Integrating Innovations of Rock Mechanics R.J. Rocca,R.M. Flores,A.O. Sfriso,2015-12-11 In November 2015, Buenos Aires, Argentina became the location of several important events for geo-professionals, with the simultaneous holding of the 8th South American Congress on Rock Mechanics (SCRM), the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMG), and the 6th International Symposium on Deformation Characteristics of Geomaterials, as well as the 22nd Argentinean Congress of Geotechnical Engineering (CAMSIGXXII). This synergy brought together international experts, researchers, academics, professionals and geo-engineering companies in a unique opportunity to exchange ideas and discuss current and future practices in the areas of soil mechanics and rock mechanics, and their applications in civil, energy, environmental, and mining engineering. This book presents the proceedings of the 8th South American Congress on Rock Mechanics (SCRM). Topics covered include rock mechanics, rock engineering, natural resources, mining, mechanics, geology and engineering. Approximately 60% of the contributions are in English, and the remaining 40% of the contributions are in either Spanish or Portuguese.

Santi Gucci Fiorentino, Artist and Entrepreneur in Early Modern Poland Olga Maria Hajduk,2024-04-23 The original research in this book analyzes the artistic activity of Santi Gucci (1533- c.1600), a Florentine sculptor active in Poland in the second half of the sixteenth century, and his workshop. Chapters examine the organization of the artistic workshop (sculpting and masonry) and the model

of the artist's functioning as an entrepreneur in Renaissance Poland, using Santi Gucci's activity as an example. Gucci shaped the image of Polish sculpture in the sixteenth century for more than 50 years, even though his work has not yet been fully examined. The author sets Gucci's emigration within the context of the cultural exchanges between Italy and Poland that contributed to the development of the Polish Renaissance. The book will be of interest to scholars working in art history, Renaissance studies, architectural history and economic history.

Advances in Intelligent Systems S.G. Tzafestas, 2001-11-30 Intelligent Systems involve a large class of systems which possess human-like capabilities such as learning, observation, perception, interpretation, reasoning under uncertainty, planning in known and unknown environments, decision making, and control action. The field of intelligent systems is actually a new interdisciplinary field which is the outcome of the interaction, cooperation and synergetic merging of classical fields such as system theory, control theory, artificial intelligence, information theory, operational research, soft computing, communications, linguistic theory, and others. Integrated intelligent decision and control systems involve three primary hierarchical levels, namely organization, coordination and execution levels. As we proceed from the be performed organization to the execution level, the precision about the jobs to increases and accordingly the intelligence required for these jobs decreases. This is in compliance with the principle of increasing precision with decreasing intelligence (IPOI) known from the management field and theoretically established by Saridis using information theory concepts. This book is concerned with intelligent systems and techniques and gives emphasis on the computational and processing issues. Control issues are not included here. The contributions of the book are presented in four parts as follows.
