The Paradox of Representation David Lublin,2020-11-10 In *The Paradox of Representation* David Lublin offers an unprecedented analysis of a vast range of rigorous, empirical evidence that exposes the central paradox of racial representation: Racial redistricting remains vital to the election of African Americans and Latinos but makes Congress less likely to adopt policies favored by blacks. Lublin's evidence, together with policy recommendations for improving minority representation, will make observers of the political scene reconsider the avenues to fair representation. Using data on all representatives elected to Congress between 1972 and 1994, Lublin examines the link between the racial composition of a congressional district and its representative's race as well as ideology. The author confirms the view that specially drawn districts must exist to ensure the election of African Americans and Latinos. He also shows, however, that a relatively small number of minorities in a district can lead to the election of a representative attentive to their interests. When African Americans and Latinos make up 40 percent of a district, according to Lublin's findings, they have a strong liberalizing influence on representatives of both parties; when they make up 55 percent, the district is almost certain to elect a minority representative. Lublin notes that particularly in the South, the practice of concentrating minority populations into a small number of districts decreases the liberal influence in the remaining areas. Thus, a handful of minority representatives, almost invariably Democrats, win elections, but so do a greater number of conservative Republicans. The author proposes that establishing a balance between majority-minority districts and districts where the minority population would be slightly more dispersed, making up 40 percent of a total district, would allow more African Americans to exercise more influence over their representatives.

Dryden’s Second Hundred Years: a Central New York Town in the 20Th Century Elizabeth Denver Gutches,2020-11-18 *Dryden’s Second Hundred Years (Part II)* does two exceptional things. First, its tight focus on local participation in World War II paradoxically chronicles the entire war, a conflict which drew its combatants from small rural townships like Dryden NY, assigned and scattered them throughout the world, and then delivered the survivors back home again, creating in every small American community a microcosm of the entire conflict, an eye-witnessing of the whole story. Second, that story is told here largely in local participants’ own words, in letters from camps, troopships, carriers, cruisers, foxholes, and hospitals, their voices a quiet backdrop to the horrific war they had been asked to fight. The resulting narrative suggests that those who don’t know history – while not always doomed to repeat it – are very likely doomed to live their lives without perspective, to mistake inconvenience for hardship, and hardship for catastrophe, and to be blind to the miracle of everyday normal life.
