*Polish Business Law* Zdzisław Brodecki, 2003-01-01 As a result of high levels of income and consumer spending, Poland has been an increasingly interesting destination for trade. It is particularly attractive to foreign investors seeking to establish a presence in the country with strong human resources and an ideal geographic location at the heart of Europe. An ambitious strategy of pre-accession to the European Union has changed the legal environment of business towards being more friendly towards foreigners and increased the capacity of the Polish market to cope with competitive pressure within the Union. Comprehensive in its coverage, this book is an excellent source of reference for practitioners and policy-makers, as well as a fundamental resource for lawyers involved in business. *Polish Business Law* is a guide providing information and best practice advice from outstanding lawyers of CMS Cameron McKenna.

**Environmental Engineering IV** Artur Pawlowski, Marzenna R. Dudzińska, Lucjan Pawlowski, 2013-05-21 Environmental engineering has a leading role in the elimination of ecological threats, and deals, in brief, with securing technically the conditions which create a safe environment for mankind to live in. Due to its interdisciplinary character it can deal with a wide range of technical and technological problems. Since environmental engineering uses the knowledge of the basic sciences – biology, chemistry, biochemistry and physics – it is able to neutralise pollution in all the elements of the environment, i.e. the hydrosphere, atmosphere and lithosphere. Moreover, environmental engineering deals with the design and maintenance of systems of water supply, sewage disposal, heating, ventilation and air-conditioning in buildings. *Environmental Engineering IV* contains 77 peer reviewed papers selected from 527 presented at the 4th Congress of Environmental Engineering (Lublin, Poland, 2-5 September 2012). The contributions are divided into 7 chapters: • Water supply • Water and wastewater treatment • Neutralization of solid wastes and sludge • Air protection and quality • Indoor microclimate • Energy • Biology and technology *Environmental Engineering IV* assesses the state of scientific research in various areas of environmental engineering, evaluates the organizational, technical and technological progress made in contributing to ecological security, and determines the place of environmental engineering in sustainable development, taking into account current political and economic conditions, and is a valuable source of information for the environmental engineering professional and academic community.

#### **GDPR: Personal Data Protection in the European Union** Mariusz Krzysztofek,2021-04-07

GDPR: Personal Data Protection in the European Union Mariusz Krzysztofek Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) (EU) 2016/679. Following the GDPR's recent reform – the most extensive since the first EU laws in this area were adopted and implemented into the legal orders of the Member States – this book offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers, and rights of data subjects, providing a thorough, up-to-date account of the legal and practical aspects of personal data protection in the EU. Coverage includes the recent Court of Justice of the European Union (CJEU) judgment on data transfers and new or updated data protection authorities' guidelines in the EU Member States. Among the broad spectrum of aspects of the subject covered are the following: – right to privacy judgments of the CJEU and the European Court of Human Rights; – scope of the GDPR and its key definitions, key principles of personal data processing; – legal bases for the processing of personal data; – direct and digital marketing, cookies, and online behavioural advertising; – processing of personal data of employees; – sensitive data and criminal records; – information obligation & privacy notices; – data subjects rights; – data controller, joint controllers, and processors; – data protection by design and by default, data security measures, risk-based approach, records of personal data processing activities, notification of a personal data breach to the supervisory authority and communication to the data subject, data protection impact assessment, codes of conduct and certification; – Data Protection Officer; – transfers of personal data to non-EU/EEA countries; and – privacy in the Internet and surveillance age. Because the global scale and evolution of information technologies have changed the data processing environment and brought new challenges, and because many non-EU jurisdictions have adopted equivalent regimes or largely analogous regulations, the book will be of great usefulness worldwide. Multinational corporations and their customers and contractors will benefit enormously from consulting and using this book, especially in conducting case law, guidelines and best practices formulated by European data protection authorities. For lawyers and academics researching or advising clients on this area, this book provides an indispensable source of practical guidance and information for many years to come.

#### **Intellectual Property Law in Poland** Piotr Machnikowski,Agnieszka Górnicz-

Mulcahy,2017-06-20 Derived from the renowned multi-volume International Encyclopaedia of Laws,

this monograph provides a survey and analysis of the rules concerning intellectual property rights in Poland. It covers every type of intellectual property right in depth – copyright and neighbouring rights, patents, utility models, trademarks, trade names, industrial designs, plant variety protection, chip protection, trade secrets, and confidential information. Particular attention is paid throughout to recent developments and trends. The analysis approaches each right in terms of its sources in law and in legislation, and proceeds to such legal issues as subject matter of protection, conditions of protection, ownership, transfer of rights, licences, scope of exclusive rights, limitations, exemptions, duration of protection, infringement, available remedies, and overlapping with other intellectual property rights. The book provides a clear overview of intellectual property legislation and policy, and at the same time offers practical guidance on which sound preliminary decisions may be based. Lawyers representing parties with interests in Poland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative intellectual property law.

