Decolonial Enactments in Community Psychology Shose Kessi,Shahnaaz Suffla,Mohamed Seedat,2021-11-30 This edited volume in the Community Psychology Book Series emphasizes applications of community psychology for disrupting dominant and hegemonic power relations. The book explores domains of work that are located within critical community psychology, as well as work that is conventionally not self-defined as community psychology but which draws on and contributes to the foundations and enactments of critical and liberatory community psychology. Specifically, the book advances conceptions and praxes for community psychology grounded within a decolonial framework. The volume heeds the call for a generation of approaches to community psychology that link local struggles to broader questions of power, identity, and knowledge production, bringing together examples of praxes from different contexts as a political project of highlighting indigenous struggles toward self-determination. Collectively, the chapters in this book embody a decolonial agenda for community psychology that foregrounds social justice; the lives and knowledges of the marginalized and oppressed; epistemic disobedience and transdisciplinarity; and decolonial aesthetics. The book is divided into two parts - Part I: Conceptions of Engagement for Community Psychology delves into the conceptual framework for a decolonial

community psychology, and Part II: Modes of Enactments and Praxes for Community Psychology builds on these theoretical advancements through examples of praxis in different contexts. The audience for the book includes scholars, researchers, practitioners, activists, and students located within community psychology specifically, as well as disciplines within the health and social sciences, and arts and humanities more broadly.

Resistance to Targeted ABC Transporters in Cancer Thomas Efferth, 2014-10-27
This critical review volume explores the theme of ABC transporters in the context of basic cancer research and its role in drug-resistant tumors. The chapters provided complement basic research by including investigations from translational applications to clinical oncology. The development of resistance is a major obstacle in cancer chemotherapy and the field has been moving rapidly in terms of determining the mechanisms for blocking ABC transporter-mediated drug efflux by specific inhibitors and thereby overcoming multidrug resistance. The volume covers these issues in careful detail. Additional topics include the relevance of ABC transporters in resistance to novel and established anticancer drugs and prognosis of patients to compounds, compounds used in photodynamic therapy, tyrosine kinase inhibitors and others. Furthermore, the potential of radiopharmaceuticals for diagnosis of multidrug-resistant tumors and of nanotechnology to combat drug-resistant tumors is also discussed.

Chinese Women Writers and the Feminist Imagination, 1905-1948 Haiping Yan,2006-11-22 Chinese Women Writers and the Feminist Imagination, 1905-1948 provides a compelling study of leading women writers in modern China, charting their literary works and life journeys to examine the politics and poetics of Chinese transcultural feminism that exceed the boundaries of bourgeois feminist selfhood. Unlike recent literary studies that focus on the discursive formation of the modern Chinese nation state and its gendering effects, Haiping Yan explores the radical degrees to which Chinese women writers re-invented their lives alongside their writings in distinctly conditioned and fundamentally revolutionary ways. The book draws on these women's voluminous works and dramatic lives to illuminate the range of Chinese women's literary and artistic achievements and offers vital sources for exploring the history and legacy of twentieth-century Chinese feminist consciousness and its centrality in the Chinese Revolution. It will be of great interest to scholars of gender studies, literary and cultural studies and performance studies.

Brevertion's Encyclopedia of Inventions Terry Brevertion,2013-10-01 Invention

and innovation are what distinguish the human race from all of the other species on Earth. Throughout history the imagination and pioneering spirit of human kind has compelled us to question why we do things in a certain way and, more importantly, how we can do things better. Celebrating the ingenuity, creativity and resourcefulness that has led to some of the most amazing technological leaps through the ages, Breverton's Encyclopedia of Inventions examines the key innovations and breakthroughs of all time and the genius behind them. Starting with the building of the pyramids in ancient Egypt and the discovery of the solar system, moving through surgery, dynamite and rockets, to modern technology such as the smart card and genetic engineering, Terry Breverton springs many surprises. He uncovers fascinating and little-known facts: for example, that Price, not Fleming, discovered penicillin; that Swan, not Edison invented the electric light, and that Wallace, not Darwin first advanced the theory of evolution. Tracing the sheer persistence of brilliant men and women across the globe, who fought the prevailing ideas of their times and advanced technology, Breverton's Encyclopedia of Inventions will inspire anyone interested in the history and developments that have changed our lives and shaped our planet's future.
