Extremal Optimization Yong-Zai Lu,Yu-Wang Chen,Min-Rong Chen,Peng Chen,Guo-Qiang Zeng,2018-09-03 Extremal Optimization: Fundamentals, Algorithms, and Applications introduces state-of-the-art extremal optimization (EO) and modified EO (MEO) solutions from fundamentals, methodologies, and algorithms to applications based on numerous classic publications and the authors' recent original research results. It promotes the movement of EO from academic study to practical applications. The book covers four aspects, beginning with a general review of real-world optimization problems and popular solutions with a focus on computational complexity, such as NP-hard and the phase transitions occurring on the search landscape. Next, it introduces computational extremal dynamics and its applications in EO from principles, mechanisms, and algorithms to the experiments on some benchmark problems such as TSP, spin glass, Max-SAT (maximum satisfiability), and graph partition. It then presents studies on the fundamental features of search dynamics and mechanisms in EO with a focus on self-organized optimization, evolutionary probability distribution, and structure features (e.g., backbones), which are based on the authors' recent research results. Finally, it discusses applications of EO and MEO in multiobjective optimization, systems modeling, intelligent control, and production scheduling. The authors present the advanced features of EO in solving NP-hard problems through problem formulation, algorithms, and simulation studies on popular benchmarks and industrial applications. They also focus on the development of MEO and its applications. This book can be used as a reference for graduate students, research developers, and practical engineers who work on developing optimization solutions for those complex systems with hardness that cannot be solved with mathematical optimization or other computational intelligence, such as evolutionary computations.

Heath, with advisory editors and contributors from around the world, the set is designed to reach a wide array of student readers who will go on to serve as opinion leaders for improving the image and ethics of the practice. The Second Edition continues to explore key challenges facing the profession, such as earning the trust and respect of critics and the general public. Much greater emphasis and space will be placed on a theme that was just emerging when the First Edition appeared: the Internet and social media as public relations tools. International coverage and representation has been greatly expanded, as well. Finally, biographies (which are now widely available on the Web) have been deleted to give room to areas of enhanced coverage, and biographical material are included where appropriate within the context of topical entries.

However, a long entry on women pioneers in public relations has been included as an appendix.

The Basics of Media Writing Scott A. Kuehn,Andrew Lingwall,2016-12-08 The Basics of Media Writing: A Strategic Approach helps readers develop the essential writing skills and professional habits needed to succeed in 21st-century media careers. This research-driven, strategy-based media writing textbook digs deeply into how media professionals think and write in journalism, public relations, advertising, and other forms of strategic communication. Authors Scott A. Kuehn and Andrew Lingwall have created two comprehensive writing models to help students overcome their problems in finding and developing story topics by giving them “starting points” to begin writing. The Professional Strategy Triangle model shows students how to think critically about the audience, the situation, and the message before starting a news story or persuasive piece and the FAJA four-point model asks students a series of questions about their story type (Fact, Analysis, Judgment, or Action) to guide them to the right angle or organizational structure for their message. Rooted in classical rhetorical methods, this step-by-step technique enables readers to strategically approach each writing task, no matter the format.

Media Education Assessment Handbook William G. Christ,2020-07-24 Assessing media education is a formidable task because both assessment and media education are complex and controversial concepts. Assessment, which can take place at the individual student, class, sequence, program, department or unit, and university levels, is questioned in terms of reliability, validity, relevance, and cost. Media education, which has been challenged at a number of schools, finds faculty and administrators in the midst of soul-searching about how to clearly articulate its missions and purposes to a broader audience. Departments are under increasing national, state, and institutional pressure to get assessment procedures carried out quickly, but there is an obvious danger in rushing to implement assessment strategies before establishing what is essential in media education. In communication education in general, the what of assessment is often discussed in terms of skills, attitudes, affect, values, and knowledge. People assess students to determine what they know, think, feel, value, and can do. Here it is suggested that one of the places to start defining what students should learn from their media education is by identifying outcomes. Outcomes can be assessed in a variety of ways, but first they need to be developed and clearly articulated.
