Russian Grand Strategy in the era of global power competition Andrew Monaghan,2022-04-26 This book offers a nuanced and detailed examination of two of the most important current debates about contemporary Russia's international activity: is Moscow acting strategically or opportunistically, and should this be understood in regional or global terms? The book addresses core themes of Russian activity – military, energy and economic - but it offers an unusual multi-disciplinary analysis to these themes. Monaghan incorporates both regional and thematic specialist expertise to give a fresh perspective to each of these core themes. Underpinned by detailed analyses of the revolution in Russian geospatial capabilities and the establishment of a strategic planning foundation, the book includes chapters on military and maritime strategies, energy security and economic diversification and influence. This serves to highlight the connections between military and economic interests that shape and drive Russian strategy.
