Around Herndon Margaret C. Peck,2004 The town of Herndon is situated on the western edge of Virginia's picturesque Fairfax County. In the 18th and early 19th centuries, this part of Fairfax County was primarily agricultural, and as additional settlers arrived farming flourished. Early residents found woods, flat open fields, outcroppings of rocks, and workable soil throughout the region. By 1857, the installation of the railroad line brought summer residents, commuters, and real estate developers to the area. Residential growth continued into the 20th century, as more Washington, D.C. workers chose Herndon as a convenient town from which they could commute to their jobs. From 1959 to 1961, the railroad line experienced busy years when it was used to haul sand and construction materials to build neighboring Dulles Airport, which opened in 1962. Although the region has become a center of Internet technology, with several high tech companies located in the area, Herndon still retains a small-town charm.

Clean-up of Former Soviet Military Installations Roy C. Herndon,John E. Moerlins,J.Michael Kuperberg,Peter I. Richter,Imre L. Biczo,2013-04-17 A NATO Advanced Research Workshop (ARW) was conducted on June 21-23, 1994 in Visegnid, Hungary related to the clean-up of former Soviet military installation sites. This ARW included a technical site visit to the Komarom Base Site which is a former Soviet military installation in Hungary. During this three-day ARW, a strategy and set of recommendations were developed for selecting technologies and evaluating remediation as the economic and approaches for these sites. This strategy incorporated such critical issues financial conditions of the region, temporal considerations with regard to the urgency for which remedial actions are needed for these sites, the prioritization of resource allocations for site clean-up using risk-based considerations, and other crucial issues which will affect the implementation of remedial activities in the region. Approximately 40 invited experts, representing a number of different disciplines as well as both NATO and Cooperation Partner countries from the region, participated in this ARW. The types of former Soviet military installations in Central and Eastern Europe include: aircraft bases, fueling areas, maintenance and repair facilities, training grounds, non ammunition storage areas (for lubricants, chemicals, paints, equipment), ammunition storage areas, medical facilities, production facilities, and municipal facilities. Environmental contamination at these sites poses significant human health and environmental risks. Site contaminants include: solvents (e. g. , BTEX), mineral oil hydrocarbons, polycyclic aromatic hydrocarbons (PAHs), chlorinated hydrocarbons, heavy metals, pesticides residues, and polychlorinated biphenyls (PCBs). The primary environmental media adversely affected by these contaminants are soils, ground water and surface water.

International Handbook of Earthquake & Engineering Seismology William H.K. Lee,Paul Jennings,Carl Kisslinger,Hiroo Kanamori,2002-09-27 Modern scientific investigations of earthquakes began in the 1880s, and the International Association of Seismology was organized in 1901 to promote collaboration of scientists and engineers in studying earthquakes. The International Handbook of Earthquake and Engineering Seismology, under the auspices of the International Association of Seismology and Physics of the Earth's Interior (IASPEI), was prepared by leading experts under a distinguished international advisory board and team of editors. The content is organized into 56 chapters and includes over 430 figures, 24 of which are in color. This large-format, comprehensive reference summarizes well-established facts, reviews relevant theories, surveys useful methods and techniques, and documents and archives basic seismic data. It will be the authoritative reference for scientists and engineers and a quick and handy reference for seismologists. Also available is The International Handbook of Earthquake and Engineering Seismology, Part B. Two CD-ROMs containing additional material packaged with the text

Installation Art and the Practices of Archivalism David Houston Jones,2016-03-31 On the leading edge of trauma and archival studies, this timely book engages with the recent growth in visual projects that respond to the archive, focusing in particular on installation art. It traces a line of argument from practitioners who explicitly depict the archive (Samuel Beckett, Christian Boltanski, Art & Language, Walid Raad) to those whose materials and practices are archival (Mirosław Bałka, Jean-Luc Godard, Silvia Kolbowski, Boltanski, Atom Egoyan). Jones considers in particular the widespread nostalgia for ‘archival’ media such as analogue photographs and film. He analyses the innovative strategies by which such artefacts are incorporated, examining five distinct types of archival practice: the intermedial, testimonial, personal, relational and monumentalist.

Space, Site, Intervention Erika Suderburg,2000 From Ferdinand Chevel's Palais Ideal (1879-1905) and Simon Rodia's Watts Towers (1921-1954) to

Ant Farm's Cadillac Ranch (1974) and Richard Serra's Tilted Arc (1981), installation art has continually crossed boundaries, encompassing sculpture, architecture, performance, and visual art. Although unique in its power to transform both the site in which a work is constructed and the viewer's experience of being in a place, installation art has not received the critical attention accorded other art forms. In Space, Site, Intervention, some of today's most prominent art critics, curators, and artists view installation art as a diverse, multifaceted, and international art form that challenges institutional assumptions and narrow conceptual frameworks. The contributors discuss installation in relation to the genealogy of modern art, community and corporate space, multimedia cyberspace, public and private ritual, the gallery and the museum, public and private patronage, and political action. This ambitious volume focuses on issues of class, sexuality, cultural identity rase, and gender, and highlights a wide range of artists whose work is often marginalized by mainstream art history and criticism. Together, the essays in Space, Site, Intervention investigate how installation resonates within modern culture and society, as well as its ongoing influence on contemporary visual culture.
