A to Z Woman Jamese Basken,2017-10-31 This book is filled with poetry that gives you an inside view of my life experiences, my beliefs and values, and the growing pains I had to endure to be shaped into the woman I am today. The commentary for each poem ensures that you gain a full understanding of who I am and why I write! Through my poetic gift I want to speak to your heart and help eliminate the belief that people are alone and not able to overcome traumatic experiences. Through my words and my life I provoke people to evaluate themselves and their circumstance and be an active participant in their healing process. It is my ultimate desire to see people develop their authentic selves. This book reminds us that who we are, is not determined by circumstances but by how we choose to live through them.

James E. Franklin: Securities and Exchange Commission Opinion ,

An Analysis of James E. Lovelock's Gaia Mohammad Shamsudduha,2017-07-05 Gaia: A New Look At Life on Earth may continue to divide opinion, but nobody can deny that the book offers a powerful insight into the creative thinking of its author, James E. Lovelock. Published in 1979, Gaia offered a radically new hypothesis: the Earth, Lovelock

argued, is a living entity. Together, the planet and all its separate living organisms form a single self-regulating body, sustaining life and helping it evolve through time. Lovelock sees humans as no more special than other elements of the planet, railing against the once widely-held belief that the good of mankind is the only thing that matters. Despite being seen as radical, and even idiotic on its publication, a version of Lovelock's viewpoint has found resonance in contemporary debates about the environment and climate, and has now broadly come to be accepted by modern thinkers. As man's effects on the climate become increasingly extreme, more and more elements of the Earth's self-regulation seem to be unveiled – forcing scientists to ask how far the planet might be able to go in order self-regulate effectively. Indeed, despite its far-fetched elements, Lovelock's Gaia thesis seems to ring more convincingly today than ever before; that it does is largely a result of the critical thinking skills that allowed Lovelock to produce novel explanations for existing evidence and, above all, to connect existing fragments of evidence together in new ways.

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him.
