of dedicated courses addressing video games and digital play as significant phenomena in contemporary everyday life and media cultures. Seth Giddings looks to fill a gap by focusing on the relationship between the actual and virtual worlds of play in everyday life. He addresses both the continuities and differences between digital play and longer-established modes of play. The 'gameworlds' title indicates both the virtual world designed into the videogame and the wider environments in which play is manifested: social relationships between players; hardware and software; between the virtual worlds of the game and the media universes they extend (e.g. Pokémon, Harry Potter, Lego, Star Wars); and the gameworlds generated by

children's imaginations and creativity (through talk and role-play, drawings and outdoor play). The gameworld raises questions about who, and what, is in play. Drawing on recent theoretical work in science and technology studies, games studies and new media studies, a key theme is the material and embodied character of these gameworlds and their components (players' bodies, computer hardware, toys, virtual physics, and the physical environment). Building on detailed small-scale ethnographic case studies, *Gameworlds* is the first book to explore the nature of play in the virtual worlds of video games and how this play relates to, and crosses over into, everyday play in the actual world.

Unmarketable Anne Elizabeth Moore, 2007 For years the DIY punk / underground has worked against the logic of mass production and creative uniformity, disseminating radical ideas and directly making and trading goods and services. But what happens when the underground becomes just another market? What happens to cultural resistance when it becomes just another marketing platform? *Unmarketable* examines the corrosive effects of corporate infiltration of the underground - a lively, funny and much-needed look at what this means for activism, commerce and integrity in a world dominated by corporations.

Children and young people's cultural worlds Bragg, Sara, Kehily, Mary Jane, 2013 Growing up in an increasingly media-saturated, commercial, and globalized world, children and young people in contemporary society encounter and must creatively adapt to a range of cultural phenomena. Offering a critical introduction to childhood in the digital

age, Children and Young People's Cultural Worlds challenges common concepts and concerns about childhood innocence held by many adults. It examines the diversity of childhood experiences and relationships—the distinctiveness of children's worlds—and explores topics such as the consequences of age and the experience of living in different cultural contexts. Utilizing contributions from scholars in a variety of different fields, it is interdisciplinary and international in scope. Including resources for teachers and students such as learning outcomes, activities, and additional readings and commentary, this well-written and beautifully presented book will be a valuable resource to anyone interested in new perspectives on childhood in the digital age.
