Internetworking Christoph Meinel,Harald Sack,2013-10-16 This book is supposed to serve as a comprehensive and instructive guide through the new world of digital communication. On the physical layer optical and electrical cabling technology are described as well as wireless communication technologies. On the data link layer local area networks (LANs) are introduced together with the most popular LAN technologies such as Ethernet, Token Ring, FDDI, and ATM as well as wireless LAN technologies including IEEE 802.x, Bluetooth, or ZigBee. A wide range of WAN technologies are covered including contemporary high speed technologies like PDH and SDH up to high speed wireless WANs (WiMAX) and 4th generation wireless telephone networks LTE. Routing technologies conclude the treatment of the data link layer. Next, there is the Internet layer with the Internet protocol IP that establishes a virtual uniform network out of the net of heterogeneous networks. In detail, both versions, IPv4 as well as the successor IPv6 are covered in detail as well as ICMP, NDP, and Mobile IP. In the subsequent transport layer protocol functions are provided to offer a connection-oriented and reliable transport service on the basis of the simple and unreliable IP. The basic protocols TCP and UDP are introduced as well as NAT, the network address translation. Beside transport layer security protocols like SSL and TLS are presented. On the upmost application layer popular Internet application protocols are described like DNS, SMTP, PGP, (S)FTP, NFS, SSH, DHCP, SNMP, RTP, RTCP, RTSP, and World Wide Web.

HURIDOCS Events Standard Formats: A Tool for Documenting Human Rights Violations, English ,2001 The Events Standard Formats constitute one of several tools developed by HURIDOCS to help human rights NGOs and other organizations enhance their capacity to monitor human rights. The formats can be used to document human rights violations, to facilitate database design, and to encourage standardized information exchange. The formats may be used in conjunction with HURIDOCS' Micro-thesauri.

The Debt Crisis in the Eurozone Nikos Petropoulos,George O. Tsobanoglou,2014-06-02 During the past four years, the countries of the European periphery - the so-called PIIGS (Portugal, Ireland, Italy, Greece and Spain) - have been experiencing an economic-financial crisis that can only be compared to the Great Depression. To solve the crisis, the EU and the IMF instituted bailout programs for the debit countries on conditions of austerity and structural reforms. In this volume 20 social scientists, using both theoretical and empirical tools, delve into the causes and the social

impacts of this crisis. The volume also provides an excellent background for a better comprehension of the dynamics of structural and political changes now taking place within the European Union. The social impacts cover a range of consequences, including poverty, unemployment, anti-migrant attitudes, a decline of welfare and health indicators, post-traumatic stress disorders, national humiliation, political alienation and social protest. The authors analyse the “international” and the “domestic” causes of the crisis, while some of them underline the importance of both factors. In the concluding chapter, the editors undertake a synthesis of the previous chapters, and extract a number of policy recommendations that – if adopted – could transform the current financial crisis into a growth-opportunity for the European Union and its member states.

Ecology in Action Fred D. Singer,2016-03-10 Taking a fresh approach to integrating key concepts and research processes, this undergraduate textbook encourages students to develop an understanding of how ecologists raise and answer real-world questions. Four unique chapters describe the development and evolution of different research programs in each of ecology's core areas, showing students that research is undertaken by real people who are profoundly influenced by their social and political environments. Beginning with a case study to capture student interest, each chapter emphasizes the linkage between observations, ideas, questions, hypotheses, predictions, results, and conclusions. Discussion questions, integrated within the text, encourage active participation, and a range of end-of-chapter questions reinforce knowledge and encourage application of analytical and critical thinking skills to real ecological questions. Students are asked to analyze and interpret real data, with support from online tutorials demonstrating the R programming language for statistical analysis.

High Command David Horner,2021-03-30 Since it was first published in 1982, High Command had become the standard reference for anyone interested in Australia's participation in the Second World War, this edition was originally published in 1992. The 50th anniversary of battles such as Singapore, Coral Sea and Kokoda in 1942 re-awakened interest in these milestones in Australia's struggle for independence. Despite the well-known exploits of Australian servicemen in a score of famous battles, Australia's contribution to the war was ultimately determined by the strategic policy-makers in Canberra, Washington and London. How competent were our politicians, military leaders and advisers in formulating our own war strategy? How much did the performance of Australian troops on the battlefield affect our ability to influence allied strategy? The author describes the clash between Generals Rowell and Blamey in Greece. He reveals the impact of the secretary of the Department of Defence, Sir Frederick Shedden, on strategic policy-making. He analyses the role of intelligence, especially signals intelligence, in allied strategy. He shows how Blamey's miscalculation in 1944 removed any chance of Australian troops joining the Americans in the Philippines. And he reveals how a British admiral challenged the authority of the Australian government. High Command presents the remarkable, full story of the political battles behind the military battles.
