Light Alloys Robert John Hussey,Josephine Wilson,2013-04-17

Light Alloys Directory and Databook is a world-wide directory of the properties and suppliers of light alloys used in, or proposed for, numerous engineering applications. Alloys covered will include aluminium alloys, magnesium alloys, titanium alloys, beryllium. For the metals considered each section will consist of: a short introduction; a table comparing basic data and a series of comparison sheets. The book will adopt standardised data in order to help the reader in finding and comparing different materials and identifying the required information. All comparison sheets are cross-referenced, so that the user will be able to locate data on a specific product or compare properties easily. The book is designed to complement the existing publications on high performance materials.

Security without Obscurity Jeff Stapleton,2018-07-11

Information security has a major gap when cryptography is implemented. Cryptographic algorithms are well defined, key management schemes are well known, but the actual deployment is typically overlooked, ignored, or unknown. Cryptography is everywhere. Application and network architectures are typically well-documented but the cryptographic architecture is missing. This book provides a guide to discovering, documenting, and validating cryptographic architectures. Each chapter builds on the next to present information in a sequential process. This approach not only presents the material in a structured manner, it also serves as an ongoing reference guide for future use.

Leadership from an Islamic and Western Perspective Dr Asan Vernyuy Wirba, 2017-03-13 This book is about leadership from an Islamic and Western perspective. The objective of this book is to examine leadership from the Western perspective through the eyes of some scholars of leadership. From the Islamic perspective, leadership is examined against the background of the Holy Quran and the Sunnah of our Beloved Messenger Prophet Muhammad (PBUH), as well as the guided Caliphs and previous Prophets of Allah starting from Prophet Adam (PBUH) up to Prophet Muhammad (PBUH). This book is for everyone irrespective of their background and what they do in life. At the same time it is a guide for those who aspire to be leaders purely for the pleasure of Allah on earth and who take their jobs and every activity as a form of worship without expecting anything in return like power or money.
