The Zen of Tantra Monica Esposito, 2013-03-11 After the Zen boom of the 1960s and 1970s, Tibetan Buddhism increasingly captured the West's imagination. Today, entire stadiums fill when the Dalai Lama speaks, training centers mushroom, and books proliferate. Even the most esoteric form of Tibetan Buddhism, rDzogs chen or Great Perfection, has found numerous followers in the West. But the West stands not alone: in communist China, too, this form of Buddhism experienced a kind of camouflaged boom from the 1980s. Monica Esposito (1962-2011), one of Europe's foremost scholars of Chinese religions, observed this process up close. After her discovery in 1988 of a Buddhist nunnery on Mt. Tianmu in China's Zhejiang province, she lived and practiced under the monastery's founder, a Chinese Zen (Chan) and Tibetan rDzogs chen (Great Perfection) master called Fahai Lama (1920-1991). Dr Esposito's book offers a fascinating glimpse into the daily life and practices of a Chinese Buddhist monastery and into the teachings of a man who not only survived the Cultural revolution as an acupuncturist, Qigong master and recluse in a Daoist cave, but managed to found and build a Chan monastery to promote Tibetan Tantra in a still thoroughly communist environment.

China in the Asian Financial Crisis Peter Nolan, 2021-06-01 The widely held view of the Asian Financial Crisis is that it had no substantial impact on China. In fact, the country was far more vulnerable than most people realized, due to the high possibility of financial contagion entering the system from Hong Kong through Guangdong province. This book analyzes the severe policy challenge that it presented for China's leaders. The crisis in Guangdong's financial institutions provided a forewarning of the difficulties that lay ahead as China's integration with the global financial system deepened. The experience of Guangdong in the Asian Financial Crisis provided a profound lesson for China's policy-makers as they planned the country's strategy for financial reform in the following

years. China was able to avoid disaster by astute and difficult policy choices, in the face of fierce pressure from outside the country, as well as from different domestic interests at many different levels. The successful resolution of the crisis provided a breathing space for the leadership. It gave it time to undertake necessary reforms in the country's financial system in the decade that followed the crisis.

Riddles of Belief...and Love: A Story Lin Zhe, 2010 Beijing-based writer Lin Zhe's novel *Waipode Gucheng*, on which this translation is faithfully based, paints an unforgettable picture of an ordinary family caught up in the maelstrom that was China's most recent century. Her narrative ranges across the entire length of China, to California and back again, to the battlefields of the Anti-Japanese War of Resistance and the brutal struggle sessions of the Cultural Revolution. But it always

returns to this family's home in Old Town, that archetypical, old-fashioned, and vanishing place steeped in the traditions of South China. Ms. Lin examines the inner strength that sustains people's lives in their darkest hours, when religious and political faith falter. And yet, a vein of irony and droll humor runs through this powerful story. Lin Zhe's novel may be understood as a love story, memoir, history, or allegory. For the non-Chinese reader it provides a rare and moving insight into Chinese lives in a century of fearsome upheaval.

Spoof Surface Plasmon Polaritons Antenna Junping Geng, Chaofan Ren, Kun Wang, Han Zhou, Jing Zhang, 2021-09-30 This book investigates in detail some new spoof surface plasmon polaritons (SSPPs) structures and their applications to antenna. It introduces the working principle and radiation characteristics of directional antenna, omnidirectional antenna, reconfigurable antenna and phase-mode antenna based on SSPPs structure. Especially, the irregular SSPPs structure, such as T-shaped and m-shaped SSPPs structures, is introduced to low-profile end-fire antenna with vertical polarization; the rotated SSPPs structure is applied to CP end-fire antenna and omnidirectional antenna; PIN circuit combining with SSPPs structure is used to pattern reconfigurable antenna; the novel phase-mode SSPPs antennas with multi-modes are performed too. This book proposes a continuous method to develop the potentialities of the SSPPs antenna. And the readers can study the method or ideas of the SSPPs antenna, even graft the methods to other SSPPs antenna. The book is intended for undergraduate and graduate students who are interested in SSPPs antenna technology, researchers investigating high-performance antenna, and antenna design engineers working on multi-function antenna applications.

Generalized Principle of Pattern Multiplication and Its Applications Junping Geng, Chaofan Ren, Kun Wang, Erwei Liu, Jing Zhang, 2022-08-19 This book investigates in detail the generalized

principle of the pattern multiplication (GPPM) and its application to new phased array with high performances. It introduces the generalized element factor (GEF) to small aperture with multi-modes. Based on the GEF, the GPPM can be used to construct the wide-angle scanning array with the dual-port phase mode antenna. Further, a dual-port phase mode SSPPs antenna is proposed to scan in 3D free space. It is extended to two kinds of 1D arrays with 4 elements; both of them perform good 3D scanning with high gain and large range, which will improve future radar design and wireless communication. This book proposes a new method to develop the potentialities of the GPPM and the new phase array. And the readers can study the method or ideas of the GEF, GPPM, even graft the methods to new phase mode antenna and array. It is intended for undergraduate and graduate students who are interested in new phase mode antenna and array technology, researchers investigating high-performance antenna, and antenna design engineers working on phase array applications.

Images Du Tibet Aux XIXe Et XXe Siècles Monica Esposito, 2008 There may be no other country in the world that has given rise to so many fantastic, fascinating, and conflicting images as Tibet. In the 19th and 20th centuries, as the mysterious country on the roof of the world increasingly became the goal of travelers and the object of study, new images arose in various parts of the world. These two volumes are the first to trace the evolution, characteristics, and influence of premodern and modern images of Tibet in both Orient and Occident. Twenty-five contributions by specialists from Europe, the United States, China, and Japan present and analyze images of Tibet and Tibetan Buddhism. Tracing the formation, character, and impact of such images, these studies address a broad range of issues, from the development of Tibetology and Buddhist studies to the

history of ideas spanning East and West.--
