The Online Advertising Playbook Joe Plummer, Stephen D. Rappaport, Taddy Hall, Robert Barocci, 2007-07-20 Praise for The Online Advertising Playbook Finally, someone has documented all we know about online advertising and how to do it right. As much as this confirms that online advertising really works, we know that marketers don't always get it right. The ARF's The Online Advertising Playbook provides critical insight on what sticks and what doesn't in online advertising and marketing. —Greg Stuart, CEO and President, Interactive Advertising Bureau and coauthor of What Sticks The Online Advertising Playbook's principles, case studies, and strategic insights equip marketers with the best knowledge available. It will help your online advertising achieve the full range of marketing objectives, from lead generation and customer acquisition to driving trial and loyalty. —Tim Kopp, Vice President, Global Interactive Marketing, The Coca-Cola Company To grow interactive marketing from here we need to institutionalize our wisdom and experience about what works. This book explains, in a disciplined way, what marketers have learned from a decade of massive change. —Ted McConnell, Interactive Innovation Director, Procter & Gamble The Online Advertising Playbook is a milestone in the maturation of interactive advertising, but also an invaluable go-to guide for managers trying to make smart decisions with their advertising budgets. —Van Riley, Vice President of Research, AOL The best marketing communication is spawned from what I call 'informed intuition.' After reading The Online Advertising Playbook, I am far better

informed on how to optimize the online channel in our advertising and promotional programs. It's a perfect blend of case studies and research-backed learning. —Rod DeVar, Manager, Advertising and Promotion, United States Postal Service Savvy marketers should take advantage of The Online Advertising Playbook's findings and principles to get real results. —Chris Theodoros, Director of Industry Relations, Google A work of wisdom and rigor in the digital space that is as relevant for the newbie as it is for the digerati. —Mike Donahue, Executive Vice President, American Association of Advertising Agencies This is a must-read for any marketing executive involved in online advertising. It's high time that a book looks at online advertising in the context of an integrative promotional strategy, one meant to set objectives, establish creative strategies, and measure results. The book nicely ties the various components of online advertising to relevant case studies, and the emphasis on measurement and results is refreshing. Not only is it relevant for marketing executives, it would also be a good basic text for any Internet advertising course and a good adjunct to any Internet marketing course. —Henry Assael, Professor of Marketing, Stern School of Business, New York University

Wind Effects on Cable-Supported Bridges You-Lin Xu, 2013-03-07 As an in-depth guide to understanding wind effects on cable-supported bridges, this book uses analytical, numerical and experimental methods to give readers a fundamental and practical understanding of the subject matter. It is structured to systemically move from introductory areas through to advanced topics currently being developed from research work. The author concludes with the application of the theory covered to real-world examples, enabling readers to apply their knowledge. The author provides background material, covering areas such as wind climate, cable-supported bridges, wind-induced damage, and the history of bridge wind engineering. Wind characteristics in atmospheric boundary layer, mean wind load and aerostatic instability, wind-induced vibration and aerodynamic instability, and wind tunnel testing are then described as the fundamentals of the subject. State-of-the-art contributions include rain-wind-induced cable vibration, wind-vehicle-bridge interaction, wind-induced vibration control, wind and structural health monitoring, fatigue analysis, reliability analysis, typhoon wind simulation, non-stationary and nonlinear buffeting response. Lastly, the theory is applied to the actual long-span cable-supported bridges. Structured in an easy-to-follow way, covering the topic from the fundamentals right through to the state-of-the-art Describes advanced topics such as wind and structural health monitoring and non-stationary and nonlinear buffeting response Gives a comprehensive description of various methods including CFD simulations of bridge and vehicle loading Uses two projects with which the author has worked extensively, Stonecutters cable-stayed bridge and Tsing Ma suspension bridge, as worked examples, giving readers a practical understanding

Behavior of Iab Under Different Pile Head Connections Yamuna Bhagwat, Rajkumar Raikar, Nikhil Jambhale, 2015-04-29 The book presents the Behavior of Integral Abutment Bridges under different Pile Head Connections. The influence on the design parameters such as bending moment, shear force and longitudinal stresses in deck slab have been considered. The study demonstrates that the design parameters are affected by the pile

head to abutment connection. In addition, the results of DL (Dead Load) + Temperature and DL (Dead Load) + LL (Live Load) + Temperature combination with varying span numbers have been compared with single span and with DL (Dead Load). The effect on interior and exterior girder has also been studied. An interesting outcome of the study is an inversely proportional relation between the number of spans and the design parameters. The increase in temperature tends to enhance negative BM and decreases positive BM.
