The Logan Epic : New trajectories for innovation Bernard Jullien, Yannick Lung, Christophe Midler, 2013-02-06

Synonyme de sophistication, de haute technologie et de prix élevés, l'innovation cherche aujourd'hui ses ruptures dans des formes de valorisation de l'offre délaissées par la concurrence et l'accès à de nouveaux clients. L'épopée de la Logan constitue un archétype de ces nouvelles trajectoires de l'innovation et dessine de nouvelles frontières pour l'industrie. Pourquoi et comment une entreprise comme Renault s'est-elle lancée dans cette aventure ? Comment a-t-elle surmonté les surprises et les obstacles qui l'ont jalonnée pour devenir l'une des success story les plus spectaculaires de ce début du XXI^e siècle ? Quelles sont les suites possibles d'un succès qui déstabilise le modèle de développement traditionnel des entreprises industrielles européennes ? Au terme d'une enquête approfondie dans les coulisses de Renault et Dacia, les trois auteurs, économistes et gestionnaires spécialistes de l'industrie automobile, apportent des réponses à ces questions. Ils analysent la réalisation de ce projet, sous l'angle de la conception du produit, du développement industriel et de son déploiement commercial. Au travers d'entretiens exclusifs avec la plupart des acteurs de ce projet, en particulier, les trois dirigeants qui ont joué un rôle clé dans l'histoire du projet Logan, Louis Schweitzer, Jean-Marie Hurtig et Gérard Detourbet, découvrez les secrets de cette success story. Illustré de nombreux graphiques et de documents inédits, l'ouvrage montre comment la stratégie Logan a émergé et s'est développée dans l'entreprise, comment elle a su percevoir les tendances des marchés émergents, relever des défis de conception jugés impossibles (réaliser une « vraie » voiture rentable à 5000€), construire et déployer des systèmes industriels et commerciaux, dotant l'entreprise d'une dimension internationale inédite jusque-là. Dans le contexte actuel, cet ouvrage apporte, bien au-delà de l'industrie automobile, des

réponses à tous ceux qui s'interrogent sur la déstabilisation actuelle des équilibres économiques mondiaux et le rôle qu'y jouent les processus d'innovation des entreprises.

The Automotive Industry and European Integration A. J. Jacobs, 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19 This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the

knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science, and development.

People, Planet and Profit Samuel O. Idowu, Abubakar S. Kasum, 2016-05-13 It is no longer the case that it's only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of People, Planet and Profit believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners, insufficient attention has been paid to the end product of CSR in practice, which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders, including employees, customers, host communities, governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need; whether the CSR programmes being delivered are adequate; and about the relationship between the corporations' view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions, in terms of economic progress and social and political advancement.

History of Romanian Technology and Industry Dorel Banabic, 2023-10-23 This volume showcases the valuable achievements of the Romanian technology and industry worldwide. It started from the premise that the history of Romanian technique is scarcely known outside the borders of Romania. The main Romanian contributions to the world's technological heritage are missing, except for a few names in the field of aviation, from the great encyclopedias and dictionaries published worldwide. This is due, among other reasons, to the insufficient promotion in widely spoken languages of the history of Romanian technology. The multidisciplinary approach of the volumes means that the field of technology had to be split into several branches. The present volume includes the following industries: electrical engineering, energy technology, biomedicine, maritime and rail transport, automotive industry, aviation. The history of engineering societies, of engineering education, of intellectual property, and of inventions, as well as a synopsis of the personalities of Romanian engineering have been tackled in separate chapters. For each field, are engaged the collaboration of authors who have already published a history of their field. Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of development strategies for Romania and who are familiar not only with the facts and the history of their field, but also with the 'philosophy' behind its development.

Transnational Trade Unionism Peter Fairbrother, Christian Lévesque, Marc-Antonin Hennebert, 2013-08-22 Transnational trade union action has expanded significantly over the last few decades and has taken a variety of shapes and trajectories. This book is concerned with understanding the spatial extension of trade union action, and in particular the development of new forms of collective mobilization, network-building, and forms of regulation that bridge local and transnational issues. Through the work of leading international specialists, this collection of essays examines the process and dynamic of transnational trade union action and provides analytical and conceptual tools to understand these developments. The research presented here emphasizes that the direction of transnational solidarity remains contested, subject to experimentation and

negotiation, and includes studies of often overlooked developments in transition and developing countries with original analyses from the European Union and NAFTA areas. Providing a fresh examination of transnational solidarity, this volume offers neither a romantic or overly optimistic narrative of a borderless unionism, nor does it fall into a fatalistic or pessimistic account of international union solidarity. Through original research conducted at different levels, this book disentangles the processes and dynamics of institution building and challenges the conventional national based forms of unionism that prevailed in the latter half of the twentieth century.

Frugal Innovation Navi Radjou, Jaideep Prabhu, The Economist, 2015-02-10 Frugal innovation is a way that companies can create high-quality products with limited resources. Once the preserve of firms in poor markets, Western companies are now seeking ways to appeal to cost-conscious and environmentally-aware consumers at home. This book explains the principles, perspectives and techniques behind frugal innovation, enabling managers to profit from the great changes ahead. The book explains: How to achieve mass customization, using low-cost robotics, inexpensive product design and virtual prototyping software. How consumers and other external partners can help develop products How to implement sustainable practices, such as the production of waste-free products How to change the corporate culture to become more frugal
