Molecular Structure by Diffraction Methods ,1974 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research. Written by experts in their specialist fields the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor, the Chemical Society, have been publishing reports charting developments in chemistry, which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two, and subsequently three, volumes covering Inorganic, Organic and Physical Chemistry. For more general coverage of the highlights in chemistry they remain a 'must'. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged, while others have altered their emphasis along with their titles; some have been combined under a new name whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume.

High Financier Niall Ferguson,2012-10-25 In this groundbreaking biography, based on more than 10,000 hitherto unavailable letters and diary entries, Niall Ferguson returns to his roots as a financial historian to tell the story of the extraordinary Siegmund Warburg. A refugee from Hitler's Germany, Warburg rose to become the dominant figure in the post-war City of London and one of the architects of European financial integration. Seared by events in the 1930s, when the long-established Warburg bank was first almost destroyed by the Depression and then 'Aryanized' by the Nazis, Warburg was determined that his own bank would learn from the past and contribute to the economic recovery of Britain, the unity of Western Europe and the birth of globalization. Siegmund Warburg was a complex and ambivalent man, as much a psychologist, politician and actor-manager

as a banker. In *High Financier* Niall Ferguson reveals Warburg's idiosyncracies but above all he recaptures the meticulous business methods and strict ethical code that set Warburg apart from the mere speculators and traders who inhabit today's financial world.
