**Tropical Fruits** Robert E. Paull, Odilo Duarte, 2011 Volume 2 of this revised edition of Tropical Fruits examines the more specialist tropical fruits such as guava, durian, mangosteen, passion fruits and palm fruits. With growing interest in the cultivation, production, study, sales and marketability of these specialist fruits, this is a timely and informative book. Topics like botany, soil and climate requirements, cultivar development, world production and harvesting and postharvest handling are covered in-depth for each crop. This practical and accessible book is an ideal text for horticulture academics, researchers, extension workers, students, breeders, growers and policy makers.

Cyberpl@y Brenda Danet,2020-05-28 The Internet is changing the way we communicate. As a cross between letter-writing and conversation, email has altered traditional letter-writing conventions. Websites and chat rooms have made visual aspects of written communication of greater importance, arguably, than ever before. New

communication codes continue to evolve with unprecedented speed. This book explores playfulness and artfulness in digital writing and communication and answers penetrating questions about this new medium. Under what conditions do old letter-writing norms continue to be important, even in email? Digital greetings are changing the way we celebrate special occasions and public holidays, but will they take the place of paper postcards and greeting cards? The author also looks at how new art forms, such as virtual theatre, ASCII art, and digital folk art on IRC, are flourishing, and how many people collect and display digital fonts on handsome Websites, or even design their own. Intended as a time capsule documenting developments online in the mid- to late 1990s, when the Internet became a mass medium, this book treats the computer as an expressive instrument fostering new forms of creativity and popular culture.

**Real-Life MDA** Michael Guttman, John Parodi, 2006-12-05 Model Driven Architecture (MDA) is a new approach to software development that helps companies manage large, complex software projects and save development costs while allowing new technologies that come along to be readily incorporated. Although it is based on many long-standing industry precepts and best practices, such as UML, it is enough of a departure from traditional IT approaches to require some proof of the pudding. Real-Life MDA is composed of six case studies of real companies using MDA that will furnish that proof. The authors' approach MDA projects by describing all aspects of the project from the viewpoint of the end-users—from the reason for choosing an MDA approach to the results and benefits. The case studies are preceded by an introductory chapter and are followed by a wrap-up chapter summarizing lessons learned. Written for executives, analysts, architects, and

engineers positioned to influence business-oriented software development at the highest levels Filled with concrete examples and analyses of how MDA is relevant for organizations of various sizes Considers a range of uses for MDA—from business process analysis to full-scale software modeling and development Presents results for each case study in terms of tangible, measured benefits, including automatically generated code, defect reduction, improved visibility, and ROI

Dictionar de locuri literare bucurestene Andreea Rasuceanu, Corina

Ciocarlie, 2021-10-28 Bestseller Gaudeamus 2019 Cu hărți originale de Rareș Ionașcu  
Dicționarul de locuri literare bucureștene explorează toposuri și legende urbane privite cu ochii, bătute cu pasul și întipărite în memoria personajelor: Calea Victoriei, Pe strada Mântuleasa, Craii de Curtea-Veche, Șoseaua Virtuții, Calea Văcărești, Hotel Universal, Gara de Est... Dincolo de nomenclatorul străzilor, sunt repertoriate monumente, gări, intersecții, parcuri, piețe, cafenele, cârciumi, hoteluri, cinematografe, ba chiar tarabe de anticari ori chioșcuri de ziare – fiecare dintre ele reprezentând un reper, un nod în rețeaua simbolică a orașului. Reale ori fictive, străzile, aleile, bulevardele se bifurcă și își răspund, dând naștere la o serie de povești interconectate: din Amzei în Romană, de la Ateneu până în Herăstrău, din Cotroceni până în Dudești, traiectoriile personajelor desenează o hartă virtuală a Bucureștiului, cu ajutorul căreia cititorul se poate orienta în preumblările sale urbane și românești. Cu puțină imaginație, i-am putea zări pe Pașadia, bietul Ioanide și Ștefan Gheorghidiu așezați la aceeași masă la Capșa, în vreme ce doamna T. și Elena Drăgănescu schimbă impresii într-un separeu la Athénée Palace, iar Dania, Aneta Pascu și Emilia Răchitaru ies braț la braț de la un film programat la Capitol.

**Parents at Risk** Ramona Thieme Mercer, 1990 This book outlines the challenges of parental role achievement in adverse circumstances during the critical first year of a baby's life. How do parents respond and adapt to such situations? How can nurses help families at this sensitive time? Dr. Mercer offers some practical guidelines for help, along with substantive discussions of the theory and research surrounding this topic.

**Update on Essential Hypertension** Lizbeth Salazar-Sanchez, 2016-09-14 Essential hypertension is a quantitative characteristic that is important for correlating with the rate of morbidity and mortality in the developed and developing countries. The etiology of essential hypertension is complex. This work, authored by renowned researchers in the field, gives updated concepts about essential hypertension. Novel advanced topics are presented in a sole document as hypertension in children; the contribution in the psychiatric comorbidities associated with it; mechanisms of omega-3 in protection against hypertension-related organ damage; oxidative stress at different levels; genetics-associated studies; the role of pollution in essential hypertension; personalized healthcare in a hypertensive patient; and hypertension-related disparities between ethnic groups. It can conclude so that essential hypertension is one of the hottest topics in contemporary medicine.

Parent-infant Nursing Science Lorraine Olszewski Walker, 1992 A final note of caution about the use of this book. Although nursing as a discipline takes a unique view of parents and infants, it also shares many interests with other disciplines that study health and human development. Thus, while this book represents much of nursing's contribution to the study of parents and infants, it is not a complete picture, nor does it attempt to be. Readers are encouraged to seek out relevant research from related fields such as pediatrics, child development, and psychology.
