EU Criminal Law and Policy Joanna Beata Banach-Gutierrez, Christopher Harding, 2016-07-28 The EU now possesses a clear legal basis for taking action on criminal law matters and steering the policy and practice of Member States in relation to crime and criminal law. However, for what is now an important area of law, there remains a striking absence or uncertainty regarding its theoretical basis, its legitimacy and its conceptual vocabulary. This book offers a review of the significance of EU criminal law and crime policy as a rapidly emerging phenomenon in European law and governance. Bringing together an international set of contributors, the book questions the nature, role and objectives of such 'criminal law', its relationship with other areas of EU policy and law, and the established rules of criminal law and criminal justice at the Member State level. Taking up such subjects as the application of criminal law across national boundaries and in the broader European context, effective enforcement, and the working out of a new European policy, the book helps to structure an increasingly significant subject in law which is still finding its direction. The book will be of great use and interest to researchers and students of EU law, criminal justice, and criminology.

Contaminated Soil '93 F. Arendt, G.J. Annokkée, R. Bosman, W.J. van den Brink, 2012-12-06 F. Arendt, XxX (Conference chairman) w. Harder, TNO (Conference co-chairman) The 1993 Berlin conference on contaminated sites is the fourth in a series of meetings initiated by the Netherlands Organization of Applied Scientific Research (TNO) in 1985 and later continued with the Karlsruhe Nuclear Research center (KfK) of Germany. The present economic stagnation or recession in many countries is leading to various proposals to reduce the level of costly environmental activities: restricted funds are used for really urgent cases rather than precautionary measures. The level of soil contamination caused by the former centrally planned economies adds to this tendency. The Conference tries to broach this controversy by discussing once more the targets and strategies of soil remediation with follow-up use of the site as an important parameter. Both new regulations and modifications of existing lists for a tolerable level of contamination are reviewed alike. Immobilization and enclosure of pollutants are often less expensive than complete remediation and, consequently, may grow in significance. We consider the conference of great significance for demonstrating the experiences gained with management and remediation of contaminated sites internationally, among others to avoid mistakes and excessive costs. Two new types of soil contamination became apparent after the end of the cold war. Many military sites, airfields and training grounds are being abandoned. After decades of use, large sections and hot spots of these sites are polluted to a high average level.

Biogeochemistry of Pollutants in Soils and Sediments Wim Salomons, William M. Stigliani, 2012-12-06 In the USA, Western and Central Europe, there are many large-scale polluted sites that are too large to be cleaned up economically with available technologies. The pollution is caused by heavy industries to soils and sediments in waterways and reservoirs. Since these areas are expected to remain polluted for many years, it is necessary to take a long-term view to insure that the capacity to retain the contaminants is not diminished and to understand the potential for large-scale contaminant mobilization at these sites triggered by changing environmental conditions. This book provides information for predicting long-term changes and making risk assessments and describes the approach of geochemical engineering to handling large-scale polluted sites.

Fool on the Hill Matt Ruff, 2012-07-17 From the author of *Lovecraft Country*: Myth and reality collide on a college campus "in a comic fantasy of wonderful energy, invention, and generosity of spirit" (Alison Lurie). Stephen Titus George is a young writer-in-residence at Cornell University in upstate New York. A bestselling author in search of a new story, he sees his life as a modern-day fairy tale starring himself as a would-be knight trying to woo a lovely maiden—or, actually, two: the bewitching Calliope and his guiding light, Aurora Borealis Smith. But he's not quite in control of the narrative. There's another writer with even greater influence on campus. The unseen Mr. Sunshine is an eternal, semi-retired deity who's been fashioning his own story for centuries. He has all his characters in place: dragons, sprites, gnomes, and villains. And now, finally, his hero. As Mr. Sunshine's world comes to fabulous and violent life, how can Stephen decide his own fate if it's already being plotted by a god? An epic of life and death, good and evil, love and sorcery, *Fool on the Hill* lands Matt Ruff happily on the shelf between Tom Robbins and J. R. R. Tolkien for every lover of the "funky and fantastical" (New York magazine). "Inspired . . . rich in flavorful language . . . [a] dazzling tour de force." —San Francisco Chronicle "The plot comes together like a brilliant clockwork toy." —Locus

Re-writing America Philip D. Beidler, 1991 With his first book, *American Literature and the Experience of Vietnam*, Philip Beidler offered a pioneering study of the novels, plays, poetry, and literature of witness that

sprang from the United States involvement in the Vietnam War. Reviewing the book, the journal American Literature declared, [It is] more than just an introductory act. It also sets forth what are sure to be lasting types of American literary response to Vietnam, and of the scholarly response to the emerging literature of the war. In Re-Writing America, Beidler charts the ongoing achievements of the men and women who first gained public notice as Vietnam authors and who are now recognized as major literary interpreters of our national life and culture at large. These writers--among them Tim O'Brien, Philip Caputo, Winston Groom, David Rabe, John Balaban, Robert Stone, Michael Herr, Gloria Emerson, and Frances Fitzgerald--have applied in their later efforts, says Beidler, many of the hard-won lessons of literary sense-making learned in initial works attempting to come explicitly to terms with Vietnam. Beidler argues that the Vietnam authors have done much to reenergize American creative writing and to lead it out of the poststructuralist impasse of texts as endless critiques of language, representation, and authority. With their direct experience of a divisive and frustrating war--a war not of their own making but of the making of politicians and experts, a war of ancient animosities that cost nearly everything for those involved and settled virtually nothing--these writers in many ways resemble the celebrated generation of poets and novelists who emerged from World War I. Like their forebears of 1914-18, those of the Vietnam generation have undertaken a common project of cultural revision: to re-write America, to create an art that, even as it continues to acknowledge the war's painful memory, projects that memory into new dimensions of mythic consciousness for other--and better--times. Beidler fills his book with detailed, illuminating analyses of the writers' works, which, as he notes, have moved across an almost infinite range of subject, genre, and mode. From David Rabe, for example, have come innovative plays in which overt statements on the traumas of Vietnam (The Basic Training of Pavlo Hummel, Streamers) have made way for broader commentaries on sex, power, and violence in American life (In the Boom Boom Room, HurlyBurly). Winstom Groom has moved from Better Times Than These, a rather traditional (even anachronistic) war novel, to further reaches of rambunctious humor in Forrest Gump. And journalist Michael Herr, whose Dispatches memorably defined a Vietnam landscape at once real and hallucinatory, carried his vision into collaborations on the films Apocalypse Now and Full Metal Jacket. As Beidler notes, the immense price that Vietnam exacted from the American soul continues to draw a plethora of interpretations and depictions. Vietnam authors remind us, in Tim O'Brien's words, of the things they carried. But as Beidler makes clear, they now command us not only to remember but to imagine new possibilities as well.
