**The Wills Eye Hospital Atlas of Clinical Ophthalmology** William Tasman,Edward A. Jaeger,2001  
The updated Second Edition of this atlas is the definitive pictorial guide to differential diagnosis and treatment of virtually every presenting condition seen in ophthalmologic practice. Specialists from the prestigious Wills Eye Hospital share their expertise in diagnosing and treating congenital and acquired disorders affecting the internal and external structures of the eye. The superb collection of 1,422 illustrations--1,217 in full color--includes sonograms, radiographs, clinical photographs, photomicrographs, and anatomic drawings. This edition features more information on stem cell and genetic research, more radiographic images and explanations of those findings, and descriptions of current methods of laser surgery. A CD-ROM based on this atlas is also available. See Media listing (Montzka) for details. The atlas and CD-ROM can be purchased together as a money-saving package. A Brandon-Hill recommended title.

**Textbook of Therapeutics** Richard A. Helms,David J. Quan,2006 The contributors to this volume deliver information on latest drug treatments and therapeutic approaches for a wide range of diseases and conditions. Coverage includes discussion of racial, ethnic, and gender differences in response to drugs and to biotechnical, pediatric and neonatal therapies.

Textbook of Pediatric Emergency Procedures

Christopher King,Fred M. Henretig,2008 Widely acclaimed for its outstanding step-by-step illustrations, comprehensive coverage, and reader-friendly format, Textbook of Pediatric

Emergency Procedures is now in its thoroughly updated Second Edition. In 137 chapters, the book provides clear, complete instructions on every emergency medicine procedure performed on infants, children, and adolescents. More than 1,000 detailed drawings, most in two-color, show how to perform each procedure. This edition includes a new chapter on new technologies and techniques for managing the difficult airway. Other new topics include use of tissue adhesives in laceration repair, focused abdominal sonography for trauma (FAST), management of priapism, reimplanting an avulsed permanent tooth, use of automatic external defibrillators, and procedures related to bioterrorism.

**Niue Language Dictionary** Niue, University of Hawaii at Manoa. Dept. of Linguistics, 1997-01-01 Tohi Vagahau Niue is a significant new dictionary detailing the Polynesian language of Niue, and will benefit Niuean studies for years to come. While its main aim is to be a repository for native speakers, it will also serve a wider linguistic audience, including comparativists and theorists in lexicography. Detailed user notes introduce the reader to the basic challenges in Niuean lexicography and grammar. With some 10,000 Niuean word entries, the present dictionary is a significant expansion on an earlier work. The Niuean contributors took great care to present their language as a living entity while preserving its valuable past, but they are also aware of its uncertain future. Language revival is essential to preserve a linguistic Pacific jewel, and as such the new dictionary will lend status to Niuean language studies as well as be an invaluable help in using Niuean confidently in everyday life.

**Neuroscience and Connectionist Theory** Mark A. Gluck,David E. Rumelhart,2013-02-01 Written for cognitive scientists, psychologists, computer scientists, engineers, and neuroscientists, this book provides an accessible overview of how computational network models are being used to model neurobiological phenomena. Each chapter presents a representative example of how biological data and network models interact with the authors' research. The biological phenomena cover network- or circuit-level phenomena in humans and other higher-order vertebrates.

Voices past and present Peter E. Raper,2020-01-01 The preservation of South Africa's indigenous languages – the extinct Bushman and Khoikhoi languages in particular – is a pressing concern. *Voices Past and Present* serves as a comprehensive, scholarly and practical source for documenting and preserving some of them. The subcontinent of Africa has been inhabited by Bushman, Khoikhoi and Bantu-speaking peoples for thousands of years, and, for the past few centuries, also by European-speaking peoples. Contact between these peoples brought about changes in the different languages. As a result, modern languages are no longer identical to the original ones, many of which, especially in the case of the Bushman and Khoikhoi languages, have become extinct. Words used in ancient times and recorded long ago often bear no resemblance to their modern counterparts. In this book, Peter E. Raper provides a detailed investigation of the earliest recordings of words available. Words from Old Cape dialects are compared for correspondences in sound and meaning to words from 29 Bushman languages and dialects, as well as to words from Nama, Koranna, Griqua,

!Xuhn, !Xoon, Khwe and N/uu. *Voices Past and Present* provides an extensive corpus of words that can be further utilised for the purpose of shedding light on the specific languages from which the recorded words (and names) were derived, on historical distribution of the various groups, on the classification of the different languages and peoples, for determining relationships or otherwise between the different languages, potentially identifying components of place-names and ethnonyms from ancient and extinct languages, and elucidating other matters that have long vexed scholars who have complained about a lack of recorded data.

*Atlas of Primary Eyecare Procedures* Linda Casser, Murray Fingeret, H. Ted Woodcome, 1997 This clearly illustrated atlas offers straightforward, step-by-step descriptions of common eye procedures used regularly in primary eyecare.

Manual of Ocular Diagnosis and Therapy Deborah Pavan-Langston, 2008 Thoroughly updated for its Sixth Edition, this manual is a highly practical guide to the diagnosis and management of eye disorders and injuries. Experts from Harvard Medical School and the Massachusetts Eye and Ear Infirmary present authoritative, state-of-the-art recommendations in a rapid-access outline format. Appendices include up-to-date ophthalmic drug and systemic antimicrobial formularies with dosages. All chapters have been updated to include the latest information on new disease entities, diagnostic techniques,

drugs, and treatments, including LASIK and LASEK surgery, cataract extractions, intraocular lenses, use of botulinum for blepharospasm, and medical treatment of glaucoma. Thirty new full-color images have been added.