**Polish River Basins and Lakes - Part I** Ewa Korzeniewska, Monika Harnisz, 2019-06-13 This book offers a comprehensive review of the current environmental conditions and chemical changes in Polish surface waters. Poland is situated in an area that was covered by glaciations in the distant past. The subsequent periods of glacial advance and retreat produced a continuous rejuvenation of the

landscape, and the discharge of surplus water from this area was constantly transformed by morphological, climatic and hydrological changes. Written by expert contributors, the book's respective chapters address the impact of current climatic conditions on the functioning of surface water reservoirs in Poland, while also exploring the country's hydrographic and hydrological network and the trophic state of its rivers and lakes, their eutrophication and threats. Particular attention is paid to sources of pollution, above all, the chemical pollution of water and sediments. Together with the companion book *Polish River Basins and Lakes – Part II: Biological Status and Water Management*, it provides students, environmental chemists, biologists, geologists, hydrologists and surface waters managers with authoritative information on Poland's current environmental status.

**GDPR: General Data Protection Regulation (EU) 2016/679** Mariusz Krzysztofek, 2018-11-01 Personal data protection has become one of the central issues in any understanding of the current world system. In this connection, the European Union (EU) has created the most sophisticated regime currently in force with the General Data Protection Regulation (GDPR) of 2016. This book on this major data protection reform offers a comprehensive discussion of all principles of personal data processing, obligations of data controllers and rights of data subjects. This is the core of the personal data protection regime. GDPR is applicable directly in all Member States, providing for a unification of data protection rules within the EU. However, it poses a problem in enabling international trade and data transfers outside the EU between economies which have different data protection models in place. Among the broad spectrum of aspects of the subject covered are the following: – summary of the changes introduced by the GDPR; – new territorial scope; – key principles of personal data processing; – legal bases for the processing of personal data; – marketing, cookies and profiling; – new information clauses; – new Subject Access Requests (SARs), including the 'right to be forgotten' on the Internet, the right to data portability and the right to object to profiling; – new data protection by design and by default; – benefits from implementing a data protection certificate; and – data transfers outside the EU, including BCRs, SCCs and special features of EU-US arrangements. This book references many rulings of European courts, as well as interpretations and guidelines formulated by European data protection authorities, examples and best practices, making it of great practical value to lawyers and business leaders. Because of the increase in legal certainty in this area guaranteed by the GDPR, multinational corporations and their customers and contractors will benefit enormously from consulting and using this book. For practitioners and academics, researching or advising clients on this area, and government policy advisors, this book provides an indispensable source of guidance and information for many years to come.

**Green Scenarios: Mining Industry Responses to Environmental Challenges of the Anthropocene Epoch** Artur Dyczko, Andrzej M. Jagodziński, Gabriela Woźniak, 2022-05-24 This book

aims to present an alternative based on natural processes and an environmental approach to post-excavation site management, e.g., post-coal mining heaps. These sites are places where various mineral excavation by-products are collected. Nevertheless, some post-mineral excavation sites are oligotrophic, terrestrial, wetland, and water habitat islands, providing unique biodiversity enrichment in the landscape. These oligotrophic mineral habitats are essential in over-fertilized, eutrophic, agricultural and urban-industry surroundings. Some post-mineral excavation sites are places where the wildlife can develop and support the functional processes of novel ecosystems. Implementing the newest biogeochemical and comprehensive knowledge into urban-industry landscape management will help to establish the ecosystem's processes and environmental functioning. There are several post-industrial sites in Europe where the wildlife areas developed due to natural processes, are becoming wildlife hotspots in densely populated urban-industry areas. In this respect, many of the oligotrophic mineral terrestrial, wetland, and water habitats of anthropogenic origin should not be categorized as environmentally dangerous and undergo economic utility-focused reclamation. Facing the actual environmental constraints of the Anthropocene Epoch, the book's chapters presenting the natural basics and perquisites of the environmental ecosystem mosaics, will be interesting for a broad range of environmentalists (scientists and students), miners, economists, and sociologists.

**Economics and Mathematical Modeling in Health-Related Research**, 2022-09-26 The definition of a healthcare system evolves continuously, becoming broader and more complex with each rendering. Healthcare systems can consist of many different elements, including but not limited to: access to comprehensive medical care, health promotion, disease prevention, institutional framework, financing schemes, government responsibility over health, etc. In light of its broad classification of healthcare, this book focuses on a wide spectrum of health-related issues ranging from risk factors for disease to medical treatment and possible frameworks for healthcare systems. Aging populations, increasing costs of healthcare, advancing technology, and challenges created by the COVID-19 pandemic require an innovative conceptual and methodological framework. By combining the experience and effort of researchers from a variety of fields including mathematics, medicine and economics, this book offers an interdisciplinary approach to studying health-related issues. It contributes to the existing literature by integrating the perspective of treatment with the economic determinants of health care outcomes, such as population density, access to financial resources and institutional frameworks. It also provides new evidence regarding the pharmaceutical industry including innovation, international trade and company performance. Contributors are: Sayansk Da Silva, Joe Feinglass, Scott W. Hegerty, Joseph E. Hibdon, Jr, Arkadiusz Michał Kowalski, Małgorzata Stefania Lewandowska, Dawid Majcherek, Ewelina Nojszewska, Izabela Pruchnicka-Grabias, Agata Sielska and Julian Smółka.
